When securities to be issued pursuant to this Base Prospectus are qualified as "certificates" (as defined in "Terms and Conditions of the German Law Notes"), any reference in the relevant section of this Base Prospectus and in the applicable Final Terms to "Notes" and "Noteholders" shall be deemed to be a reference to "Certificates" and "Certificateholders".

Notes issued under the Programme may either be unsecured or secured (**Secured Notes**), as specified in the applicable Final Terms and as further described herein.

Payments in respect of Notes issued by SG Issuer or Societe Generale Effekten GmbH will be unconditionally and irrevocably guaranteed by Societe Generale (the **Guarantor**).

Subject as set out herein, the Notes will not be subject to any minimum or maximum maturity.

The Notes will be issued on a continuing basis to one or more of the Dealers specified in the "General Description of the Programme" and any additional dealer appointed under the Programme from time to time (each a **Dealer** and together the **Dealers**). Notes may also be issued to third parties other than Dealers. Dealers and such third parties are referred to as **Purchasers**. The terms and conditions of the German Law Notes (the **German Law Notes**) are set out herein in the "Terms and Conditions of the German Law Notes".

German Law Notes may be issued in bearer form (**Bearer Notes**, which include Bearer SIS Notes (as defined in the section headed "Terms and Conditions of the German Law Notes"). Bearer Notes may be represented by one or more Global Notes (as defined in the section headed "Terms and Conditions of the German Law Notes").

Bearer Notes (other than Bearer SIS Notes) will be deposited with a common depository (Common Depository) or, in the case of new global notes (**New Global Notes** or **NGN**), a common safekeeper (**Common Safekeeper**) on behalf of Euroclear Bank SA/NV as operator of the Euroclear System (**Euroclear**) and Clearstream Banking, S.A. (**Clearstream, Luxembourg**) and Clearstream Banking AG, Germany (**Clearstream, Germany**). Bearer SIS Notes (certified in a Permanent Global SIS Note) will be deposited with the Swiss securities services corporation SIX SIS Ltd (**SIS**) or any other intermediary in Switzerland recognised for such purposes by SIX Swiss Exchange Ltd (**SIX Swiss Exchange**).

This Base Prospectus has been approved by the Luxembourg *Commission de Surveillance du Secteur Financier* (the **CSSF**) which is the Luxembourg competent authority for the purposes of Regulation (EU) 2017/1129, as amended (the **Prospectus Regulation**). The CSSF only approves this Base Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation and such approval shall not be considered as an endorsement of the Issuers, the Guarantor and of the quality of the securities that are the subject of this Base Prospectus. The CSSF gives no undertaking as to the economic and financial soundness of the Notes issued under the Programme or the quality or solvency of the Issuers, in accordance with the provisions of Article 6(4) of the Luxembourg act on prospectuses for securities dated 16 July 2019, as amended. Such approval does not extend to money market instruments (as defined in the Prospectus Regulation) having a maturity of less than one year or to Notes (which are not publicly offered) to be admitted to trading on the Euro MTF (as defined below).

Application has also been made to the Luxembourg Stock Exchange for Notes issued under the Programme to be admitted to trading on (i) the Luxembourg Stock Exchange's regulated market and to be listed on the Official List of the Luxembourg Stock Exchange and (ii) the multilateral trading facility Euro MTF of the Luxembourg Stock Exchange (the **Euro MTF**). The regulated market of the Luxembourg Stock Exchange is a regulated market for the purposes of the Markets in Financial Instruments Directive 2014/65/EU of 15 May 2014 (as amended, **MiFID II**) (a **Regulated Market**).

The Euro MTF is not a Regulated Market and accordingly the CSSF is not the competent authority for the approval of this Base Prospectus in connection with Notes issued under the Programme which are admitted to trading on the Euro MTF, but the Euro MTF is subject to the supervision of the CSSF. The CSSF has neither reviewed nor approved any information in this Base Prospectus pertaining to Notes admitted to trading on the Euro MTF. The CSSF therefore assumes no responsibility in relation to the issues of Notes admitted to trading on the Euro MTF.

Notes issued under the Programme may also be unlisted or listed and admitted to trading on any other market, including any other Regulated Market in any Member State of the EEA and/or offered to the public in any Member State of the EEA. The applicable Final Terms in respect of the issue of any Notes will specify whether or not such Notes will be listed and admitted to trading on any market and/or offered to the public in any Member State of the EEA and, if so, the relevant market.

This Base Prospectus has been approved on 10 June 2024 and is valid until 10 June 2025 and must during such period and in accordance with Article 23 of Regulation (EU) 2017/1129, as amended, be completed by a supplement to the Base Prospectus in the event of any new significant facts or material errors or inaccuracies. The obligation to supplement the Base Prospectus in the event of significant new factors, material mistakes or material inaccuracies does not apply when the Base Prospectus is no longer valid.

This Base Prospectus will be filed with SIX Exchange Regulation Ltd (prospectus office) as competent review body under the Swiss Financial Services Act (the "**FinSA**") for automatic acceptance of this Base Prospectus as an issuance prospectus in accordance with article 54(2) of the FinSA. The CSSF has neither reviewed nor approved any information in this Base Prospectus pertaining to Notes listed on SIX Swiss Exchange.

The Notes and any guarantee thereof have not been and will not be registered under the United States Securities Act of 1933, as amended (the **Securities Act**) or under the securities law of any state or political sub-division of the United States, and trading in the Notes has not been approved by the Commodity Futures Trading Commission (the **CFTC**) under the United States Commodity Exchange Act of 1936, as amended (the **CEA**). No person has registered and no person will register as a commodity pool operator of any Issuer under the CEA and the rules thereunder (the **CFTC Rules**) of the CFTC, and no Issuer has been and no Issuer will be registered as an investment company under the United States Investment Company Act of 1940, as amended, and the rules and regulations thereunder (the **Investment Company Act**). The Notes are being offered and sold in reliance on an exemption from the registration requirements of the Securities Act pursuant to Regulation S thereunder (**Regulation S**).

Accordingly, the Notes may not be offered, sold, pledged or otherwise transferred except in an "offshore transaction" (as defined under Regulation S) to or for the account or benefit of a person who (a) is not a U.S. person as defined in Rule 902(k)(1) of Regulation S; and (b) is not a person who comes within any definition of U.S. person for the purposes of the CEA or any CFTC Rule, guidance or order proposed or issued under the CEA (for the avoidance of doubt, any person who is not a "Non-United States person" defined under CFTC Rule 4.7(a)(1)(iv), but excluding, for purposes of subsection (D) thereof, the exception for qualified eligible persons who are not "Non-United States persons," shall be considered a U.S. person) and (c) is not a "U.S. person" for purposes of the final rules implementing the credit risk retention requirements of Section 15G of the U.S. Securities Exchange Act of 1934, as amended (the **U.S. Risk Retention Rules**) (a **Risk Retention U.S. Person**) (such a person or account, **Permitted Transferee**). The Notes described herein are available only to Permitted Transferees.

The Notes are being offered and sold outside the United States to non-U.S. persons. The Notes are not being offered to investors in the United States or to any U.S. persons, including qualified institutional buyers.

Notice of the aggregate nominal amount of Notes, interest (if any) payable in respect of Notes and the issue price of Notes which are applicable to each issuance (as defined in the General Terms and Conditions of the Notes) of Notes will be set out in a final terms document (the **Final Terms**) which (except in the case of Exempted Swiss Public Offer Note or Exempt Offer Note) (all as defined in the sections entitled "General Terms and Conditions of the German Law Notes") will be delivered to the CSSF.

THE NOTES OFFERED HEREBY HAVE NOT BEEN AND WILL NOT BE REGISTERED WITH, OR APPROVED BY, ANY UNITED STATES FEDERAL OR STATE SECURITIES OR COMMODITIES COMMISSION OR REGULATORY AUTHORITY. FURTHERMORE, THE FOREGOING AUTHORITIES HAVE NOT PASSED UPON OR ENDORSED THE MERITS OF THIS OFFERING OR THE ACCURACY OR ADEQUACY OF THIS BASE PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENCE IN THE UNITED STATES.

U.S. Treasury regulations issued under Section 871(m) of the U.S. Internal Revenue Code of 1986 (the **Section 871(m) Regulations**) generally impose a 30% withholding tax on dividend equivalents paid or deemed paid (within the meaning of the relevant Section 871(m) Regulations) to a non-United States holder (a **Non-U.S. Holder**) with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities (**U.S. Underlying Equities**). Specifically, and subject to special rules from 2017 through 2026 set out in Notice 2024-44 (the **Notice**), the Section 871(m) Regulations will generally apply to Notes issued on or after 1 January 2017 that substantially replicate the economic performance of one or more U.S. Underlying Equities as determined by the Issuers on the date for such Notes as of which the expected delta of the product is determined by the Issuers based on tests in accordance with the applicable Section 871(m) Regulations (for the purposes of the Notice, such Notes are deemed "delta-one" instruments) (the **Specified Notes**). A Note linked to U.S. Underlying Equities which the Issuer has determined not to be a Specified Note will not be subject to withholding tax under Section 871(m) Regulations. Investors are advised that the Issuer's determination is binding on all Non-U.S. Holders of the Notes, but it is not binding on the United States Internal Revenue Service (the **IRS**) and the IRS may therefore disagree with the Issuer's determination.

The applicable Final Terms will specify if the Notes are Specified Notes, and, if so, whether the relevant Issuer or its withholding agent will withhold tax under Section 871(m) Regulations and the rate of the withholding tax. Investors should note that if the Issuer or any withholding agent determines that withholding is required, neither the relevant Issuer nor the withholding agent will be required to gross up any amounts withheld in connection with a Specified Note. Investors should consult their tax adviser regarding the potential application of Section 871(m) Regulations to their investment in the Notes.

Potential purchasers and sellers of the Notes should be aware that they may be required to pay taxes or documentary charges or duties in accordance with the laws and practices of the jurisdiction in which the Notes are transferred or other jurisdictions. In some jurisdictions, no official statements of the tax authorities or court decisions may be available for financial instruments such as the Notes. Potential investors are advised to consult their own tax adviser on the tax impacts of the acquisition, holding, disposal and redemption of the Notes. The requirement to pay such taxes may reduce the effective yield on the Notes and may also have an adverse impact on their value.

IMPORTANT – EEA RETAIL INVESTORS – If the Final Terms in respect of any Notes state "Prohibition of Sales to EEA Retail Investors" as Applicable, the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available, with effect from such date, to any retail investor in the European Economic Area (**EEA**). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of Directive 2016/97/EU (as amended or superseded, the **Insurance Distribution Directive** or the **IDD**), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129, as amended (the **Prospectus Regulation**). Consequently no key information document required by Regulation (EU) No 1286/2014 (as amended, the **PRIIPs Regulation**) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

IMPORTANT – UK RETAIL INVESTORS – If the Final Terms in respect of any Notes state "Prohibition of Sales to UK Retail Investors", as Applicable, the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (**EUWA**); or (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement the IDD, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the **UK PRIIPs Regulation**) for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

MIFID II PRODUCT GOVERNANCE/ TARGET MARKET – the Final Terms in respect of any Notes may include a legend entitled "MiFID II PRODUCT GOVERNANCE" which will outline the target market assessment in respect of the Notes, taking into account the five (5) categories referred to in item 19 of the Guidelines published by the European Securities and Markets Authority ("ESMA") on 3 August 2023 and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a **distributor**) should take into consideration the target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the Product Governance rules under Commission Delegated directive 2017/593 (EU) (the **"MiFID Product Governance Rules"**), any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules. For the avoidance of doubt, the Issuer is not a MiFID regulated entity and does not qualify as a distributor or a manufacturer under the MiFID Product Governance Rules.

UK MiFIR product governance / target market – the Final Terms in respect of any Notes may include a legend entitled "UK MiFIR Product Governance" which will outline the target market assessment in respect of the Notes, taking into account the five (5) categories referred to in item 18 of the Guidelines published by ESMA on 5 February 2018 (in accordance with the FCA's policy statement entitled "Brexit: our approach to EU non-legislative materials"), and which channels for distribution of the Notes are appropriate. Any person subsequently offering, selling or recommending the Notes (a **-distributor**) should take into consideration the target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the **UK MiFIR Product Governance Rules**) is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules, any Dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MiFIR Product Governance Rules.

The CSSF has neither reviewed nor approved any information in relation to Notes which are only listed on the SIX Swiss Exchange or offered to the public solely in Switzerland, nor has the CSSF reviewed or approved any Notes in respect of admission to trading on a Multi Trading Facility, including the Euro MTF of the Luxembourg Stock Exchange.

11. CERTAIN RESTRICTIONS

Each issue of Notes denominated in a currency in respect of which particular laws, guidelines, regulations, restrictions or reporting requirements apply will only be issued in circumstances which comply with such laws, guidelines, regulations, restrictions or reporting requirements in full force (see “*Subscription, Sale and Transfer Restrictions*”) including the following restrictions applicable at the date of this Base Prospectus.

Notes having a maturity of less than one year

Notes issued by SG Issuer or Societe Generale Effekten GmbH having a maturity of less than one year will, if the proceeds of the issue are accepted in the United Kingdom, constitute deposits for the purposes of the prohibition on accepting deposits contained in Section 19 of the Financial Services and Markets Act 2000 unless they are issued to a limited class of professional investors and have a denomination of at least £100,000 or its equivalent, see “*Subscription, Sale and Transfer Restrictions*”.

Under the Luxembourg act dated 16 July 2019 on prospectuses for securities (the **Luxembourg Prospectus Act**), which implements the Prospectus Regulation, prospectuses relating to money market instruments having a maturity at issue of less than twelve months and complying with the definition of securities (as defined in the Prospectus Regulation) do not constitute a prospectus for the purposes of the Prospectus Regulation.

12. TYPE OF NOTES

No debt securities that are exchangeable or convertible into shares (under Article 19 of Commission Delegated Regulation (EU) 2019/980) will be issued under this Base Prospectus.

Any benchmark to which a Note refers will be provided by an administrator included in the register referred to in Article 36 of Regulation (EU) 2016/1011, as amended, (the EU Benchmarks Regulation) or the FCA's register of

administrators in accordance with Article 36 of Regulation (EU) 2016/1011, as amended, as it forms part of domestic law by virtue of the EUWA (the **UK Benchmarks Regulation**).

Fixed Rate Notes

Partly Paid Notes

The Issue Price of Partly Paid Notes will be payable in more than one instalment.

While any part payments of the subscription moneys due from the holder of Partly Paid Notes are overdue, no interest in a Temporary or Permanent Global Note representing such Notes may be exchanged for Definitive Bearer Notes.

If any Noteholder fails to pay any part payment due on any Partly Paid Notes within the time specified, the relevant Issuer may have a right to redeem such Notes if so specified, and on the terms set out, in the applicable Final Terms.

Floating Rate Notes

Floating Rate Notes will bear interest at a rate determined (i) on the same basis as the floating rate under a notional interest rate swap transaction in the relevant Specified Currency governed by an agreement evidenced by a confirmation incorporating the 2021 ISDA Definitions (as published by the International Swaps and Derivatives Association, Inc. and as amended and updated as at the Issue Date of the first Tranche of the Notes of the relevant Series) or (ii) on the basis of a reference rate appearing on an agreed screen page of a commercial quotation service.

The margin (if any) relating to such floating rate will be agreed between the relevant Issuer and the relevant Dealer(s) for each issue of Floating Rate Notes and specified in the applicable Final Terms.

Zero Coupon Notes

Zero Coupon Notes will not bear interest other than in the case of late payment.

Fixed/Floating Rate Notes

Fixed/Floating Rate Notes may bear interest at a rate that converts from a fixed rate to a floating rate, or from a floating rate to a fixed rate. Where the relevant Issuer has the right to effect such a conversion, this will affect the secondary market and the market value of the Notes since the relevant Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing.

Dual Currency Notes

Payments in respect of Dual Currency Notes (whether in respect of principal and/or interest and whether at maturity or otherwise) will be made in such currency or currencies, and based on such rate or rates of exchange, as the relevant Issuer and the relevant purchaser(s) may agree (as indicated in the applicable Final Terms).

Positive Impact Notes

Use of proceeds

The net proceeds from each issue of Notes by Societe Generale will be used for the general financing purposes of the Group.

If in respect of any particular issue of Notes, an amount equivalent to the net proceeds of the issue will be applied to finance or refinance (via direct expenditures, via direct investments or via loans), in part or in full, eligible activities which serves to deliver a positive contribution to one or more of the three pillars of sustainable development (economic, environmental and social) (such activities, the **Eligible Activities**), as detailed in the sustainable and positive impact bond framework of the Issuer, as amended and supplemented from time to time and available on the website of Societe Generale (https://www.societegenerale.com/sites/default/files/documents/2021-11/20211104_Societe-Generale-Sustainable-and-Positive-Impact-Bond-Framework.pdf) (the **Framework**), such use will be stated in the Final Terms of such Notes (the **Positive Impact Notes**).

Societe Generale’s Treasury department will manage the net proceeds of the Positive Impact Notes in accordance with this Framework.

Subsequent changes to the Framework will not apply to outstanding Positive Impact Notes (grandfathering). As such, Eligible Activities must meet the eligibility criteria at the time they are flagged as Eligible Activities, it being understood that if Societe Generale decides to enhance eligibility criteria, then these new criteria will not apply

retroactively (Existing Eligible Activities do not lose their status if they do not meet the new eligibility criteria) to the existing Eligible Activities. For the avoidance of doubt, new Positive Impact Notes shall be aligned with the most recent version of the Framework.

During the life of the Positive Impact Notes, Eligible Activities will be added to or removed from the pool of Eligible Activities to the extent required (e.g. in case of projects divestment or cancellation, in case of amortized or redeemed loans, or if an activity ceases to meet the eligibility criteria). In case of removal of Eligible Activities, Societe Generale commits, on a best effort basis, to reallocate immediately the equivalent amount of proceeds to other Eligible Activities.

Eligible Activities will be tracked through Societe Generale's internal IT systems.

Pending the full allocation of an amount equivalent to the net proceeds, the unallocated amount will be managed within Societe Generale's regular cash management operations.

RISK FACTORS

The discussion below is intended to describe various risk factors associated with an investment in the Notes. You should carefully consider the following discussion of risks, and any risk factors included in the documents incorporated by reference herein.

The Issuers and the Guarantor believe that the factors described below represent the principal risks inherent in investing in Notes issued under the Programme, but the failure of the relevant Issuer or the Guarantor to pay interest (if any), principal or other amounts on or in connection with any Notes may occur or arise for other reasons which may not be considered significant risks by the Issuers or the Guarantor based on information currently available to them or which they may not currently be able to anticipate.

Words and expressions defined elsewhere in this Base Prospectus shall have the same meanings when used in this section.

To the best of each Issuers' knowledge, in each category of Risk Factors, the risk factor identified by the Issuers as the most important appears first. For the rest of the risk factors, the order of appearance is not an indication of the importance or the likelihood of their occurrence.

2. RISKS RELATING TO THE ISSUERS AND THE GUARANTOR

2.1 Factors that may affect Societe Generale's ability, as Issuer or Guarantor, to fulfil its obligations under the Notes

In case of Notes issued by Societe Generale, if Societe Generale defaults or goes bankrupt, the Noteholders may suffer a partial or total loss of the amount invested. If Societe Generale is subject to measures in respect of the regulations relating to the statutory bail-in mechanism (bail-in), their debt may be reduced to zero, converted into equity (shares) or debt securities or undergo a maturity postponement. Their investment is not covered by any guarantee or compensation system. Societe Generale's credit ratings are an assessment of its ability to honour its commitments. Consequently, any actual or anticipated downgrading of Societe Generale's credit ratings may affect the market value of the Notes.

Societe Generale unconditionally and irrevocably guarantees the payment of all amounts due under the Notes by SG Issuer and as a result the Noteholders are exposed to the credit risk of Societe Generale as Guarantor. Societe Generale's credit ratings are an assessment of its ability to honour its commitments. Consequently, any actual or anticipated downgrades of Societe Generale's credit ratings may affect the market value of the Notes.

Even though Senior Preferred Notes that are issued only by Societe Generale are senior to the Senior Non-Preferred Obligations of Societe Generale, they may still be exposed to potential losses as a result of the resolution of Societe Generale in accordance with the applicable resolution law (Senior Preferred Notes and Senior Non Preferred Obligations are defined in Condition 2 of the German Law Notes).

Issue of the Notes by the Issuers on the account of the Guarantor and Limited Recourse

The obligations under the Notes constitute direct, unconditional, unsubordinated and, subject to the Guarantee unsecured limited recourse obligations of any of the Issuers and shall at all times rank *pari passu* and without preference among themselves.

Societe Generale Effekten GmbH and the Guarantor have entered into a trust agreement (the **Trust Agreement**) pursuant to which Societe Generale Effekten GmbH shall, *inter alia*, (i) issue and redeem the Notes on a fiduciary basis (*treuhänderisch*) in its own name but for the account of the Guarantor; (ii) collect any proceeds resulting from the issuance of the Notes and forward them to the Guarantor; and (iii) use only the funds made available to it by the Guarantor under the Trust Agreement (which funds shall equal the amount of any payments owed by the Issuer under the Notes as and when such payment obligations fall due and in a manner that allows the Issuer to fulfil its payment obligations in a timely manner) for payments owed under the Notes as and when they fall due and to make such payments on a fiduciary basis in its own name but for the account of the Guarantor. Societe Generale Effekten GmbH ability to satisfy its payment obligations under the Notes in full is therefore dependent upon Societe Generale Effekten GmbH receiving in full the amounts payable to it by the Guarantor under the Trust Agreement.

Due to this trust structure, the Noteholders directly depend on the credit risk of the Guarantor (see "Creditworthiness of the Guarantor" below) rather than that of Societe Generale Effekten GmbH. Any payment obligations of the Societe Generale Effekten GmbH under the Notes are limited to the funds received from the Guarantor under the Trust Agreement.

To the extent the funds to be received from the Guarantor under the Trust Agreement prove ultimately insufficient to satisfy the claims of all Noteholders in full, then any shortfall arising therefrom will be extinguished and no Noteholder has any further claims against Societe Generale Effekten GmbH (subject, however, to the right to exercise any termination or early redemption rights). This applies irrespective of whether Societe Generale Effekten GmbH would be able to make such payments out of other funds available to it.

For the avoidance of doubt, the above-mentioned limited recourse structure does not limit the rights of Noteholders under the Guarantee and no not alter or impair the Guarantor's obligations under the relevant guarantee.

2.2 Risks relating to the Societe Generale Effekten GmbH under the Trust Agreement

Any payment obligations of the Societe Generale Effekten GmbH under the Notes are limited to the funds received from the Guarantor under the Trust Agreement. To the extent the funds to be received from the Guarantor under the Trust Agreement prove ultimately insufficient to satisfy the claims of all Noteholders in full, then any shortfall arising therefrom will be extinguished and no Noteholder has any further claims against the Societe Generale Effekten GmbH (subject, however, to the right to exercise any termination or early redemption rights). This applies irrespective of whether the Societe Generale Effekten GmbH would be able to make such payments out of other funds available to it.

Pursuant to the Trust Agreement, the Guarantor is obliged to make available to the Societe Generale Effekten GmbH funds that equal the amount of any payments owed by the Societe Generale Effekten GmbH under the Notes as and when such payment obligations fall due and in a manner that allows the Societe Generale Effekten GmbH to fulfil its payment obligations in a timely manner. Due to this fiduciary issue structure the Noteholders depend solely and directly on the payments under the Trust Agreement and thus on the credit risk of the Guarantor.

2.3 Factors that may affect SG Issuer's ability, as Issuer, to fulfil its obligations under the Notes

In case of Notes issued by SG Issuer, SG Issuer's activity consists *inter alia* in issuing debt securities and the funds collected are systematically deposited with Societe Generale in the form of either term loans or swap contracts and pursuant to which SG Issuer will receive from Societe Generale the amounts due under the Notes. SG Issuer's ability to make payments under the Notes will therefore depend primarily on the performance of its obligations by Societe Generale under such hedging transactions entered into between SG Issuer and Societe Generale.

If SG Issuer defaults or goes bankrupt, as a result of the limited recourse clause on SG Issuer included in the terms and conditions of the Notes, the Noteholders have no recourse against SG Issuer and any amount due and unpaid by SG Issuer must be claimed against Societe Generale as Guarantor.

If the resolution authorities take structural bail-in measures in accordance with the regulations relating to the recovery and resolution of credit institutions and investment firms, against securities issued by Societe Generale or SG Issuer (statutory bail-in) or against structured securities of Societe Generale (contractual bail-in) then the investment of the Noteholders may be reduced to zero, converted into equity (shares) or debt securities or be subject to a maturity postponement and in such case the obligations of Societe Generale as Guarantor shall be adjusted to such reduction, conversion or postponement. Their investment is not covered by any guarantee or indemnity system.

2.4 Information in relation with the lack of independence of each Issuer and, as the case may be, the Guarantor - Conflict of interest

Societe Generale will act as issuer under the Programme, as the Guarantor of the Notes issued by SG Issuer, as Calculation Agent and also as provider of hedging instruments to each Issuer. As a result, investors will be exposed not only to the credit risk of Societe Generale but also to operational risks arising from the lack of independence of Societe Generale, in assuming its duties and obligations as the Guarantor, Calculation Agent and provider of the hedging instruments. Whilst compliance procedures require effective segregation of duties and responsibilities between the relevant divisions within the Guarantor, the possibility of conflicts of interest arising cannot be wholly eliminated.

The Group provides a full array of capital market products and advisory services worldwide including the issuance of "structured securities" where the amounts due under the Notes are linked to the performance of underlying

assets, and may possess or acquire material and/or confidential information about the underlying assets and/or the reference entities which is not public knowledge and which are or could be important to the Notes.

Such business activities and such material and/or confidential information may cause consequences adverse to the Noteholders. The Issuers, the Guarantor and any other member of the Group have no obligation to disclose such information about such underlying assets or the obligors to which they relate or the reference entities.

The Calculation Agent, the Arranger, the Dealers, the Paying Agents, and the Exchange Agent may be all part of the Group. A deterioration of Societe Generale's credit risk would have a negative impact on the obligations of each of the entities listed above in relation to the Notes. If one of these entities does not respect its obligations towards the relevant Issuer and/or the Guarantor, this could have a negative impact on the value of the Notes and the Noteholders may therefore lose part or all of their investment in the Notes.

2.5 French Insolvency Law

Societe Generale is a société anonyme with its corporate seat in France. In the event that Societe Generale becomes insolvent, insolvency proceedings will be generally governed by the insolvency laws of France to the extent that, where applicable, the "centre of main interests" (as construed under Regulation (EU) 2015/848, as amended) of Societe Generale is located in France.

The Directive (EU) 2019/1023 on preventive restructuring frameworks, on discharge of debt and disqualifications, and on measures to increase the efficiency of procedures concerning restructuring, insolvency and discharge of debt, and amending Directive (EU) 2017/1132 has been transposed into French law by the Ordonnance 2021-1193 dated 15 September 2021. Such ordonnance, applicable as from 1st October 2021, amends French insolvency laws notably with regard to the process of adoption of restructuring plans under insolvency proceedings. According to this ordonnance, "affected parties" (including notably creditors, and therefore the Noteholders) shall be treated in separate classes which reflect certain class formation criteria for the purpose of adopting a restructuring plan. Classes shall be formed in such a way that each class comprises claims or interests with rights that reflect a sufficient commonality of interest based on verifiable criteria. Noteholders will no longer deliberate on the proposed restructuring plan in a separate assembly, meaning that they will no longer benefit from a specific veto power on this plan. Instead, as any other affected parties, the Noteholders will be grouped into one or several classes (with potentially other types of creditors) and their dissenting vote may possibly be overridden by a cross-class cram down.

Both the scopes of the Directive (EU) 2019/1023 and the ordonnance do not cover financial institutions, unless the competent authority chooses to make them applicable. In such a case, the application of French insolvency law to a credit institution as Societe Generale is also subject to the prior permission of the Autorité de contrôle prudentiel et de résolution before the opening of any safeguard, judicial reorganisation or liquidation procedures. This limitation will affect the ability of the Noteholders to recover their investments in the Notes.

Should such proceedings be opened, the commencement of insolvency proceedings against Societe Generale would have a material adverse effect on the market value of Notes issued by Societe Generale. As a consequence, any decisions taken by a class of affected parties could negatively and significantly impact the Noteholders and cause them to lose all or part of their investment, should they not be able to recover all or part of the amounts due to them from the Issuer.

2.6 Risk relating to the Issuer substitution

Societe Generale, SG Issuer or Societe Generale Effekten GmbH may be replaced by each other or by any subsidiary or any other third party as principal obligor in respect of the Notes without the consent of the relevant Noteholders; provided certain conditions are satisfied (*inter alia* no withholding tax triggered by the substitution, guarantee by Societe Generale to be maintained as the case may be). Any such substitution may impact the value of the Notes and consequently the Noteholders may lose part or all of their investment in the Notes.

2.7 Risks of interruption or malfunction of Societe Generale information and communication systems due to cyber criminality

Societe Generale and SG Issuer rely largely on Societe Generale's group information and communication systems to carry out their businesses. Any interruption or malfunction in the security of Societe Generale's systems, which could be caused in particular by a breakdown or operational failure of its financial intermediaries or external service providers which it uses to carry out or facilitate its securities operations or by malicious and/or fraudulent acts using digital means to reach data, data treatments and data users and constituting a cybercrime, could lead to malfunctions or interruptions in Societe Generale Group's information and communication. Even if the Societe Generale's group has developed means aiming at preventing the occurrence of such events, these risks cannot be totally excluded. If such interruptions, malfunctions, malicious and/or fraudulent acts occurred, Societe Generale and/or SG Issuer might not be able to perform its obligations under the Notes or might perform them only partly. In those cases, pursuant to the General Terms and Conditions of the Notes, Societe Generale and/or SG Issuer, upon notification to the Noteholders, would suspend the performance of its obligations without this constituting an event of default and without interest accruing on the Notes. Consequently, investors may lose part or all of their investment in the Notes.

2.8 Risk relating to the applications of international financial sanctions

Economic or financial sanctions, trade embargoes or similar measures (the "Sanctions") may be enacted, administered or enforced by the United Nations, the United States of America, the United Kingdom or the European Union (or any present or future member state thereof) (or by any agency of any of above mentioned) against countries, entities and/or individuals. Sanctions usually aim at prohibiting payments to be made to the relevant countries, entities and/or individuals, and as such may affect the capacity of the Issuers, the Guarantor,

the paying agents and/or the clearing systems to effectuate the payments due under the Notes in whole or in part. The Sanctions may be different from one of the jurisdictions or organizations mentioned above to another, they may have an extra territorial effect. The way of complying with the Sanctions also largely rely on the interpretation made by the authorities in charge of the implementation of these Sanctions. In that context, pursuant to the General Terms and Conditions of the Notes, Societe Generale and/or SG Issuer, upon notification to the Noteholders, would suspend the performance of its obligations without this constituting an event of default and without interest accruing on the Notes. Consequently, investors may lose part or all of their investment in the Notes.

3. RISKS RELATING TO THE CHARACTERISTICS OF THE NOTES

3.1 Risks related to the characteristics of the Notes

3.1.1 Risks linked to Notes including a risk of capital loss

For Notes which include a risk of capital loss, the redemption value of such Notes may be less than the amount initially invested. In a worst case scenario, investors may lose their entire investment. Moreover, regardless of the level of the capital protection, the investor may lose part or all of the initially invested amount, if the Notes are sold by the investor before the maturity date.

3.1.2 Risks linked to Notes offering a full capital protection at maturity date

For Notes which offer a full capital protection (100%) of the Specified Denomination at maturity date, the investor may, however, lose part or all of the initially invested amount if the Notes are sold by the investor before the maturity date (since the value of the Notes during their lifetime may be lower than the amount of the capital protection due to market fluctuations).

3.1.3 Notes issued by Societe Generale that Eligible Notes

The qualification of Notes as Eligible Notes is subject to uncertainty

The Notes issued by Societe Generale, specified in the applicable Final Terms as Eligible Notes are intended to be eligible liabilities available to meet the MREL or TLAC Requirements or MREL Requirements as the case may be (all as defined in Condition 2 of the German Law Notes) (the “**Eligible Notes**”). If they are not Eligible Notes (or if they initially are Eligible Notes and subsequently become ineligible due to a change in the criteria required from eligible liabilities available to meet the MREL or TLAC Requirements or MREL Requirements as the case may be), then a MREL or TLAC Disqualification Event or a MREL Disqualification Event as the case may be will occur and the Notes may be subject to early redemption subject to the Relevant Resolution Authority’s written permission and as a result, investors may lose part of or their entire investment.

Risks linked to the absence of events of default with respect to Eligible Notes issued by Societe Generale

For Eligible Notes, the Noteholders will not be able to accelerate the maturity of such Notes. Accordingly, if Societe Generale fails to meet any obligations under such Notes, investors will not have the right of acceleration of principal and accrued interests. Upon a payment default, the sole remedy available to Noteholders and, where applicable, Couponholders for recovery of amounts due in respect of any payment of principal or interest on such Notes will be the institution of judicial proceedings to enforce such payment. Notwithstanding the foregoing, the Issuer will not, by virtue of the institution of any such proceedings, be obliged to pay any sum or sums sooner than the initially scheduled due date but with a potential further deterioration of its financial situation until then. Therefore, the liquidity and market value of the Notes may be adversely affected and investors who sell Notes on the secondary market could lose all or part of their investment.

There is a significant degree of regulatory uncertainty regarding the potential occurrence of a MREL or TLAC Disqualification Event or a MREL Disqualification Event affecting Eligible Notes

A MREL or TLAC Disqualification Event could apply in respect of Eligible Non Structured Notes or a MREL Disqualification Event will apply in respect of Eligible Structured Notes, as further described in Condition 2 and Condition 6.2.5 of the German Law Notes).

The Capital Requirements Regulation II and the BRRD II (as defined below) give effect to the total loss-absorbing capacity (TLAC) Term Sheet published by Financial Stability Board (**FSB**) and modify the minimum requirements for own funds and eligible liabilities (**MREL**) and TLAC eligibility. Whilst there are a number of similarities between the MREL requirements and the FSB’s final principles regarding TLAC, there are certain differences. Societe Generale is currently unable to predict whether all or part of the Eligible Notes may cease to comply with the minimum requirements for own funds and eligible liabilities and/or total loss absorbing capacity requirements applicable to Societe Generale and/or the Societe Generale Group and thus be excluded fully or partially from the MREL or TLAC Requirements.

A change in the classification of the Notes under the MREL or TLAC Requirements, that was not reasonably foreseeable by Societe Generale at the Issue Date of the Notes, and that would be likely to result in or has resulted in the Notes being fully or partially excluded from the eligible liabilities available to meet the MREL or TLAC Requirements could result in a MREL or TLAC Disqualification Event (for Eligible Non Structured Notes) or a MREL Disqualification Event for (Eligible Structured Notes). The occurrence of such MREL or TLAC Disqualification Event or MREL Disqualification Event may have a material adverse effect on the value of the Eligible Notes and Noteholders may receive less than the full amount due under such Notes.

3.1.4 Notes subject to optional redemption by the Issuer

The Final Terms may specify that Notes can be subject to an early redemption which can be triggered at the Issuer's sole discretion either on certain predefined dates or at any time during the life of the Notes. The possibility of an early redemption of the Notes at the Issuer's discretion may limit the market value of such Note. Before or during each period during which the Issuer may elect to redeem the Notes, their market value will not rise substantially above their redemption price for Notes and the Noteholders will not benefit from the subsequent performance of the underlying(s).

Notwithstanding the above, for Eligible Notes, the redemption, purchase or cancellation prior their Maturity Date will be subject to the prior permission of the Relevant Resolution Authority.

3.1.5 Notes subject to automatic redemption

The Final Terms may specify that Notes can be subject to an automatic redemption for Notes if the level of the underlying(s) becomes higher than, equal to or below one or more predefined level(s) on either predefined dates or at any time during the life of the Notes. As a result, for those Notes when the level of the underlying(s) reaches the predefined level(s), the Noteholders will not benefit from the performance of the underlying(s) subsequent to such event.

3.1.6 Early redemption at the option of the Issuer following a Tax Event, Special Tax Event, Regulatory Event, an Administrator/Benchmark Event or Force Majeure Event or for a decrease in issuance size a MREL Disqualification Event or a MREL or TLAC Disqualification Event

The applicable Final Terms of Notes other than Eligible Notes, will indicate either that the Notes cannot be redeemed prior to their stated maturity (other than in specified instalments, if applicable, or for taxation reasons, regulatory reasons, an administrator/benchmark event, a force majeure event or following an Event of Default or in the event of an optional outstanding Notes trigger call or, in relation to Secured Notes only, following the occurrence of a Collateral Disruption Event) or that such Notes will be redeemable at the option of the relevant Issuer and/or the Noteholders upon giving not less than thirty nor more than forty five days' irrevocable notice (or such other notice period (if any) as indicated in the applicable Final Terms) to the Noteholders or the relevant Issuer, as the case may be, on a date or dates specified prior to such stated maturity and at a price or prices and on such terms as may be agreed between the Issuer and purchaser(s) as indicated in the applicable Final Terms.

Eligible Non Structured Notes which are issued by Societe Generale only, may only be early redeemed upon the occurrence of a Tax Event, Special Tax Event or a MREL or TLAC Disqualification Event, or at the option of the Issuer, as specified in the applicable Final Terms. Eligible Structured Notes which are issued by Societe Generale only, may also be redeemed for a Tax Event, a Special Tax Event and in addition, for regulatory reasons, an Administrator/Benchmark Event, a Force Majeure Event, a MREL Disqualification Event, upon a forced redemption or transfer event of Registered Notes or, if specified in the event that the outstanding aggregate nominal amount of the Notes falls below or equals 10% of the initial aggregate nominal amount.

This could result in Noteholders receiving an early redemption amount which may be lower than the amount initially invested (regardless of the level of capital protection at maturity, if any) and being redeemed earlier than they had anticipated and the Noteholders will not benefit from the performance of the underlying asset(s) subsequently to such event.

The early redemption of Eligible Notes may not occur if the Relevant Resolution Authority refuses to give its permission, and if so, the market value of the relevant Eligible Notes may be affected negatively, and investors may incur losses in respect of their investments in such Notes.

3.1.7 Risks related to adjustment, substitution or cancellation of the Notes

The Terms and Conditions of the Notes give the Calculation Agent a certain discretion to determine whether any event(s) affecting the Notes or the underlying(s) has occurred in accordance with such Terms and Conditions. The Calculation Agent also has certain discretion in order to determine the consequences thereof for the Notes, the underlying(s) or the hedging transactions, including determination of the price of the underlying(s) and the choice between (a) mechanisms to adjust or substitute the underlying(s), (b) the deduction of the increase in the cost of hedging of any amount due, (c) the monetisation and, consequently, the de-indexation of the formula of the Notes for all or part of the amounts due under the Notes on the underlying(s) and/or (d) the early redemption of the Notes by the Issuer, without any obligation to take into account the interest of the Noteholders. In the absence of manifest or proven error, these adjustments, substitutions or cancellation decisions will be binding upon the relevant Issuer, the Guarantor, the Agent and the Noteholders. Each of these measures imposed on the Notes may result in the total or partial loss of the amount invested (regardless of the level of capital protection of the Notes, if any).

3.1.8 Trading in the Notes and/or Underlyings may be suspended, interrupted or terminated

If the Notes are listed on one (or more) regulated or unregulated markets, the trading of such Notes may – depending on the rules applicable to such markets – be suspended or interrupted by the respective stock exchange or a competent regulatory authority upon the occurrence of a number of reasons, including violation of price limits, breach of statutory provisions, occurrence of operational problems of the stock exchange or generally if deemed required in order to secure a functioning market or to safeguard the interests of investors. Furthermore, trading in the Notes may be terminated, either upon decision of the stock exchange or a regulatory authority.

Where trading in an Underlying of the Notes is suspended, interrupted or terminated, trading in the respective Notes will usually also be suspended, interrupted or terminated and existing orders for the sale or purchase of such Notes will usually be cancelled. Investors should note that the Issuer has no influence on trading suspension

or interruptions and that investors in any event must bear the risks connected therewith. In particular, investors may not be able to sell their Notes where trading is suspended, interrupted or terminated, and the stock exchange quotations of such Notes may not adequately reflect the price of such Notes. All these risks would, if they materialise, have a material adverse effect on the value of the Notes and investors may therefore lose part or all of their investment in the Notes.

3.1.9 Risk of leveraged exposure

The redemption formula of certain Notes may embed a leverage factor increasing the exposure to the relevant underlying and will amplify both return and losses. While the use of leverage allows for potential multiples of a return (assuming a return is achieved) when the applicable underlying moves in the anticipated direction, it will conversely magnify losses when such underlying moves against expectations of investors. Prospective investors should note that Notes will involve a higher level of risk, and that whenever there are losses such losses may be higher than those of a similar security which is not leveraged. Investors should therefore only invest in such Notes if they fully understand the effects of the leverage that may be embedded in such Notes whose market value may be significantly more volatile than the market value of Notes that do not have this feature.

3.1.10 Risks relating to the Paying Agent

Any payments to Noteholders will be made by the Paying Agent on behalf of the Issuers. The Issuers shall transfer to the Paying Agent such amount as may be due under the Notes on or before each date on which such payment in respect of the Notes becomes due.

If the Paying Agent, while holding funds for payment to the Noteholders, is declared insolvent, the Noteholders may not receive all (or any part) of amounts due to them from the Paying Agent in which case the Noteholders will have to claim any payment directly to the Issuer.

3.1.11 Hedging and trading activity by the Issuers, the Guarantor and other members of the Group could potentially affect the value of the Notes

In the ordinary course of their business, whether or not they will engage in any secondary market making activities, the Issuers, the Guarantor and/or any other members of the Group may effect transactions for their own account or for the account of their customers and hold long or short positions in any underlying or reference asset(s), reference entities or obligors or related derivatives.

These transactions may affect the Issuers' hedging positions which could in turn impact the market value of the Notes and consequently investors may lose part or all of their investment in the Notes.

3.1.12 Exchange rate risks – Currency Unavailability

The relevant Issuer will pay principal and interest amounts on the Notes in the Relevant Currency. This presents certain risks relating to currency conversions if Noteholders' financial activities are denominated principally in a currency or currency unit (the **Investor's Currency**) other than the Relevant Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Relevant Currency or revaluation of the Investor's Currency) and the risk that authorities with jurisdiction over the Investor's Currency may impose or modify exchange controls. An appreciation in the value of the Investor's Currency relative to the Relevant Currency would decrease (1) the Investor's Currency-equivalent yield on the Notes, (2) the Investor's Currency equivalent value of the principal payable on the Notes and (3) the Investor's Currency equivalent market value of the Notes.

The Issuer may issue Dual Currency Notes where the amount of principal and/or interest payable are dependent upon movements in currency exchange rates or are payable in one or more currencies which may be different from the currency in which the Notes are denominated. Accordingly an investment in Dual Currency Notes may bear similar market risks to a direct foreign exchange investment and prospective investors should take advice accordingly.

Governments and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, Noteholders may receive less interest or principal than expected, or no interest or principal.

In addition, due to the imposition of these exchange controls, the Notes settlement currency's disuse or other circumstances beyond the control of the relevant Issuer or the Guarantor (as applicable) or pursuant to a unilateral decision taken by the clearing systems to no longer accept Notes settlement currency as a settlement currency for their operations, it might become impossible for the Issuer and/or the Guarantor to perform their obligations in the Notes settlement currency. In that context, pursuant to the General Terms and Conditions of the Notes, Societe Generale and/or SG Issuer upon notification to the Noteholders would have the right to perform its obligations without this constituting an event of default or without interest accruing on the Notes until the events making the currency unavailable ceases to exist or if earlier, the thirtieth calendar day following the scheduled due date for payment (which may be later than the initially scheduled maturity date of the Notes) without this constituting an event of default and without interest accruing on the Notes.

Moreover, the Issuer and/or the Guarantor may decide to replace the Notes settlement currency by euro or USD and deduct from the amounts paid to the noteholders any cost to the Issuer and/or the Guarantor of unwinding any hedging arrangements related to the Notes and any transaction, payment or other costs and expenses arising directly out of the occurrence of the above mentioned event or the related payment of the amounts due under the Notes following the occurrence of these events which may result in the Noteholders receiving less than the amounts they would have received in the absence of occurrence of such currency related events.

3.1.13 Partly-Paid Notes

The relevant Issuer may issue Notes where the issue price is payable in more than one part payment by the investor. Failure by the investor to pay any subsequent part payment could result in an investor losing some or all of his investment. In the event that investors purchase Partly-paid Notes on the secondary market prior to all the part payments being made and these Notes being fully paid up, such investors incur the risk to be required to pay such remaining part payments in addition to the price they paid to purchase these Notes.

3.1.14 Fixed/Floating Rate Notes

Fixed/Floating Rate Notes are Notes which bear interest at a rate that converts from a fixed rate to a floating rate, or from a floating rate to a fixed rate. Such a feature to convert the interest basis, and any conversion of the interest basis, may affect the market value of such Notes as the change of interest basis may result in a lower interest return for Noteholders. If the Issuer converts from a fixed rate to a floating rate in such circumstances, the spread on the floating rate may be less favourable than then prevailing spreads on comparable Floating Rate Notes tied to the same reference rate. In addition, the new floating rate at any time may be lower than the rates on other Notes. If the Issuer converts from a floating rate to a fixed rate in such circumstances, the fixed rate may be lower than then prevailing rates on those Notes and could affect the market value of an investment in the relevant Notes.

3.1.15 Notes issued at a substantial discount or premium

The market values of Notes issued at a substantial discount to or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. The longer the remaining term of such Notes, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.

3.1.16 Risks relating to Physical Delivery Notes

In the case of Notes which are redeemable by delivery of assets, if a Settlement Disruption Event occurs or exists on the due date for redemption of the Notes and prevents delivery of the asset, the Issuer shall, in lieu of delivering the Physical Delivery Amount, pay, in respect of each Note, the fair market value of the number of Underlying(s) (the **Fair Market Value**) to be delivered converted into the Specified Currency at the current exchange rate, if applicable. The Fair Market Value will be determined by the Calculation Agent on the basis of the market conditions on the first Business Day following the Delivery Period.

3.1.17 Risks relating to Notes referencing a benchmark

In accordance with the provisions of Condition 4 of the Terms and Condition of the Notes, the Rate of Interest in respect of the Floating Rate Notes may be determined by reference to Reference Rates that constitute "benchmarks" for the purposes of the EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable.

Interest rates and indices which are deemed to be "benchmarks" are the subject of national and international regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, to be subject to revised calculation methods, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Notes linked to or referencing such a "benchmark".

The EU Benchmarks Regulation, among other things, applies to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark within the EEA.

The UK Benchmarks Regulation, among other things, applies to the provision of benchmarks and the use of a benchmark within the UK. Notwithstanding the provisions of Condition 4.2.3.5 of the Terms and Conditions of the Notes, which seek to mitigate any adverse effects for the Noteholders, the EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable could have a material impact on any Notes linked to or referencing a "benchmark", in particular:

- an index that is a "benchmark" may not be permitted to be used by a supervised entity (including the Issuer) in certain ways if its administrator does not obtain authorisation or registration or, if based in a non-EU jurisdiction, the administrator is not recognised as equivalent or recognised or endorsed and the transitional provisions do not apply; and

- if the methodology or other terms of the "benchmark" could be changed in order to comply with the requirements of the EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable. Such changes could, among other things, have the effect of reducing or increasing the rate or level or otherwise affecting the volatility of the published rate or level of the "benchmark" and as a consequence,

Noteholders could lose part of their investment or receive less income than would have been the case without such change.

More broadly, any of the international or national reforms, or the general increased regulatory scrutiny of "benchmarks", could increase the costs and risks of administering or otherwise participating in the setting of a "benchmark" and complying with any such regulations or requirements.

Such factors may have the following effects on certain "benchmarks": (i) discourage market participants from continuing to administer or contribute to the "benchmark"; (ii) trigger changes in the rules or methodologies used in the "benchmark" or (iii) lead to the disappearance of the "benchmark".

Any of the above changes or any other consequential changes as a result of international or national reforms or other initiatives or investigations, could have a material adverse effect on the value of and return on any Notes linked to or referencing a "benchmark".

Investors should be aware that, if a benchmark were discontinued or otherwise unavailable, the rate of interest on Notes which are linked to or which reference such benchmark will be determined for the relevant period by the fall-back provisions applicable to such Notes – please refer to the risk factor entitled "The occurrence of an Index Event could have a material adverse effect on the value of and return on any such Notes linked to or referencing such "benchmarks" below). Depending on the manner in which a benchmark rate is to be determined under the Terms and Conditions, this may in certain circumstances (i) result in the application of a backward-looking, risk-free overnight rate, whereas the benchmark rate is expressed on the basis of a forward-looking term and includes a risk-element based on inter-bank lending or (ii) if Screen Rate Determination applies, result in the effective application of a fixed rate based on the rate which applied in the previous period when the benchmark was available. Any of the foregoing could have an adverse effect on the value or liquidity of, and return on, any Notes linked to or referencing a "benchmark".

Regulation (EU) 2019/2089 of the European Parliament and of the Council of 27 November 2019 has amended the existing provisions of the EU Benchmarks Regulation by extending the transitional provisions applicable to material benchmarks and third-country benchmarks until the end of 2021. The existing provisions of the EU Benchmarks Regulation were further amended by Regulation (EU) 2021/168 of the European Parliament and of the Council of 10 February 2021 published in the Official Journal of the European Union on 12 February 2021 (the **Amending Regulation**).

The Amending Regulation introduces a harmonised approach to deal with the cessation or wind-down of certain benchmarks by conferring the power to designate a statutory replacement for certain benchmarks on the European Commission, such replacement being limited to contracts and financial instruments. In addition, the transitional provisions applicable to third country benchmarks are have been further extended until the end of 2025 by Commission Delegated Regulation (EU) 2023/2222 of 14 July 2023.

Regulatory authorities and central banks have strongly encouraged the transition away from IBORs, such as LIBOR and EURIBOR, and have identified 'risk free rates' to replace such IBORs as primary benchmarks. This includes (amongst others) (i) for GBP LIBOR, the Sterling Overnight Index Average (**SONIA**), as the primary sterling interest rate benchmark, (ii) for USD LIBOR, the Secured Overnight Financing Rate (SOFR) as the primary US dollar interest rate benchmark, (iii) for EONIA and EURIBOR, a Euro Short-Term Rate (**€STR** or **EuroSTR**) as the euro risk-free rate, (iv) for CHF LIBOR, the Swiss Average Rate Overnight (**SARON**), as the primary Swiss franc interest rate benchmark and (v) for JPY LIBOR, the Tokyo Overnight Average Rate (**TONA**), as the primary Japanese yen interest rate benchmark. Similar initiatives have replaced the LIBOR rates in other currencies – i.e. Hong Kong Dollar (**HIBOR**), Australian dollar (**BBSW**) and Canadian dollar (**CDOR**) – to transition over to identified alternative risk free rates.

In case of occurrence of an Index Event the applicable floating rate of interest could have a material adverse effect on the value of and return on any such Notes linked to or referencing such "benchmarks" without any requirement that the consent of Noteholders be obtained.

Pursuant to the terms and conditions of the Notes, occurrence of certain events affecting the benchmarks (each an Index Event) such as loss of any authorisation, registration, recognition, endorsement, equivalence decision, approval or inclusion in any official register in respect of the Reference Rate or the administrator or sponsor of the Reference Rate, the permanent cessation of the Reference Rate or the loss of representativeness of the Reference Rate will trigger the application of certain fallbacks arrangements including if an inter-bank offered rate (such as EURIBOR) or other relevant reference rate (which could include, without limitation, any mid-swap rate) becomes unavailable, or if the Issuer, the Calculation Agent, any Paying Agent or any other party responsible for the calculation of the Rate of Interest (as specified in the applicable Final Terms) are no longer permitted lawfully to calculate interest on any Notes by reference to such benchmark under the EU Benchmarks Regulation and/or the UK Benchmarks Regulation, as applicable or otherwise.

Such fallback arrangements include the possibility that the rate of interest could be set by reference to a Replacement Rate with or without the application of an Adjustment Spread (which, if applied, could be positive or negative, and would be applied with a view to reducing or eliminating, to the fullest extent reasonably practicable in the circumstances, any economic prejudice or benefit (as applicable) to investors arising out of the replacement of the relevant benchmark) (both as defined in Condition 4.2.3.7 of the General Terms and Conditions of the Notes), and may include amendments to the Terms and Conditions of the Notes to ensure the proper operation of the successor or replacement benchmark, all as determined by the Rate Determination Agent or the Calculation Agent.

No consent or approval of the Noteholders shall be required in connection with effecting any successor rate or alternative rate (as applicable) or with any other related adjustments and/or amendments to the Terms and Conditions of the Notes (or any other document) which are made in order to effect any successor rate or alternative rate (as applicable).

Investors should note that, the Rate Determination Agent, or the Calculation Agent will have a certain discretion to determine the Replacement Reference Rate and as the case may be the Adjustment Spread in the circumstances described above. Any such adjustment could have unexpected commercial consequences and, due to the particular circumstances of each Noteholder, any such adjustment may not be favourable to such Noteholder.

The reform and eventual replacement of IBORs with risk-free rates may cause the relevant IBOR to perform differently than in the past, to disappear entirely, or have other consequences which cannot be predicted. These

risk-free rates have a different methodology and other important differences from the IBORs they will eventually replace. Any of these developments could have a material adverse effect on the value of and return on Notes linked to any such rates. Noteholders may therefore lose part or all of their investment in the Notes.

The market continues to develop in relation to risk free rates as reference rates for Floating Rate Notes.

The Terms and Conditions of the Notes allow Notes referencing inter alia SONIA, SOFR, the Euro short term rate (€STR), SARON, TONA to be issued. The market continues to develop in relation to risk free rates, as reference rates in the capital markets, and their adoption as alternative to the relevant interbank offered rates. The market or a significant part thereof may adopt an application of risk free rates that differs significantly from that set out in the Terms and Conditions and used in relation to Floating Rate Notes that reference a risk free rate issued under this Base Prospectus.

The nascent development of the use of these risk free rates as interest reference rate for bond markets, as well as continued development of risk free rates-based rates for such markets and of the market infrastructure for adopting such rates, could result in reduced liquidity or increased volatility or could otherwise affect the market price of the Notes. Interest on Notes which reference a risk free rate is only capable of being determined shortly prior to the relevant Interest Payment Date.

In addition, the Issuer or Calculation Agent has no control over the determination, calculation or publication of these risk-free rates. There can be no guarantee that they will not be discontinued or fundamentally altered in a manner that is materially adverse to the interests of Noteholders.

The mismatch between the adoption of such reference rates in the bond, loan and derivatives markets may impact any hedging or other financial arrangements which they may put in place in connection with any acquisition, holding or disposal of any Notes.

These risk-free rates may fail to gain market acceptance and any market of the Notes indexed on these rates may be illiquid and unpredictable. Investors should not rely on indicative or historical data concerning these risk free rates. The investors are exposed to some discretion of the Calculation Agent to determine the interest rate that will replace the benchmarks that will cease to be published or used and to calculate the amount of interest needed to calculate the amounts due under the Notes on the basis of the risk-free rates.

Investors will not know in advance the interest amount payable on Notes which is calculated by reference to the risk free rates

The Rate of Interest or Rate in respect of the Notes may be calculated by reference to risk free rates such as SONIA, SOFR, €STR, SARON or TONA overnight funding rates with Interest Periods longer than overnight and will be calculated on the basis of (a) the arithmetic mean of such rate over the relevant Interest Period, where such rate is fixed for a certain number of days prior to the end of such Interest Period or (b) a compounded risk free rate (i) in respect of the Interest Period, provided that the risk free rate used as the basis for calculation is that which was observed a specified number of days prior or (ii) in respect of a period that starts a specified number of days prior to the relevant Interest Period and ends the same specified number of days prior to the end of such Interest Period or (c) calculated by reference to the level of the risk free rate published by its Administrator or authorised distributors. As a consequence of these calculation methods, the amount of interest payable on each interest payment date will only be known a short period of time prior to the relevant interest payment date. Investors therefore will not know in advance the interest amount which will be payable on such Notes and there is a possibility that such amount could be lower than expected.

3.1.18 Risks relating to legal, tax and regulatory changes

The Terms and Conditions of the Notes (including any non-contractual obligations arising therefrom or connected therewith) are based on relevant laws in effect as at the date of this Base Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to such laws, or the official application or interpretation of such laws or administrative practices after the date of this Base Prospectus.

Legal, tax and regulatory changes could occur during the term of the Notes that may adversely affect the Notes, the underlying, related derivatives or the collateral assets in the case of Secured Notes. The regulatory environment is evolving, and changes in the regulation of any entities may adversely affect their value. Regulators and self-regulatory organisations and exchanges are authorised to take extraordinary actions in the event of market emergencies. The regulation of securities and derivatives transactions is an evolving area of law and is subject to modification by government and judicial action. The effect of any future regulatory change on the underlying, related derivatives or on the collateral assets could be material, including clearing and margin requirements for derivatives and consequently may adversely affect the value of the Notes. Investors may therefore lose part or all of their investment in the Notes.

3.1.19 Limited recourse against SG Issuer or Societe Generale Effekten GmbH

Each holder of a Notes issued by SG Issuer or by Societe Generale Effekten GmbH is deemed to have acknowledged and undertaken, on its acquisition of such Notes, that, in the event of a payment default by SG Issuer or by Societe Generale Effekten GmbH, as the case may be, of any amount due in respect of any Notes (such payment defaults, Defaulted Payments), such holder shall not institute any proceeding, judicial or otherwise, or otherwise assert a claim against SG Issuer or Societe Generale Effekten GmbH, as the case may be, to enforce such Defaulted Payments and waives all rights to institute such proceedings or make such claims in respect of such Defaulted Payments against the SG Issuer or Societe Generale Effekten GmbH.

Nevertheless, Noteholders will continue to be able to claim against the Guarantor in respect of any unpaid amount.

As a consequence, prospective investors in Notes issued by SG Issuer or by Societe Generale Effekten GmbH, as the case may be, should note that in the case of Defaulted Payments the entitlement of the Noteholders will be limited to the sums obtained by making a claim under the Guarantee, and the relevant provisions of the Guarantee.

3.1.20 Waiver of set-off

Pursuant to the General Terms and Conditions of the Notes, the Noteholders waive any right of or claims of set-off, netting, compensation, retention and counterclaim (and, for the avoidance of doubt, including all such rights, claims and liabilities arising under or in relation to any and all agreements or other instruments of any sort or any non-contractual obligations, in each case whether or not relating to the Notes) in relation to the Notes, to the extent permitted by applicable law. As a result, the Noteholders will not at any time be entitled to set-off the Issuer's obligations under the Notes against obligations owed by them to the Issuer.

3.1.21 Risks relating to Notes denominated in Renminbi (RMB)

RMB foreign exchange control risk

RMB is not completely freely convertible at present, and the conversion of RMB into other currencies is subject to exchange controls imposed by the PRC government. New PRC regulations may be promulgated or any existing RMB clearing and settlement arrangements may be terminated or amended in the future which may have the effect of restricting availability of RMB outside the PRC. The limited availability of RMB outside the PRC may affect the liquidity of Notes denominated in RMB.

The current size of RMB denominated financial assets outside the PRC is limited. The control of currency conversion and movements in RMB exchange rates may adversely affect RMB denominated assets which may in turn affect notes linked to such assets.

RMB currency risk

All payments of RMB under the Notes to the Noteholders will be made solely by transfer to a RMB bank account maintained in Hong Kong or a financial centre outside the PRC in which a bank clears and settles Renminbi (**RMB Settlement Centre**) in accordance with the prevailing rules and regulations and in accordance with the Terms and Conditions of the Notes. The Issuer cannot be required to make payment in relation to Notes denominated in RMB by any other means (including in any other currency or by transfer to a bank account in the PRC), unless a Renminbi Currency Event (i.e. if RMB becomes illiquid, or if any amount can no longer be converted into RMB or from RMB into another currency or if it becomes impossible to transfer amounts in RMB between accounts in Hong Kong or from within Hong Kong to accounts outside Hong Kong) is specified as being applicable in the applicable Final Terms.

In addition, there can be no assurance that the access to RMB for the purposes of making payments under the Notes or generally may remain or will not become restricted. If it becomes impossible to convert RMB from/to another freely convertible currency, or transfer RMB between accounts in Hong Kong (or any other RMB Settlement Centre), or to remit RMB into or out of the PRC, or the general RMB exchange market becomes illiquid, any payment of RMB under the Notes may be delayed or the Issuer may make such payments in another currency selected by the Issuer using an exchange rate determined by the Calculation Agent, or the Issuer may redeem the Notes by making payment in another currency.

RMB exchange rate risk

The value of RMB against other currencies fluctuates and is affected by changes in the PRC and international political and economic conditions and by many other factors. As a result, the value of any payments of RMB (in any applicable foreign currencies) may vary with the prevailing exchange rates in the marketplace. If the value of RMB depreciates against other currencies, the value of an investor's investment in such other currencies will decline. Depreciation of RMB against such currency could cause a decrease in the effective yield of the Notes denominated in RMB below their stated coupon rates and could result in a loss when the return on Notes denominated in RMB is translated into such currency. In addition, there may be tax consequences for investors as a result of any foreign currency gains resulting from any investment in Notes denominated in RMB.

RMB interest rate risk

Where applicable, the value of payments of RMB under the Notes may be susceptible to interest rate fluctuations, including Chinese RMB Repo Rates and/or the Shanghai Interbank Offered Rate (**SHIBOR**). The PRC government has gradually liberalised the regulation of interest rates in recent years. Further liberalisation may increase interest rate volatility. Furthermore, due to the foreign exchange control imposed by the applicable PRC laws and regulations and the prevailing market conditions, the RMB interest rate in the markets outside the PRC may significantly deviate from the RMB interest rate in the PRC.

Payments with respect to Notes denominated in RMB may be made only in the manner designated in such Notes

Noteholders may be required to provide certification and other information (including RMB account information) in order to be allowed to receive payments in RMB in accordance with the RMB clearing and settlement system for participating banks in Hong Kong. All payments to investors in respect of Notes denominated in RMB will be made solely (i) for so long as Notes denominated in RMB are represented by Global Notes or Registered Global Notes held with the Common Depository or Common Safekeeper, as the case may be, for Clearstream Banking S.A. and Euroclear Bank SA/NV or any alternative clearing system, by transfer to a RMB bank account maintained in Hong Kong or (ii) for so long as Notes denominated in RMB are in definitive form, by transfer to a RMB bank account maintained in Hong Kong in accordance with prevailing rules and regulations. Other than described in

the Terms and Conditions of the Notes, the Issuer cannot be required to make payment by any other means (including in any other currency or in bank notes, by cheque or draft or by transfer to a bank account in the PRC).

3.1.22 Meetings of Noteholders

The General Terms and Conditions of the Notes contain provisions for calling meetings (including by way of conference call or by use of a video conference platform) of Noteholders to consider matters affecting their interests generally (see Condition 16 (Meetings of Noteholders, of the German Law Notes). These provisions permit defined majorities to bind all Noteholders, including Noteholders who did not attend and vote at the relevant meeting, Noteholders who did not consent to the Written Resolutions and Noteholders who voted in a manner contrary to the majority. General meetings or written consultations may deliberate on any proposal relating to the modification of the conditions of the Notes subject, in the case of French Law Notes, to the limitations provided by French law. Only holders of French Law Notes will, in certain circumstances, be grouped for the defence of their common interests in a separate legal entity called "Masse" (as defined in Condition 16 (Meeting of Noteholders)). If the applicable Final Terms specify "No Masse", Noteholders will not be grouped in a masse having legal personality governed by the provisions of the French Code de commerce and will not be represented by a representative of the masse. While it is not possible to assess the likelihood that the Conditions will need to be amended during the term of the Notes by a meeting of the Noteholders, if a decision is adopted by a majority of Noteholders and such modifications impair or limit the rights of Noteholders, this may negatively affect the market value of the Notes and Noteholders may therefore lose part or all of their investment in the Notes, although the probability of such a decision being taken by Noteholders is considered to be low. In case of Eligible Notes (issued by Societe Generale only), the prior written permission of the relevant Resolution Authority will be needed to effect any modification decided by Noteholders.

3.2 Risks relating to the market of the Notes

3.2.1 Market value of the Notes

The trading market for the Notes may be volatile and may be adversely impacted by many events

The market for debt securities is influenced by the economic and market conditions, interest rates, currency exchange rates and inflation rates in Europe and other industrialised countries and areas. There can be no assurance that events in France, Europe or elsewhere will not cause market volatility or that such volatility will not adversely affect the price of Notes or that economic and market conditions will not have any other adverse effect.

Such factors may mean that the trading price of the Notes is below the Final Redemption Amount, and accordingly Noteholders, may receive an amount or an asset with a value significantly lower than the amount that they invested to purchase the Notes.

3.2.2 Risks relating to the secondary market of the Notes

If the Notes are subject to market making agreements, the aim is to ensure the liquidity of the Notes on the markets where they are traded, assuming normal market conditions and normally functioning IT systems. Certain exceptional market circumstances may adversely affect the liquidity of the Notes. Noteholders may not be able to sell their Notes easily or may have to sell them at a price that significantly affects the amount they earn. This may result in a partial or total loss of the amount invested.

Certain Notes have materially relevant liquidity risk. Certain exceptional market circumstances may adversely affect the liquidity of the Notes. Noteholders may not be able to sell their Notes easily or may have to sell them at a price that significantly affects the amount they earn. This may result in a partial or total loss of the amount invested.

There may be no market on which Notes may be traded, which may have a material adverse effect on the price at which such Notes can be resold and may result in the total or partial loss of the amount invested. The Notes may be completely illiquid and may not be able to be resold.

3.2.3 Reinvestment risks

The Notes may be redeemed or be subject to cancellation at a time when an investor generally would not be able to reinvest the proceeds at an expected yield as high as the return on the Notes being early redeemed or cancelled, as the case may be, and may only be able to do so at a significantly lower yield. Prospective investors should consider reinvestment risk in light of other investments available at that time.

3.2.4 The use of proceeds of the Notes identified as Positive Impact Notes in the Final Terms may not be suitable for the investment criteria of an investor

The Final Terms of the Notes (the **Positive Impact Notes**) may provide that an amount equivalent to the net proceeds of the issue will be applied to finance or refinance (via direct expenditures, via direct investments or via loans), in part or in full, activities, which serves to deliver a positive contribution to one or more of the three pillars of sustainable development (economic, environmental and social) (such activities the Eligible Activities), once any potential negative impacts and mitigation actions have been duly identified as defined in the sustainable and positive impact bond framework, as amended and supplemented from time to time (the **Framework**) which is available on the website of Societe Generale and as specified in the Final Terms.

Positive Impact Notes means any Note, Senior Preferred Notes issued by Société Générale, unsubordinated unsecured Notes or unsubordinated secured Notes issued by SG Issuer, in compliance with the Framework.

At the date of this Base Prospectus, the Framework inter alia (i) complies with the Green Bond Principles, Social Bond Principles and Sustainability Bond Guidelines published by the International Capital Markets Association, and (ii) aligns with the Principles for Positive Impact Finance published by the United Nations Environment Programme - Finance Initiative. It being specified that (i) such definition and guidelines may evolve from time to

time and/or (ii) the Issuer may decide to depart from such definition and guidelines, in which cases such information will be specified in the Framework.

There is currently no market consensus on what precise attributes are required for a particular project to be defined as “green”, “social” or “sustainable”. Further development of the EU taxonomy will take place via a new platform entitled the “Platform on Sustainable Finance” (the “**Platform**”), an advisory body managed by the European Commission, which enables dialogue and close cooperation among a wide range of stakeholders from the public and private sector. Its main purpose will be to advise the European Commission on the implementation and usability of the taxonomy of the European Union for sustainable activities and more broadly, on the sustainable finance framework in the European Union. The Platform commenced operation in 2023 and is expected to contribute to the development of the definition of “green”, “social”, “sustainable” or equivalently labelled projects within the framework of the Taxonomy Regulation (EU) No. 2020/852 dated 18 June 2020 which was adopted by the Council and the European Parliament and its relevant delegated acts. On 20 December 2023, Regulation (EU) 2023/2631 of the European Parliament and of the Council of 22 November 2023 on European Green Bonds and optional disclosures for bonds marketed as environmentally sustainable and for sustainability-linked bonds entered into force and constitutes a new voluntary European green bonds label for issuers of green use of proceeds bonds where the proceeds will be invested in economic activities aligned with the EU Taxonomy. It is not clear at this stage the impact which the European Green Bond standard may have on investor demand for, and pricing of, green use of proceeds bonds that do not meet such standard. It could reduce demand and liquidity for such bonds and their price.

In light of the continuing development of legal, regulatory and market conventions in the green, sustainable and positive social impact markets, there is a risk that Eligible Activities will not satisfy, whether in whole or in part, any future legislative or regulatory requirements, or any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply.

Similarly, (i) any failure by the Issuer to obtain and publish any reports, assessments, second party opinions and certifications, (ii) and/or the fact that the maturity of an Eligible Activity may not match the minimum duration of any Positive Impact Notes and/or (iii) the fact that during the life of the Positive Impact Notes, Eligible Activities may be removed from the pool of Eligible Activities to the extent required (e.g. in case of projects divestment or cancellation, in case of amortized or redeemed loans, or if an activity ceases to meet the eligibility criteria), in which case an amount equivalent to the net proceeds, in part or in full, may not be allocated to Eligible Activities and/or (iv) the withdrawal of any second party opinion or certification attesting that the Issuer is complying with any matters addressed by a second party opinion or certification may have an adverse effect on the value of such Positive Impact Notes and/or result in adverse consequences for certain investors that have portfolio mandates to invest in securities to be used for a particular purpose and that, as a result, would have to dispose of the Positive Impact Notes at their prevailing market value and Noteholders could lose part of their investment in such Positive Impact Notes.

For the avoidance of doubt, (i) any such failure or event will not (a) constitute an Event of Default or (b) give a right to the Noteholders to request the early redemption or acceleration of any Positive Impact Notes held by it or give rise to any other claim or right or (c) lead to an obligation of the Issuer to redeem the Positive Impact Notes or be a relevant factor for the Issuer in determining whether or not to exercise any optional redemption rights in respect of any Notes or (d) have any impact on the regulatory classification of the Notes under the Relevant Rules and/or MREL or TLAC Requirements and (ii) payments of principal and interest (as the case may be) on the relevant Positive Impact Notes will not depend on the performance of the relevant project, and such Notes will not have any preferred right against such assets.

Notes identified as Positive Impact Notes in the Final Terms remain subject to bail-in and other regulatory requirements

Positive Impact Notes will be subject to the Bail-in Tool and to write down and conversion powers, and in general to the powers that may be exercised by the Relevant Resolution Authority, to the same extent as any other Note having the same ranking which is not a Positive Impact Note. Eligible Notes under MREL or TLAC Requirements may also be Positive Impact Notes.

Likewise, Eligible Notes that are Positive Impact Notes will be fully subject to the application of MREL or TLAC Requirements and, as such, proceeds from Positive Impact Notes qualifying as Eligible Notes should cover all losses in the balance sheet of Societe Generale regardless of their “green”, “social” or “sustainable” label. Additionally, their labelling as Green Positive Impact Notes, Social Positive Impact Notes or Sustainability Positive Impact Notes (i) will not affect, as the case may be, the regulatory treatment of such Notes as Eligible Notes for the purposes of MREL or TLAC Requirements, and (ii) will not have any impact on their status as indicated in the Terms and Conditions of the Notes.

Any:

- (i) failure to hold in its books an amount in Positive Impact Finance assets equivalent to 100% of the outstanding nominal amount of the Notes or to apply an amount equivalent to the outstanding aggregate nominal amount of the Notes to finance and/or refinance, in part or in full, Eligible Activities;
- (ii) withdrawal of any opinion or certification or any opinion or certification being superseded by an opinion or certification stating that Societe Generale has not complied, in whole or in part, with any matters on which the original opinion or certification had opined or certified; and/or
- (iii) lack of Eligible Activities in which Societe Generale may invest; and/or
- (iv) event or circumstances resulting in the Positive Impact Notes no longer being listed or admitted to trading on any stock exchange or securities market,

will not constitute an event of default, does not affect the regulatory treatment of the Positive Impact Notes and may have a material adverse effect on the value of Positive Impact Notes and the value of any other securities which are intended to finance Eligible Activities and could also result in adverse consequences for certain investors with portfolio mandates to invest in securities to be used for a particular purpose. As a result, these investors may have to dispose of the Positive Impact Notes at their prevailing market value which may be less than the investors' initial investment in the Positive Impact Notes. Investors may therefore lose part or all of their investment.

3.2.5 Risk linked to a high rate of inflation

Investors' attention is drawn to the fact that in the event of a high rate of inflation between the time when they acquired the Notes and the time when they will receive any returns on the Notes, the amount (if any) payable to investors may not allow investors to purchase assets, goods or services that they would have been able to purchase at the time of their investment in the Notes. Consequently, prospective investors should consider the risk of high inflation rates before investing in the Notes.

4. RISK FACTORS RELATING TO STRUCTURED NOTES

4.1 Common risks relating to all Structured Notes

Risks relating to the Underlying(s) - gap risk

The amounts due under the Structured Notes are calculated by reference to the prices of the underlying assets Underlying(s) depending on the indexing formula for these amounts, it being specified that the past performance of an underlying asset Underlying does not in any way prejudice its future performance. Potential investors are exposed to the risk of losing all or a substantial part of the amount invested. The issuers or owners of assets underlying the Notes do not participate in the offer of the Notes and have no obligation to take into account the interests of the Noteholders, when they take decisions likely to affect the value of these assets.

The relevant level, value or price of one or more Underlying(s) may change suddenly and significantly during the trading day or at the opening of the market. Such change may be positive or negative and is known as the "Gap Risk". If the price of the Notes includes a premium, this will be calculated to take account of the cost to the Issuer or its Affiliates of unwinding its hedging positions in relation to the Notes on early redemption of the Notes and the Gap Risk associated with the relevant level, value or price of the Underlying(s). Noteholders will not receive a refund of this premium if an Automatic Early Redemption Event occurs, which could significantly reduce the return a Noteholder stands to receive on its investment.

Potential limitation in the benefit of the performance of the price of the Underlying(s)

If the applicable Final Terms provide that the exposure of the Notes to one or more Underlyings is limited or capped at a certain level or amount, the relevant Notes will not benefit from any upside in the value of any such Underlying(s) beyond such limit or cap. In this case, Noteholders will not receive as much from their investment as they would have done if they had invested directly in the Underlying(s) or in alternative Notes without such features. The likelihood of this occurring is dependent on the likelihood of the Underlying(s) performing such that the limit or cap affects the Notes.

Absence of rights in respect of the Underlying(s)

The Notes do not represent a claim against any Underlying (or any issuer, sponsor, manager or other connected person in respect of an Underlying) and Noteholders will not have any right of recourse under the Notes to any such Underlying (or any issuer, sponsor, manager or other connected person in respect of an Underlying). The Notes are not in any way sponsored, endorsed or promoted by any issuer, sponsor, manager or other connected person in respect of an Underlying and such entities have no obligation to take into account the consequences of their actions on any Noteholders and such consequences may have a negative impact on the value of the Notes. Noteholders may therefore lose part or all of their investment in the Notes. Investors in Physical Delivery Notes should also refer to "Risks relating to Physical Delivery Notes" above. In addition, Societe Generale, SG Issuer and/or any entity of the Societe Generale's group may take any action in respect of the Underlying(s) and the Noteholders will have no right or claim against Societe Generale, SG Issuer and/or any entity of the Societe Generale's group in respect of any amount that may be recovered by Societe Generale, SG Issuer and/or any entity of the Societe Generale's group in respect of such Underlying.

4.2 Risks relating to Structured Notes linked to an Index

The policies of the sponsor of an index as regards additions, deletions and substitutions of the assets underlying the index and the manner in which the index sponsor takes account of certain changes affecting such underlying assets may affect the value of the index.

The policies of an index sponsor with respect to the calculation of an index could also affect the value of the index. An index sponsor may discontinue or suspend calculation or dissemination of information relating to its index. Any such actions could affect the value of the Notes and Noteholders may therefore lose part or all of their investment in the Notes.

An index sponsor may at any time during the life of the Notes discontinue or suspend calculation or dissemination of information relating to its index. As a consequence investors in Index Linked Notes are exposed to the risk of discontinuance of the operational capacity and expertise of the Index Sponsor to ensure the calculation and maintenance of the index according to the methodology in force throughout the life of the Notes.

4.2.1 Risks relating to Structured Notes linked to an SGI Index

The composition of certain indices to which the Notes are linked, and the methodologies used in relation to these indices, can be determined and selected by Societe Generale or one of its related companies. In the choice of these methodologies, it can be expected that Societe Generale or the relevant related company of Societe Generale will take into account its own objectives and interests and / or those of the Group, and no guarantee can be given that the methodologies chosen will not be less favorable for the interests of investors than the methodologies used by other index sponsors in comparable circumstances.

If the hedging activities of Societe Generale or one of its related companies are disrupted in relation to a particular index, Societe Generale or the related company concerned may decide to end the calculations of this index, sooner than would another index sponsor in comparable circumstances. This could cause adjustments, de-indexation, substitution of the Index or the early redemption of the Notes.

4.2.2 Conflicts of interest in connection with proprietary indices

Societe Generale acts as sponsor of proprietary indices (SGI Indices). These indices are calculated by an external calculation agent in accordance with rules which describe the methodology for determining the composition and calculation of these proprietary indices (the Rules).

(i) With regard to proprietary indices composed in a discretionary basis by Societe Generale or an affiliate of Societe Generale to which Notes are linked, Societe Generale may face a conflict of interest between its obligations as issuer of these Notes and as a composer of these indices, given that the determination of the composition of these indices may have an impact on the value of the Notes. Consequently, investors may lose part or all of their investment in the Notes.

(ii) With regard to proprietary indices composed by a third party to which the Notes are linked, Societe Generale may face a conflict of interest between its obligations as issuer of these Notes and as a sponsor of these indices, insofar as it can modify or supplement the Rules, in accordance with the Rules, which may have an impact on the value of the Notes. Consequently, investors may lose part or all of their investment in the Notes.

(iii) With regard to proprietary indices composed by the application of a mathematical formula in a non-discretionary manner by Societe Generale or any third party, Societe Generale may face a conflict of interest between its obligations as issuer of these Notes and as a sponsor of these indices, insofar as it may modify, in accordance with the Rules, certain parameters (such as the funding spread) or provide the assessment of certain components, which may have an impact on the value of the Notes. Consequently, investors may lose part or all of their investment in the Notes.

4.3 Risks relating to Structured Notes linked to a Fund

4.3.1 Risks relating to underlying Funds

Some Funds may have little or no oversight and regulation, which can increase the likelihood of fraud and negligence on the part of Fund managers and / or investment advisers, their brokerage firm or the banks.

The Funds may include complex tax structures and deferrals in the distribution of important tax information.

The Funds on which Structured Notes may be indexed may not publish information on their transactions and portfolios.

The members of the Group may from time to time obtain information on specific Funds which may not be available to the general public in the ordinary course of their business, and not in relation to the offer of Notes (including as funds which are managed by managers part of Societe Generale group). As part of the ordinary course of their business, Group members may recommend, or decide not to recommend, certain specific Funds to their customers which may appear, currently or in the future, among the underlying Fund(s) used in the redemption formula of Structured Notes. All the positions that may be taken by the members of the Group in respect of the expected future performance of one or more funds (including in respect of funds which are managed by managers part of Societe Generale group) do not constitute an indication of the future performance of this/these funds.

4.3.2 Fund managers' investment strategies

The fund managers (including a manager that is part of Societe Generale group) do not participate in the offer of the Notes in any way and have no obligation to take into account the interest of the Noteholders in taking measures which could have an impact on the value of the shares or units of the underlying Fund(s) and therefore on the value of the Notes. Consequently, investors may lose part or all of their investment in the Notes.

The manager and / or investment advisor of the Underlying Fund who implements the investment strategy of the Fund may decide to invest in financial assets or instruments which themselves carry risk with a view to maximising profits, including by borrowing amounts that may represent more than 100% of the Fund's asset value. The manager and / or investment advisor may be all the more encouraged when his remuneration is indexed to the performance of the Fund. These elements can have a significant negative impact on the share / share of the underlying Fund and therefore on the value of the Notes. Consequently, investors may lose part or all of their investment in the Notes.

4.3.3 Fund managers and/or investment advisors of the underlying Fund(s)

The performance of underlying Fund(s) will depend to a considerable extent on the performance of the fund's managers and/or investment advisors of the Fund(s). Investors in Fund Linked Notes are therefore exposed to the risk of fraud and misrepresentation by unaffiliated fund managers or investment advisers. In addition, the fund managers and/or the investment advisors may be removed or replaced, the allocation of assets may vary from time to time and the various positions of the investments of the underlying Fund(s) may be economically offsetting, all of which may affect the performance of the underlying Fund(s).

The fund managers and/or the investment advisors may manage or advise other funds and/or accounts and may have financial and other incentives to favour such other funds and/or accounts over the underlying Fund(s). Also, the fund managers and/or the investment advisors may manage or advise for their own accounts and the accounts of their clients and may make recommendations or take positions similar or dissimilar to those of the underlying Fund(s) or which may compete with the underlying Fund(s).

4.3.4 Fees, deductions and charges will reduce any amounts due by the Issuer under the Notes

Fund fees and expenses will be deducted from the net asset value of the fund that may offset the Fund's trading profits, and hence reduce the value of the Fund units.

Accordingly, to the extent that any amount due by the Issuer under the Notes is linked to the net asset value of a fund, such amount payable to Noteholders will be less than it would have been absent these fees, deductions and charges.

4.3.5 The illiquidity of the underlying Fund's investments or the occurrence of certain extraordinary events may cause the determination of any amounts due by the relevant Issuer under the Notes to be reduced or delayed.

The intermediary amounts or final redemption amounts and other relevant amounts due to investors in Fund Linked Notes depend on the redemption proceeds of the units / shares of the Fund which will be paid by the underlying under a valid redemption order given by a hypothetical investor with effect as of the relevant valuation date. Substantial redemption orders on units/shares of an underlying Fund on a particular day (including by Societe Generale in liquidating the hedge relating to Structured Notes) could require such funds to liquidate positions more rapidly than would be otherwise desirable and have a negative impact on the market value of the Notes. Many funds have provisions whereby redemption requests are scaled back if the aggregate amount of such requests reaches a predetermined limit or where redemption orders can be delayed or suspended discretionarily.

Investments of the underlying Fund may also not be readily saleable on or shortly after a redemption order if they are illiquid.

If the proceeds from the redemption of the units or shares have not been paid by the underlying Fund on the initially Scheduled Maturity Date or on any early redemption date, the payment of any amount due by the relevant Issuer may be postponed after the maturity date up to a maximum period of two years or as specified in the Final Terms. If at the expiry of this period, the underlying Fund has not paid in full the redemption proceeds or the units or shares, the amount due under the Notes shall be determined by the Calculation Agent on the basis of what has actually been paid by the underlying Fund. The amount received by the investors in the Notes may be as low as zero.

4.3.6 Risks relating to master-feeder structure

The underlying Fund(s) may invest as a "feeder" fund of a "master" fund, alongside present and future additional investors or feeder funds. A "feeder" fund usually refers to a fund which pools the investment capital raised from investors and invests (or "feeds") such capital in an overarching umbrella fund (usually known as a "master" fund), which will be responsible for the investments in its portfolio.

The underlying Fund(s) may be materially affected by the actions of such other investors and feeder funds investing in the master fund, particularly if they have large investments in the master fund. If such other investors or feeder funds with a large investment in the master fund redeem from the master fund, illiquidity in certain securities or markets could make it difficult for the master fund to liquidate positions on favourable terms to effect such redemption, which could result in losses or a decrease in the net asset value of the unit/share of the master fund and hence in the market value of the Notes. In addition, to satisfy such redemptions, the sub-manager may need to liquidate the master fund's most liquid investments; leaving remaining investors (including the underlying Fund(s)) invested in more illiquid instruments. Such withdrawals may also leave the master fund with a less diversified pool of investments. This may increase the overall portfolio risk of the master fund, and, ultimately, the Notes. Conversely, the sub-manager of the master-fund may refuse a redemption request if it believes that such request, if fulfilled, would have a material adverse impact on the remaining investors of the master fund. This may negatively impact the liquidity of the master fund and, therefore, the performance of the underlying Fund(s) and the value of the Notes. Consequently, depending on the performance of the underlying Fund(s), Noteholders may lose part or all of their investment in the Notes.

4.4 Risks relating to Structured Notes linked to Credit

Noteholders are exposed, from a date specified in the applicable Final Terms which may be earlier than the date of their decision to invest in the Notes or the Issue Date, to events related to the creditworthiness of the Reference Entities. Upon the occurrence of such events, the amount paid or the value of the underlying assets received at maturity of the Notes (after deduction of the costs, break funding charges, loss of funding, tax and duties) determined by reference to the value of the debt of the Reference Entity may be less than the invested amount. In addition, interest-bearing Credit Linked Notes may cease to bear interest on or prior to the date of occurrence of such circumstances.

In certain circumstances the period between the date on which the existence of a Credit Event is established and valuation may be as long as 180 days. Therefore, settlement, or as the case may be, notice that no amount is due under the Credit Linked Notes, may occur several months after the relevant Credit Event on a date which may be much later than the Scheduled Maturity Date of the Notes.

4.4.1 Risk in respect of Tranche Notes

Tranche Notes are Notes which are exposed to the credit risk of a list of Reference Entities, starting from an attachment point and ending on a detachment point (both expressed in percentages by reference to such list of Reference Entities). The principal and interest payable to the Noteholder will start to be impacted when the sum of losses incurred on the list of Reference Entities will have reached the attachment point, and 100% of the principal and interest payable to the Noteholder will be fully lost when the sum of losses will have reached the detachment point. The sum of such losses is expressed in percentages by reference to the list of Reference Entities.

Compared to an investment in a basket of the same list of Reference Entities, investment in Tranche Notes creates a leverage effect on the credit risk exposure of the Reference Entities. When the trigger threshold for a credit event is reached, the principal and interest payable to the Noteholder will be impacted more strongly the closer the detachment point is and the faster the detachment point is reached. The leverage effect comes from the impact of each affected Reference Entity in Tranche Notes once the attachment point has been reached. The leverage effect depends on the width of the tranche (detachment point minus attachment point) and is much higher compared to the impact the same Reference Entity has in a basket of Reference Entities which are not Tranche Notes.

4.4.2 Risk in respect of Basket Notes

In respect of Basket Notes, the greater the number of Reference Entities subject to a Credit Event, the lower the amount due under the Notes will be. Conversely, the fewer the Reference Entities, the greater the impact of a Credit Event affecting one of them will be on the Final Redemption Amount.

4.4.3 Risk in respect of Credit Linked on bespoke Basket Notes

In respect of bespoke Basket Notes, the greater the number of Reference Entities subject to a Credit Event, the lower the Final Redemption Amount will be. Conversely, the fewer the Reference Entities, the greater the impact of a Credit Event affecting one of them will be on the Final Redemption Amount.

The concentration of the Reference Entities in any one industry or geographic region would subject the Notes to a greater degree of risk with respect to economic downturns relating to such industry or geographic region.

4.4.4 Increased risk in respect of First-to-Default Notes

First-to-Default Notes are Notes where the credit risk to the Noteholder is materialised on the occurrence of the first credit event of any Reference Entity in a basket of Reference Entities. Given that the credit risk to the Noteholder can materialise on the occurrence of the first credit event of any Reference Entity in the basket, the Noteholder can lose a significant part or all of its investment in the Notes as soon as one single Reference Entity in the basket becomes subject to a credit event. In addition, the more Reference Entities there are in the basket of Reference Entities, the more likely it is that a credit event can occur, and the greater the degree of risk that the Noteholder may lose its entire principal invested in the Notes.

4.4.5 Valuation and settlement in case of Credit Event

Under the terms of the Notes, where Societe Generale acts as Calculation Agent, it may, for the purposes of determining the amount due under the Credit Linked Notes under the Quotation Dealers Method or the Physical Delivery Amount (each as defined in Condition 2 of the Additional Terms and Conditions for Credit Linked Notes) following one or more Credit Event(s), select obligations with the lowest price of any obligations which meet the relevant criteria. This may affect the value of the Notes and Noteholders may therefore lose part or all of their initial investment in the Notes.

4.4.6 Floating recovery

Where Floating Recovery is specified in the related Final Terms, the terms of the Credit Linked Notes provide that the Calculation Agent will, depending on the election mentioned in the related Final Terms, determine the Final Value either by obtaining quotations from Quotation Dealers in respect of Selected Obligation(s) or by reference to Transaction Auction Settlement Terms (as defined in Condition 2 of the Additional Terms and Conditions for Credit Linked Notes). In this regard, investors should note that: (A) the Final Value as determined by reference to Transaction Auction Settlement Terms may be lower than the Final Value determined otherwise and will typically reduce the amount due under the Notes; and (B) (i) if Transaction Auction Settlement Terms are not published or (ii) a Fallback Settlement Event (as defined in Condition 2 of the Additional Terms and Conditions for Credit Linked Notes) occurs within a certain period and if it is not possible to obtain quotations from Quotation Dealers for the Selected Obligations (as defined in Condition 2 of the Additional Terms and Conditions for Credit Linked Notes) within a further period, the Final Value of the Selected Obligations will be deemed to be zero and therefore the amount due under the Notes will be equal to zero.

4.4.7 Fixed Recovery

Where Fixed Recovery is specified in the applicable Final Terms (which can be zero), the terms of Credit Linked Notes provide that the Final Value of a Reference Entity in respect of which a Credit Event Determination Date has occurred will be equal to the fixed percentage of the Specified Denomination specified in the applicable Final Terms (which can be zero).

This percentage may be lower than the recovery value, which would have been determined by reference to prices quoted by market participants or by using an auction valuation method in respect of such Reference Entity, or even be equal to zero.

4.4.8 Deferral of valuation and/or payments

In certain circumstances the period between the date on which the existence of a Credit Event is established and valuation may be as long as 180 days therefore, settlement, or as the case may be, notice that no amount is due under the Credit Linked Notes, may occur several months after the relevant Credit Event on a date which may be much later than the Scheduled Maturity Date of the Notes. If this occurs, this could adversely affect the value of the Notes and Noteholders may therefore lose part or all of their initial investment in the Notes. Also it is possible that no payment on the Notes may be due to the Noteholders on the Scheduled Maturity Date.

4.5 Risks relating to Structured Notes linked to a Bond

Noteholders are exposed as from a date specified in the Final Terms (which may be earlier than the date of their decision to invest in the Notes or the Issue Date) to events (specified in the Final Terms) relating to the creditworthiness of the relevant Bond Issuer. In the event of the occurrence of one of these events, the amount paid or the value of the Bond received, at maturity of the Notes (after deduction of costs, breakage cost funding charges, loss of funding, taxes and duties) determined by reference to the value of the Bond(s) may be less than the amount invested. In addition, interest-bearing Bond Linked Notes may cease to bear interest on or prior to the date of occurrence of such events. Investors' attention is drawn to the fact that no, or reduced amount of, Cash Redemption Amount may be due under the Bond Linked Notes and settlement (whether American Settlement or European Settlement is specified in the applicable Final Terms) may occur several months or years after the relevant Bond Event and on a date which may be later than the Scheduled Maturity Date of the Notes.

4.5.1 Ranking of the Bonds

Depending on the ranking, the obligations of the Bond Issuer and/or as the case may be the Bond Guarantor, may rank junior in priority of payment to unsubordinated creditors, to holders of subordinated obligations expressed by their terms to rank in priority to the Bonds and/or to creditors preferred by mandatory and/or overriding provisions of law. In the event of incomplete payment to creditors that rank senior to the ranking of the Bonds, the obligations of the Bond Issuer and/or the Bond Guarantor, as the case may be, in connection with the Bonds may be terminated. The ranking of the Bonds may accordingly increase the credit risk on the Bond Issuer and/or the Bond Guarantor as the case may be and as a result may increase the likelihood of the occurrence of a Bond Event(s). If a Bond Event(s) occurs, this could have an adverse effect on the value of and return on the Notes. Consequently, Noteholders may lose part or all of their investment in the Notes.

4.5.2 Risk in respect of Basket Bond Linked Notes

In respect of Basket Bond Linked Notes, the greater the number of Bonds in the basket subject to a Bond Event, the lower the amount due under the Notes will be. Conversely, the fewer the Bonds in the basket, the greater the impact of a Bond Event affecting one of them will be on the Final Redemption Amount. The concentration of the Bond Issuers in any one industry or geographic region would subject the Notes to a greater degree of risk with respect to economic downturns relating to such industry or geographic region.

4.5.3 Floating recovery

Where Floating Recovery is specified in the related Final Terms, the Calculation Agent will determine the Bond Final Value by obtaining quotations from Quotation Dealers in respect of the Bonds. In this regard, investors should note that: (i) the Bond Final Value as determined by the Calculation Agent may be lower than the Bonds' market value determined otherwise and will typically reduce the amount due under the Notes and (ii) such Bond Final Value cannot exceed 100% (unless otherwise specified in the applicable Final Terms) of the Bond Notional Amount irrespective of the Bonds market value determined otherwise.

4.5.4 Fixed Recovery

Where Fixed Recovery is specified in the related Final Terms, the Additional Terms and Conditions for Bond Linked Notes provide that the Bond Final Value of a Bond in respect of which a Bond Event Determination Date has occurred will be equal to the fixed percentage of the Specified Denomination specified in the related Final Terms.

This percentage may be lower than the recovery value, which would have been determined by reference to prices quoted by market participants or by using an auction valuation method in respect of such Bond or may even be equal to zero.

4.5.5 Exposure to a hypothetical transaction and Breakage Cost Amount

The Notes may include reference in the applicable Final Terms to:

(i) a hypothetical transaction deemed entered into between Societe Generale and a hypothetical counterparty, in order to hedge amounts (whether principal, interest or any other amounts) that would have been paid (x) on the Bond, in accordance with its original terms as at the Issue Date of the Notes, from (and including) the Issue Date of the Notes to (and including) the maturity date of the Bond (such amounts being deemed payable by Societe Generale or any of its affiliates to the hypothetical counterparty) and (y) on the Notes from (and including) the Issue Date of the Notes to (and including) the Scheduled Maturity Date (as defined in the applicable Final Terms) of the Notes (such amounts being deemed payable by the hypothetical counterparty to Societe Generale or any of its affiliates) (the "Reference Transaction"); and/or

(ii) a breakage cost amount, being an amount determined by the Calculation Agent equal to the fees, costs and expenses arising directly or indirectly, in connection with (i) terminating, unwinding, realizing or enforcing any repurchase transaction (if any) with the Bond as underlying asset, the purpose of which is to refinance the relevant Bond and (ii) entering into, trading or increasing any repurchase transaction (or any transaction with similar purposes) with the Collateral Assets (if any) as underlying asset, the purpose of which is to refinance the Collateral Assets (if any) (the "Breakage Cost Amount").

If a Bond Event Determination Date occurs in respect of a Bond, the amount payable to Noteholders (the “**Cash Redemption Amount**”), may be reduced, potentially down to zero, by the Reference Transaction Price (being the amount, as determined by the Calculation Agent, due in terminating, liquidating or re-establishing the Reference Transaction) and/or the Breakage Cost Amount. Noteholders may therefore lose all or part of their investment in the Bond Linked Notes.

4.5.6 Market Trigger Event

If Market Trigger Event is specified as applicable in the related Final Terms and the Calculation Agent determines that the secondary mid price of the Notes has fallen below a certain level for a certain period, the Notes may be early redeemed at an amount equal to the Market Trigger Event Bond Market Value (which may be as low as zero) minus the Market Trigger Event Reference Transaction Price (which may be a positive or negative amount) resulting in a redemption amount payable on the Notes as low as zero, this amount being subject to a floor value equal to zero. As a consequence, the investor may lose all or part of the invested amount.

4.6 Risks relating to Structured Notes linked to a Foreign Exchange Rate

The performance of Foreign Exchange Rates, currency units or units of account are dependent upon the supply and demand for currencies in the international foreign exchange markets, which are subject to economic factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, fiscal and monetary policy, government debt, currency convertibility and safety of making financial investments in the currency concerned, speculation and intervening measures taken by governments and central banks. Such measures include, without limitation, imposition of regulatory controls or taxes, issuance of a new currency to replace an existing currency, alteration of the exchange rate or exchange characteristics by devaluation or revaluation of a currency or imposition of exchange controls with respect to the exchange or transfer of a specified currency that would affect exchange rates as well as the availability of a specified currency. Any such measures could have a negative impact on the performance of a Foreign Exchange Rate and consequently the value of the Notes.

Currency exchange risks can be expected to heighten in periods of financial turmoil. In periods of financial turmoil, capital can move quickly out of regions that are perceived to be more vulnerable to the effects of a crisis with sudden and severely adverse consequences to the currencies of those regions as a result. In addition, governments around the world have recently made, and may be expected to continue to make, very significant interventions in their economies, and sometimes directly in their currencies. It is not possible to predict the effect of any future legal or regulatory action relating to a currency. Further interventions, other government actions or suspensions of actions, as well as other changes in government economic policy or other financial or economic events affecting the currency markets - including the replacement of entire currencies with new currencies – may cause Foreign Exchange Rates to fluctuate sharply in the future, which could have a negative impact on the value of the Notes.

4.7 Risks relating to Structured Notes linked to Preference Shares or Warrants

The market value of the Preference Shares or Warrants to which Notes may be linked will fluctuate up or down depending on the performance of the relevant underlying(s) or basis of reference to which the Preference Shares or Warrants are linked (the Preference Share Underlying or Warrant Underlying) such as equity, debt or derivative securities, indices, investments, funds, exchange traded funds, commodities, credit, baskets of securities or indices, currencies and portfolios. The composition of the relevant Preference Share Underlying(s)/Warrant Underlying(s) may be designed to change over time as a result of performance or other factors.

As a result, if the performance of the Preference Share Underlying/Warrant Underlying is negative, the value of the Preference Share Linked Notes/Warrant Linked Notes will be adversely affected. Purchasers of Preference Share Linked Notes/Warrant Linked Notes risk losing all or a part of their investment if the value of the Preference Shares/Warrants falls.

The basis and rate of taxation in respect of Preference Share Linked Notes/Warrant Linked Notes and reliefs depend on each investor's individual circumstances and could change at any time. This could have a negative impact on the return of the Preference Share Linked Notes/Warrant Linked Notes. In the event that the Preference Share Linked Notes/Warrant Linked Notes pay a coupon other than on redemption (such term including early or final redemption), prospective investors should be aware that such coupon will likely be subject to income tax.

4.8 Risks relating to Structured Notes linked to Inflation

The level of an Inflation Index may lag or otherwise not track the actual level of inflation in the relevant jurisdiction. Inflation Indices may not correlate with other indices and may not correlate perfectly with the rate of inflation observed by purchasers of the Inflation Linked Notes in such jurisdiction. The value of the Inflation Linked Notes which are linked to an Inflation Index may be based on a calculation made by reference to such Inflation Index for a month which is several months prior to the date of payment on the Inflation Linked Notes and therefore could be substantially different from the level of inflation at the time of the payment on the Inflation Linked Notes.

Upon the occurrence of certain events in relation to an Inflation Index, e.g., the Inflation Index level has not been published or is discontinued or is corrected or such Inflation Index is rebased or materially modified, then depending on the particular event, the Issuer may determine the level, substitute the original Inflation Index, adjust the terms and conditions of the Inflation Linked Notes or redeem the Inflation Linked Notes. Any such event and its consequences may have an adverse effect on the value of the Inflation Linked Notes.

4.9 Risks relating to Structured Notes linked to exchange traded product (ETP) and to exchange traded fund (ETF)

4.9.1 Exchange traded products and Exchange traded funds are subject to market trading risks

An ETP or an ETF faces numerous market trading risks, including but not limited to the potential lack of an active market, losses from trading in secondary markets, periods of high volatility, limited liquidity and disruption in the creation or redemption process of such ETP or such ETF. If any of these risks materialises, this may lead to the ETP or ETF shares trading at a premium or discount to its fair market value.

4.9.2 Action or non-performance by the ETP issuer, the sponsor of the ETP or the Calculation Agent or by the management company, fund administrator or sponsor of an ETF that may adversely affect the Notes

In case of an ETP Linked Notes, the ETP issuer and/or the sponsor of the ETP and in case of an ETF Linked Notes, the management company, fund administrator or sponsor of an ETF will have no involvement in the offer and sale of the Notes and will have no obligation to any purchaser of such Notes. In its day-to-day operations and its investment strategy, an ETP will rely on the ETP issuer, the sponsor of the ETP and the Calculation Agent and an ETF will rely on the fund advisor, the investment advisor, the management company and/or on third parties providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments used by such ETF to employ its investment strategy. The insolvency or non-performance of services of any such persons or institutions may expose an ETP or an ETF to lose value. Failure of procedures or systems, as well as human error or external events associated with, in case of an ETP, an ETP's issuer, sponsor or Calculation Agent and in case of an ETF, an ETF's management and/or administration, may reduce the value of the ETP or the ETF and affect the market value of the Notes.

4.9.3 Credit risk of the issuer of the ETP or the ETF

The value of the ETP Linked Notes or the ETF Linked Notes is dependent on the value of the ETPs or the ETFs, which will depend in part on the creditworthiness of the issuer of the ETPs or of the ETFs, which may vary over the term of the relevant Notes. A change in the creditworthiness of the issuer of the ETPs or of the ETFs may therefore affect the performance of the ETPs or ETFs respectively, and the value of Notes linked to ETPs or ETFs (as the case may be). Consequently, depending on the performance of such ETPs or ETFs, Noteholders may lose part or all of their investment in the ETP Linked Notes or the ETF Linked Notes.

4.9.4 Exposure to the ETP Underlying

ETPs usually aim to track the performance of an underlying financial instrument or basket thereof which may include, without limitation, listed equities, commodities, interest rates, foreign exchange rates, debt instruments, derivatives or any index thereof (the **ETP Underlying**). In addition, when compared to exchange traded funds, exposure to ETPs may involve a higher level of leverage and/or short exposures and/or more concentrated exposures.

Prospective investors should also consider the risk factors in respect of the risks involved in investing in ETPs including, without limitation, risks relating to the ETP Underlying and to the underlying economics of the ETPs. Consequently, prospective investors should review the ETP Documents and consult with their own professional advisers if they consider it necessary.

4.9.5 Risk that the ETP does not accurately track its underlyings' performance

Where the Notes are linked to an ETP, Noteholders are exposed to the performance of such ETP and not necessarily the performance of the ETP Underlying. Accordingly, investors who purchase Notes that are linked to an ETP may receive a different return than if such investors had directly invested into the ETP units or the ETP Underlyings.

4.9.6 Where the underlying asset is an exchange traded fund, there is a risk that such Exchange Traded Fund will not accurately track its underlying share or index

Where the Notes are linked to an exchange traded fund (an ETF) and the investment objective of such ETF is to track the performance of a share or an index, the investors of such Notes are exposed to the performance of such ETF rather than the underlying share or index such ETF tracks. For certain reasons, including to comply with certain tax and regulatory constraints, an ETF may not be able to track or replicate the constituent securities of the underlying share or index, which could give rise to a difference between the performance of the underlying share or index and such ETF. Accordingly, investors who purchase Notes that are linked to an ETF may receive a lower return than if such investors had invested in the share or the index underlying of such ETF directly.

4.9.7 Exchange traded funds not actively managed

If the investment objective of an ETF is to track the performance of an index or other asset, such ETF will invest in instruments included in, or that are representative of, the index or other asset it is tracking regardless of their investment merits. The performance of such ETF may be affected by general movements in market segments related to the index or other asset it is tracking, and such general movements in market segments may therefore affect the value of Notes linked to such ETF. Consequently, depending on the performance of such ETF, Noteholders may lose part or all of their investment in the ETF Linked Notes.

4.9.8 Exchange traded funds may engage in securities lending

Securities lending involves the risk that the ETF may lose money because the borrower of the ETF's loaned securities fails to return the securities in a timely manner or at all or that insufficient collateral has been posted in respect of such securities lending transaction. Securities lending carried out by the ETF may therefore affect its performance and the value of Notes linked to such ETF. Consequently, depending on the performance of such ETF, Noteholders may lose part or all of their investment in the ETF Linked Notes.

4.10 Risks relating to Structured Notes linked to a Reference Rate

The performance of the Reference Rates is dependent on economic factors, including inflation rates in the relevant countries, economic forecasts, international political factors, monetary and fiscal policy, government debt, speculation and actions taken by governments and central banks. Such factors could have a negative impact on

the performance of the Reference Rate and consequently on the value of the Notes. These factors can be expected to intensify in periods of financial turmoil.

4.11 Risks relating to Future Linked Notes

An investment in Future Linked Notes may bear similar market risks as a direct investment in the relevant future contract(s). The value of the future contract(s) underlying the Notes may vary over time and may increase or decrease by reference to a variety of factors which include the factors affecting the Future Underlier, as defined in the Additional Terms and Conditions for Future Linked Notes.

Futures contracts have a predetermined Expiry Date as defined in the Additional Terms and Conditions for Future Linked Notes. If the applicable Final Terms specify that Roll Adjustment applies, the Notes are valued by reference to futures contracts that have an Expiry Date that does not correspond to the term of the Notes, consequently the Calculation Agent will roll the Future Contracts (the Roll Adjustment) which means that the future contracts that is the closest to expiration (the Active Future Contract) will be replaced before it expires by a future contract that has an Expiry Date later in the future (the Next Active Future Contract).

On each Rolling Date, the price of the Active Future Contract may be lower than (respectively higher than) the price of the Next Active Future Contract if the future curve is in contango (respectively in backwardation). The Roll Adjustment may as a consequence have either a positive or negative impact on the value of the Notes. This may result in a partial or total loss of the investment in the Notes.

In addition to the effects of contango and backwardation, each "roll" may generate costs that will be taken by the Calculation Agent. These costs correspond to the expenses incurred in replacing the futures contract (transaction costs) and may have an adverse effect on the return of the Notes.

Prospective purchasers of Notes should be aware that in respect of Notes on futures contract that are rolled, the potential negative impact on the value of the Notes induced by the roll may lead to a performance of the Notes lower than the performance that would have been generated by Notes on the Future Underlier itself.

4.12 Risks relating to Portfolio Linked Notes

The market value of Portfolio Linked Notes will fluctuate up or down depending on the performance of the relevant components of the Portfolio such as equity, debt or derivative securities, indices, investments, funds, exchange traded funds, commodities, credit, baskets of securities or indices, currencies and portfolios. Such performance may be affected by changes in the value of the different components in the Portfolio to which the relevant issue of Portfolio Linked Notes relates. This value may be affected by (i) the economic, financial and political events in one or more jurisdictions, including the stock exchange(s) or quotation system(s) on which any component comprising the Portfolio may be traded, (ii) risks highlighted in section "Risk Factors" (Risk factors relating to Structured Notes) relating to individual types of underlyings which are included in the relevant Portfolio and (iii) other factors set out elsewhere in "Risk Factors". The composition of the Portfolio may be designed to change over time as a result of performance or other factors.

As a result, if the performance of the Portfolio is negative, the value of the Portfolio Linked Notes reference will be adversely affected. Purchasers of Portfolio Linked Notes risk losing all or a part of their investment if the value of the Portfolio falls.

Consequently, prospective investors, when considering investing in Portfolio Linked Notes, should also consider the risk factors linked to the Portfolio Components.

In addition, there may be correlation between price movements of one component and the price movements of another component of the Portfolio that may have a negative impact on the value of the Portfolio. As such, the value of Portfolio Linked Notes can therefore be volatile and this may result in Noteholders losing all, or a substantial part, of their investment.

In addition, Portfolio Linked Notes may be subject to a number of costs which would negatively impact the value of the Portfolio Linked Notes.

4.13 Risks relating to Portfolio Linked Notes

- Exposure to the Dynamic Portfolio

Holders of Notes linked to a Dynamic Portfolio are exposed to the risk of changes in the market value of such Notes resulting from both changes in the prices of the assets comprising the Dynamic Portfolio and recommendations for replacement or weighting of the assets comprising the Weighting Advisor's Portfolio. Consequently, depending on the performance of such Dynamic Portfolio and the market value of Notes linked to such Dynamic Portfolio, Noteholders may lose part or all of their investment in such Notes.

- Risks relating to the Weighting Advisor

Investors in Portfolio Linked Notes are exposed to the risk of the operational capacity and expertise of the Weighting Advisor to provide recommendations for replacement or weighting of the assets comprising the Portfolio throughout the life of the Notes.

Even though the Issuer and the Calculation Agent have designated the Weighting Advisor, the Weighting Advisor shall act in the exclusive interest of the Noteholders. Consequently, the Weighting Advisor is exclusively responsible to the Noteholders for any recommendations for replacement or weighting of the assets comprising the Portfolio or for any fraud, negligence or misrepresentation.

In addition, in the event of termination of the Weighting Advisory Agreement, investors are exposed to the risk of de-indexation to the Dynamic Portfolio and a monetary return, replacement of the Weighting Advisor or early redemption of the Notes. The occurrence of any of these events may impact on the market value of the Notes and may result in the total or partial loss of the amount invested in the Notes.

Noteholders should refer to the Weighting Advisory Agreement for more information.

- **Risk of conflict of interests between the Issuers, the Guarantor, the Calculation Agent and the Weighting Advisor and the Noteholders**

The Issuers, the Guarantor, the Calculation Agent or the Weighting Advisor, may engage in trading and other business activities relating to the Portfolio Components without regard to the Notes and that are not for the Noteholders' accounts or on behalf of the Noteholders. Such trading and other business activities could create conflicts between the interests of the Issuers, the Guarantor, the Calculation Agent and the Weighting Advisor on the one hand, and the interests of the Noteholders on the other hand, which could have an adverse impact on the value of and return on the Notes. Consequently, investors may lose part or all of their investment in the Notes.

5. ADDITIONAL RISKS ASSOCIATED WITH SECURED NOTES (ISSUED BY SG ISSUER ONLY)

5.1 Risks relating to the Collateral Assets

- There is no guarantee that the Collateral Assets will be sufficient to ensure that, following enforcement of a Pledge Agreement, the amounts available for distribution or the value of the Collateral Assets available to be delivered will be sufficient to pay all amounts due to Noteholders in respect of the relevant Secured Notes. In addition, Collateral Percentage may be lower than 100%. In that case, the Noteholders will still have a claim against the Guarantor for any unpaid amounts.
- The value of the assets used as collateral value can be 3 per cent lower than the required collateral value. This tolerance threshold amplifies most of the risks associated with Secured Notes described herein and in particular the risk that following enforcement of a Pledge Agreement, the amounts available for distribution or the value of the Collateral Assets available to be delivered by the Security Trustee or the Security Agent will not be sufficient to pay all amounts due to Noteholders in respect of the relevant Secured Notes. In that case, the Noteholders will still have a claim against the Guarantor for any unpaid amounts.

- Lack of diversification of the Collateral Assets

In case of low diversification of the Collateral Assets in a Collateral Pool pursuant to the Eligibility Criteria and the Collateral Rules, any depreciation in the value of such assets in the period between the most recent Collateral Test Date and the realisation of the Collateral Assets will have a proportionally larger impact on any shortfall as the amount recovered in respect of the Collateral Assets on their sale will be dependent on the then current market value of a smaller range of Collateral Assets.

- "Haircut" applied to Collateral Assets

A "Haircut" (if specified in the applicable Final Terms) means the percentage amount by which the value of each type of Collateral Asset contained in a Collateral Pool is discounted. One Haircut value may be specified in the applicable Final Terms per type or class of Collateral Asset. The level(s) of Haircut specified in the applicable Final Terms is intended to reflect the risk of a depreciation in the value of Collateral Assets in the period between the most recent Collateral Test Date and the date on which such Collateral Assets may be realised. Investors should note that the value of a Collateral Asset may change over time and the Haircut applied to the Collateral Assets may become outdated and may not provide suitable protection against a potential depreciation in value of the relevant Collateral Asset.

- Illiquid Collateral Assets

Certain of the Collateral Assets may be illiquid and not easily or not at all realisable in certain market circumstances or can only be sold at a discounted value. In that case, investors may receive the delivery of the Collateral Assets as if Physical Delivery of Collateral Assets were applicable in relation thereto.

5.2 Secured Note Acceleration Event and Enforcement of the security

A Noteholder is only entitled to send a Collateral Enforcement Notice if neither SG Issuer nor the Guarantor has paid all amounts due to such Noteholder within a period of 3 Collateral Business Days following the occurrence of the relevant Secured Note Acceleration Event.

During the 3 Collateral Business Days period there may be a depreciation in the value of the relevant Collateral Assets, thus reducing the amount available to satisfy the claims of Noteholders upon realisation of the Collateral Assets. In addition, the Collateral Assets may suffer a fall in value between the time at which the Collateral Enforcement Notice is sent by a Noteholder and the time at which the Collateral Assets are realised in full or, where Physical Delivery of Collateral Assets is applicable, delivered.

5.3 Frequency of Collateral Test Dates

The lower the frequency of the periodic Collateral Test Dates specified in the applicable Final Terms and hence the greater the period of time between each such periodic Collateral Test Date (or even in the absence of any Collateral Test Date) the more likely it is that upon enforcement of the relevant Pledge Agreement, the proceeds of enforcement that a Noteholder will receive or, where Physical Delivery of Collateral Assets is applicable, the value of the Collateral Assets delivered, will be less than the amounts due to Noteholders in respect of the relevant Secured Notes. This could have an adverse effect on the value of and return on the Notes. Consequently, Noteholders may lose part or all of their investment in the Notes.

5.4 Correlation between the value of the Collateral Assets and the creditworthiness of SG Issuer and the Guarantor

In the event that there is a positive correlation between the value of the Collateral Assets and the creditworthiness of SG Issuer and the Guarantor, the value of the Collateral Assets may vary in the same way as the creditworthiness of SG Issuer and the Guarantor.

A default by SG Issuer and/or the Guarantor in relation to their obligations under the Secured Notes may be associated with a fall in the value of Collateral Assets securing such Secured Notes.

The value of Collateral Assets required to be posted in the Collateral Pool will be based on the Secured Note Market Value which takes into account SG Issuer's and the Guarantor's creditworthiness whereas, following an Event of Default, the Market Value determined by the Calculation Agent (which determines the claim that a holder of Non-Waived Notes has on SG Issuer and/or the Guarantor), will not take into account SG Issuer's or the Guarantor's creditworthiness and will not decrease following such Event of Default. As a result, the claim of the Noteholders against the Issuer/Guarantor may be significantly higher than the value of the Collateral Assets.

5.5 Specific risk due to the difference between the aggregate nominal value of the Non-Waived-Notes and Market Value of the Notes following an Event of Default for the Nominal Value Type of Collateralisation

When pursuant to the applicable Final Terms the value of the Collateral Assets required to be posted in the Collateral Pool is based on the aggregate nominal value of the Secured Notes, the value of such Collateral Assets will not track the Market Value of the Secured Notes, consequently following the occurrence of an Event of Default, the value of Collateral Assets may be significantly lower than the claim of the Noteholders on SG Issuer and/or the Guarantor. Consequently, Noteholders may lose part or all of their investment in the Notes.

5.6 Subordination of Noteholders to payment of expenses and other payments

Following the enforcement of security, the rights of holders of Non-Waived Notes to be paid amounts from the proceeds of such enforcement and the realisation of the related Collateral Assets or, where Physical Delivery of Collateral Assets is applicable, to be delivered Collateral Assets, will be subordinated to and therefore rank behind claims relating to any amounts payable to Secured Parties ranking prior to the holders of Non-Waived Notes in accordance with the relevant order of priority and any rights of preference existing by operation of law.

5.7 Risk of a delay in the realisation of the Collateral Assets in the event of the insolvency of the Issuer, the Security Trustee, the Security Agent and/or the Collateral Custodian

In the event of the insolvency of SG Issuer, the Security Trustee, the Security Agent or the Collateral Custodian, the realisation of the Collateral Assets may be delayed either by the appointment of an insolvency administrator or other insolvency official in relation to SG Issuer, the Security Trustee, the Security Agent or the Collateral Custodian or by measures ordered by a competent court. Such delay could adversely affect the position of the Noteholders in the event of a depreciation in the value of the Collateral Assets during such period. Consequently, Noteholders may lose part or all of their investment in the Notes.

The Collateral Custodian, the Disposal Agent, the Substitute Paying Agent, the Security Trustee and the Security Agent are (unless otherwise specified in the applicable Final Terms) part of the same group and in the event of the insolvency of one entity it is possible that another entity may also be insolvent. Such circumstances may lead to a delay in the realisation of the Collateral Assets. However, the agreements in which such entities are nominated will contain provisions permitting their replacement.

5.8 Risk relating to Variable Collateralisation

When the Collateral Agent has the option to adjust the Collateralisation Percentage of Secured Notes with Variable Collateralisation during the terms of such Notes, the Collateralisation Percentage may be set as low as zero.

Investors in Secured Notes with Variable Collateralisation may be exposed partially or fully to the credit risk of the Guarantor. In particular, where the Collateralisation Percentage is at zero, investors may be fully exposed to credit risk on the Guarantor and their investment may not be collateralised by any Collateral Assets. Consequently, Noteholders may lose part or all of their investment in the Notes.

Investors should be aware that the secondary market value of Secured Notes with Variable Collateralisation is dependent on various factors, including the prevailing value of the implied funding spread of the Guarantor and the implied market cost of collateralisation. Investors seeking to have their Notes repurchased before maturity may be adversely affected by these factors and the repurchase price may be less than their original investment.

None of the Arranger or any Dealer accepts any liability in relation to the information contained or incorporated by reference in this Base Prospectus or any other information provided by either of the Issuers or the Guarantor in connection with the Programme or the Notes.

No person is or has been authorised by any of the Issuers, the Guarantor, the Arranger or any of the Dealers to give any information or to make any representation not contained in or not consistent with this Base Prospectus or any other information supplied in connection with the Programme or the Notes and, if given or made, such information or representation must not be relied upon as having been authorised by any of the Issuers, the Guarantor, the Arranger or any of the Dealers.

Neither this Base Prospectus nor any other information supplied in connection with the Programme or any Notes (a) is intended to provide the basis of any credit or other evaluation or (b) should be considered as a recommendation or a statement of opinion (or a report on either of those things) by any of the Issuers, the Guarantor, the Arranger or any of the Dealers that any recipient of this Base Prospectus or any other information supplied in connection with the Programme or any Notes should purchase any Notes. Each investor contemplating purchasing any Notes should make its own independent investigation of the financial condition and affairs, and its own appraisal of the creditworthiness, of the relevant Issuer and (if applicable) the Guarantor. Neither this Base Prospectus nor any other information supplied in connection with the Programme or the issue of any Notes constitutes an offer or invitation by or on behalf of any of the Issuers, the Guarantor, the Arranger or any of the Dealers to any person to subscribe for or to purchase any Notes.

Neither the delivery of this Base Prospectus nor the offering, sale or delivery of any Notes shall in any circumstances imply that the information contained herein concerning any of the Issuers or the Guarantor is correct at any time subsequent to the date hereof or that any other information supplied in connection with the Programme or the Notes is correct as of any time subsequent to the date indicated in the document containing the same. The Arranger or any of the Dealers expressly do not undertake to review the financial condition or affairs of any of the Issuers or the Guarantor during the life of the Programme or to advise any investor in the Notes of any information coming to their attention. Investors should review, *inter alia*, the most recently published documents incorporated by reference into this Base Prospectus when deciding whether or not to purchase any Notes.

IMPORTANT INFORMATION RELATING TO THE USE OF THIS BASE PROSPECTUS AND OFFER OF NOTES GENERALLY

This Base Prospectus does not constitute an offer to sell or the solicitation of an offer to buy any Notes in any jurisdiction to any person to whom it is unlawful to make the offer or solicitation in such jurisdiction. The distribution of this Base Prospectus and the offer or sale of Notes may be restricted by law in certain jurisdictions. None of the Issuers, the Guarantor, the Arranger or the Dealers represent that this Base Prospectus may be lawfully distributed, or that any Notes may be lawfully offered, in compliance with any applicable registration or other requirements in any such jurisdiction, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering.

In particular, unless specifically indicated to the contrary in the applicable Final Terms, no action has been taken by the Issuers, the Guarantor, the Arranger or the Dealers which is intended to permit a public offering of any Notes outside the European Economic Area (**EEA**) or distribution of this Base Prospectus in any jurisdiction where action for that purpose is required. Accordingly, no Notes may be offered or sold, directly or indirectly, and neither this Base Prospectus nor any advertisement or other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws and regulations. Persons into whose possession this Base Prospectus or any Note comes must inform themselves about, and observe, any such restrictions on the distribution of this Base Prospectus and the offering and sale of Notes (see "*Subscription, Sale and Transfer Restrictions*").

Legal investment considerations may restrict certain investments. The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each prospective investor should consult its legal advisers to determine whether and to what extent (1) Notes are legal investments for it, (2) Notes can be used as collateral for various types of borrowing and (3) other restrictions apply to its purchase or pledge of any Notes.

Financial institutions should consult their legal advisors or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules

INDEPENDENT REVIEW AND ADVICE

Each prospective investor in the Notes must determine, based on its own independent review and such professional advice as it deems appropriate under the circumstances, that its acquisition of the Notes is fully consistent with its financial needs, objectives and condition, complies and is fully consistent with all investment policies, guidelines and restrictions applicable to it and is a fit, proper and suitable investment for it, notwithstanding the clear and substantial risks inherent in investing in or holding the Notes.

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each prospective investor should consult its legal advisers to determine whether and to what extent (i) Notes are legal investments for it, (ii) Notes can be used as collateral for various types of borrowing and (iii) other restrictions apply to its purchase or pledge of any Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules. Prospective investors should also conduct such independent investigation and analysis regarding the Issuer, the Guarantor, the Notes and all other relevant market and economic factors as they deem appropriate to evaluate the merits and risks of an investment in Notes.

A prospective investor may not rely on the Issuers, the Guarantor, the Arranger or the Dealer(s) or any other member of the Group in connection with its determination as to the legality of its acquisition of the Notes or as to the other matters referred to above.

ASSESSMENT OF INVESTMENT SUITABILITY

Each prospective investor in the Notes must determine the suitability of that investment in light of its own financial circumstances and investment objectives, and only after careful consideration with its financial, legal, tax and other advisers. In particular, each prospective investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Notes, the merits and risks of investing in the Notes and the information contained or incorporated by reference in this Base Prospectus or any applicable Supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Notes and the impact the Notes will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Notes;
- (iv) understand thoroughly the terms of the Notes and be familiar with the behaviour of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

The Notes are complex financial instruments. Sophisticated institutional investors generally do not purchase complex financial instruments as stand-alone investments. They purchase complex financial instruments as a way to reduce risk or enhance yield with an understood, measured and appropriate addition of risk to their overall portfolios. A prospective investor should not invest in Notes which are complex financial instruments unless it has the expertise (either alone or with a financial adviser) to evaluate how the Notes will perform under changing conditions, the resulting effects on the value of the Notes and the impact this investment will have on the prospective investor's overall investment portfolio. Some Notes which are complex financial instruments may be redeemable at an amount below par in which case investors may lose the value of part or their entire investment.

NO LEGAL AND TAX ADVICE

Neither the Issuer nor the Guarantor are giving legal or tax advices to the investors. Each prospective investor should consult its own advisers as to legal, tax and related aspects relating to an investment in the Notes. A Noteholder's effective yield on the Notes may be diminished by the tax on that Noteholder of its investment in the Notes.

LEGALITY OF PURCHASE

None of the Issuer, the Agents or any of their respective affiliates has or assumes responsibility for the lawfulness of the acquisition of the Notes by a prospective purchaser of the Notes, whether under the laws of the jurisdiction of its incorporation or the jurisdiction in which it operates (if different), or for compliance by that prospective purchaser with any law, regulation or regulatory policy applicable to it.

TAXATION

Potential purchasers and sellers of the Notes should be aware that they may be required to pay taxes or documentary charges or duties in accordance with the laws and practices of the jurisdiction where the Notes are transferred or other jurisdictions. In some jurisdictions, no official statements of the tax authorities or court decisions may be available in relation to the tax treatment of financial instruments such as the Notes. The tax legislation of the investor's Member State and of the Issuer's country of incorporation may have an impact on the income received from the securities. Prospective investors are advised to ask for their own tax adviser's advice on their individual taxation with respect to the acquisition, holding, disposal and redemption in respect of Notes. Only such adviser is in a position to duly consider the specific situation of the prospective investor.

NO GROSS-UP RISK

If a withholding or deduction is required by the Tax Jurisdiction and if the applicable Final Terms specify that the Gross-up provision is not applicable, the Issuer will not be required to pay such additional amounts. In this case, neither the Issuer nor any paying agent nor any other person will be required to pay additional amounts to cover the amounts so withheld or deducted. Consequently, investors will receive such payments net of such withholding tax. In such case, investors should

note that they will take the risk of any applicable withholding tax and each Noteholder shall be responsible for supplying or filing (as applicable) in a timely manner any documentary evidence or forms as the investor may be entitled to and as may be required in order to obtain relief or reduction of taxes imposed by way of withholding or deduction on payments under the Notes.

In addition, neither the Issuer nor any paying agent nor any other person will be required to pay additional amounts to cover any amounts withheld or deducted on account of any United States withholding taxes, including taxes under FATCA and Section 871(m) as discussed below. Consequently, investors will receive payments net of any applicable United States withholding taxes.

Investors in the Notes will bear a credit risk on the Issuer of the Notes or, in the case of guaranteed Notes, on the Guarantor.

WITHHOLDING TAX IN FRANCE

The statements herein regarding withholding tax considerations in France are based on the laws in force in France as of the date of this Base Prospectus and are subject to any changes in law.

The following information is of a general nature only, is not intended to be, nor should it be construed to be, legal or tax advice, and does not purport to be a comprehensive description of all the French tax considerations which may be relevant to a decision to purchase, own or dispose of the Notes. The information contained herein is limited to French withholding

tax issues and prospective investors in the Notes should therefore consult their own professional advisers as to the effects of state, local or foreign laws, including French tax law, to which they may be subject and as to their tax position, as a result of the purchase, ownership and disposal of the Notes.

Withholding taxes on payments made by Societe Generale as Issuer outside of France

The following may be relevant to holders of Notes who do not concurrently hold shares in Societe Generale.

Payments of interest and other income made by Societe Generale with respect to the Notes will not be subject to the withholding tax provided by Article 125 A III of the French tax code (FTC) unless such payments are made outside France in a non-cooperative State or territory within the meaning of Article 238-0 A of the FTC (a Non-Cooperative State) other than those mentioned in 2° of 2 bis of the same Article 238-0 A. If such payments under the Notes are made outside France in a Non-Cooperative State other than those mentioned in 2° of 2 bis of Article 238-0 A of the FTC, a 75 per cent. withholding tax will be applicable (subject to certain exceptions and to the more favourable provisions of an applicable double tax treaty) by virtue of Article 125 A III of the FTC. The list of Non-Cooperative States is published by a ministerial executive order and is updated on annual basis.

Furthermore, according to Article 238 A of the FTC, interest and other income on such Notes will not be deductible from Societe Generale's taxable income if they are paid or accrued to persons domiciled or established in a Non-Cooperative State or paid to an account opened in the books of held with a financial institution established in such a Non-Cooperative State (the Deductibility Exclusion). Under certain conditions, any such non-deductible interest and other income may be recharacterised as constructive dividends pursuant to Articles 109 et seq. of the FTC, in which case such non-deductible interest and other income may be subject to the withholding tax provided by Article 119 bis 2 of the FTC at (i) a rate of (i) 12.8 per cent. for payments benefiting individuals who are not French tax residents, (ii) 30 per cent. (to be aligned with the standard corporate income tax rate set forth in the second paragraph of Article 219-I of the FCT FTC (i.e. 25 per cent) for payments benefiting legal persons who are not French tax residents or (iii) a rate of 75 per cent. for payments made outside France in certain Non-Cooperative States other than those mentioned in 2° of 2 bis of Article 238-0 A of the FTC (subject to certain exceptions and to the more favourable provisions of an applicable double tax treaty).

Notwithstanding the foregoing, neither the 75 per cent. withholding tax provided by Article 125 A III of the FTC nor the Deductibility Exclusion will apply in respect of a particular issue of Notes if the relevant Issuer Societe Generale can prove that the main purpose and effect of such issue of Notes was not that of allowing the payments of interest and other income to be made in a Non-Cooperative State (the Exception). Pursuant to the Bulletin Officiel des Finances Publiques-Impôts BOI-INT-DG-20-50-2014021130, no. 550150 and 990, BOI-RPPM-RCM-30-10INT-DG-20-40-2014021150-20, no. 70 and 80, and BOI-IR-DOMIC-10-20-20-60-20150320, no. 10290, an issue of

Notes will benefit from the Exception without the Issuer having to provide any proof of the purpose and effect of such issue of Notes, if such Notes are:

(i) offered by means of a public offer within the meaning of Article L. 411.-1 of the French monetary and financial code for which the publication of a prospectus is mandatory or pursuant to an equivalent offer in a State other than a Non-Cooperative State. For this purpose, an "equivalent offer" means any offer requiring the registration or submission of an offer document by or with a foreign securities market authority; and/or

(ii) admitted to trading on a French or foreign regulated market or multilateral securities trading system provided that such market or system is not located in a Non-Cooperative State, and the operation of such market is carried out by a market operator or an investment services provider or any other similar foreign entity, provided further that such market operator, investment services provider or entity is not located in a Non-Cooperative State; and/or

(iii) admitted, at the time of their issue, to the operations of a central depository or of a securities delivery and payment systems operator within the meaning of Article L. 561-2 of the French monetary and financial code, or of one or more similar foreign depositories or operators provided that such depository or operator is not located in a Non-Cooperative State.

Withholding taxes on payments made to individuals fiscally domiciled in France

Social contributions (CSG, CRDS and solidarity levy) are also levied by way of withholding at a global rate of 17.2 per cent. on such interest and other assimilated income received by individuals who are fiscally domiciled (*domiciliés fiscalement*) in France, subject to certain exceptions.

WITHHOLDING TAX IN LUXEMBOURG

The following information is of a general nature only, is not intended to be, nor should it be construed to be, legal or tax advice, and does not purport to be a comprehensive description of all the Luxembourg tax considerations which may be relevant to a decision to purchase, own or dispose of the Notes. The information contained herein is limited to Luxembourg withholding tax issues and prospective investors in the Notes should therefore consult their own professional advisers as to the effects of state, local or foreign laws, including Luxembourg tax law, to which they may be subject and as to their tax position, as a result of the purchase, ownership and disposal of the Notes.

Please be aware that the residence concept used under the respective headings below applies for Luxembourg income tax assessment purposes only. Any reference in the present herein to a withholding tax or a tax of a similar nature, or to any other concepts, refers to Luxembourg tax law and/or concepts only.

Non-resident holders of Notes issued by SG Issuer

Under Luxembourg general tax laws currently in force, there is no Luxembourg withholding tax on payments of principal, premium or interest made to non-resident holders of Notes, nor on accrued but unpaid interest in respect of the Notes, nor is any Luxembourg withholding tax payable upon redemption or repurchase of the Notes held by non-resident holders of the Notes.

Resident holders of Notes issued by SG Issuer

Under Luxembourg general tax laws currently in force and subject to the law of 23 December 2005, as amended (the **Relibi Law**), there is no Luxembourg withholding tax on payments of principal, premium or interest made to Luxembourg resident holders of Notes, nor on accrued but unpaid interest in respect of the Notes, nor is any Luxembourg withholding tax payable upon redemption or repurchase of the Notes held by Luxembourg resident holders of the Notes.

Under the Relibi Law payments of interest or similar income made or ascribed by a paying agent established in Luxembourg to an individual beneficial owner who is a resident of Luxembourg will be subject to a withholding tax of 20 %. Such withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management of his/her private wealth. Responsibility for the withholding of the tax will be assumed by the Luxembourg paying agent.

Payments of interest under the Notes coming within the scope of the Relibi Law will be subject to a withholding tax at a rate of 20%.

The Issuers are corporations organised under the laws of Luxembourg, Germany and France, respectively (each a **Relevant Jurisdiction**). All of the officers and directors named herein reside outside the United States and all or a substantial portion of the assets of the relevant Issuer and of such officers and directors are located outside the United States. As a result, it may not be possible for investors to effect service of process in connection with a cause of action under the laws of a jurisdiction outside the Relevant Jurisdiction upon the relevant Issuer or such persons, or to enforce judgments against them obtained in courts outside the Relevant Jurisdiction predicated upon civil liabilities of the relevant Issuer or such directors and officers under laws other than those of the Relevant Jurisdiction, including any judgment predicated upon United States federal securities laws.

IMPORTANT – EEA RETAIL INVESTORS

If the Final Terms in respect of any Notes states "Prohibition of Sales to EEA Retail Investors" as Applicable, the Notes, are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of Directive 2016/97/EU (as amended, the **Insurance Distribution Directive** or the **IDD**), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently no key information document required by Regulation (EU) No 1286/2014 (as amended, the **EU PRIIPs Regulation**) for offering or selling those Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling those Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the EU PRIIPs Regulation.

IMPORTANT – UK RETAIL INVESTORS

If the Final Terms in respect of any Notes states "Prohibition of Sales to UK Retail Investors" as Applicable, the Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the UK. For these purposes, a "retail investor" means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the EUWA; or (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement the IDD, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the **UK PRIIPs Regulation**) for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

Each Issuer maintains its financial books and records and prepares its financial statements in accordance with financial reporting standards which differ in certain important respects from generally accepted accounting principles in the United States (**U.S. GAAP**).

OTHER INFORMATION

Credit ratings

The Issuer may ask one or more independent credit rating agencies (established in the EU and registered under the Regulation (EC) No 1060/2009 of the European Parliament and of the Council dated 16 September 2009, as amended (the **CRA Regulation**) and such registration has not been withdrawn or suspended) to assign credit ratings to a Series of Notes. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

In general, European regulated investors should only base their investment decision on credit ratings assigned by credit rating agencies that are on the list of registered and certified rating agencies published by the European Securities and Markets Authority (**ESMA**) on its website in accordance with the CRA Regulation is not conclusive evidence of the status

of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated ESMA list.

Structured Notes Linked to SGI Indices

The roles of the various teams involved within Societe Generale in the design, maintenance and replication of indices have been strictly defined. The replication of any index is carried out in the same way by a single team within Societe Generale, whether for hedging of a product held by external investors or for positions held by Societe Generale acting as co-investors alongside external investors.

Eurosystem eligibility for New Global Notes and Registered Global Notes

New Global Notes and Registered Global Notes issued under the new safekeeping structure (NSS) may be issued with the intention that such Notes be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem, either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria as specified by the European Central Bank. However, there is no guarantee that such Notes will be recognised as eligible collateral, or that, even if recognised, the eligibility will continue during the life of the Notes. Any other Notes are not intended to be recognised as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem.

Notes where denominations involve integral multiples: Definitive Bearer Notes

In relation to any issue of English Law Bearer Notes which have denominations consisting of a minimum Specified Denomination plus one or more higher integral multiples of another smaller amount, it is possible that such Bearer Notes may be traded in amounts that are not integral multiples of such minimum Specified Denomination. In such a case a holder who, as a result of trading such amounts, holds an amount which is less than the minimum Specified Denomination in his account with the relevant clearing system at the relevant time may not receive a Definitive Bearer Note in respect of such holding (should Definitive Bearer Notes be printed) and would need to purchase a principal amount of Bearer Notes such that its holding amounts to a Specified Denomination.

If Definitive Bearer Notes are issued, holders should be aware that Definitive Bearer Notes which have a denomination that is not an integral multiple of the minimum Specified Denomination may be illiquid and difficult to trade.

Notes containing limited events of default

The Notes of a Series will only become immediately due and repayable following the occurrence of a limited number of events of default (in compliance with Condition "Events of Default" of the General Terms and Conditions).

Use of Proceeds related to Positive Impact Notes

The Final Terms of the Notes may provide that an amount equivalent to the net proceeds of the issue will be applied to finance or refinance, in part or in full, eligible activities (such activities the **Eligible Activities**), which serve to deliver a positive contribution to one or more of the three pillars of sustainable development (economic, environmental and social), once any potential negative impacts and mitigation actions have been duly identified as defined in the sustainable and positive impact bond framework, as amended and supplemented from time to time (the **Framework**) which is available on the website of Societe Generale (https://www.societegenerale.com/sites/default/files/documents/2021-11/20211104_Societe-Generale-Sustainable-and-Positive-Impact-Bond-Framework.pdf)¹ and as specified in the Final Terms (the **Positive Impact Notes**).

During the life of the Positive Impact Notes, Eligible Activities will be added to or removed from the pool of Eligible Activities to the extent required (e.g. in case of projects divestment or cancellation, in case of amortized or redeemed loans, or if an activity ceases to meet the eligibility criteria). In case of removal of Eligible Activities, Societe Generale commits, on a best effort basis, to reallocate immediately the equivalent amount of proceeds to other Eligible Activities.

Pending the full allocation of an amount equivalent to the net proceeds, the unallocated amount will be managed within Societe Generale's regular cash management operations.

Positive Impact Notes can be either green (the **Green Positive Impact Notes**), social (the **Social Positive Impact Notes**) or sustainability (the **Sustainability Positive Impact Notes**) if an amount equivalent to the net proceeds will be applied to finance or refinance Eligible Activities in the green categories, social categories or in both categories (in case of Sustainability Positive Impact Notes) pursuant to the Framework.

Green categories:

- Renewable energy;
- Green buildings;
- Low carbon transport;
- Water management and water treatment;
- Pollution prevention and control; and
- Circular economy.

Social categories:

- Employment generation and preservation through SME financing;
- Socioeconomic advancement and empowerment;
- Affordable housing;
- Access to education and professional training; and

¹ The information on the website does not form part of the prospectus and has not been scrutinised or approved by the competent authority.

- Access to healthcare.

These different categories are defined in the Framework which also further describes (i) the above-mentioned Eligible Activities by categories and (ii) the processes the Issuer will apply to evaluate and select the Eligible Activities, manage the net proceeds, report and use external reviews, inter alia in accordance with:

- the Green Bond Principles, Social Bond Principles and Sustainability Bond Guidelines published by the International Capital Markets Association; and

- the Principles for Positive Impact Finance published by the United Nations Environment Programme – Finance Initiative.

The Issuer has made the Framework available on its website: (https://www.societegenerale.com/sites/default/files/documents/2021-11/20211104_Societe-Generale-Sustainable-and-Positive-Impact-Bond-Framework.pdf).

A link to such Framework shall also be included in the Final Terms.

The Issuer has appointed ISS ESG to conduct an external review of its Framework and issue a second party opinion (**Second Party Opinion**) on the Framework's environmental and social credentials based among others on its alignment with the Principles for Positive Impact Finance published by the United Nations Environment Programme Finance Initiative, the Green Bond Principles, Social Bond Principles and Sustainability Bond Guidelines published by the International Capital Markets Association. The Second Party Opinion is available under section "Sustainable and Positive Impact Bond" of the Issuer's debt investors webpage: (<https://investors.societegenerale.com/fr/base-documentaire>).

The Issuer will publish an annually limited or reasonable assurance report provided by its external auditors or any other appointed independent third party until the maturity of the Positive Impact Notes, verifying:

- the allocated and unallocated amount equivalent to the net proceeds;

- the compliance of the Eligible Activities with the defined eligibility criteria of the relevant categories; and

- the review of the positive impact reporting.

For any verification of whether the Positive Impact Notes meet the eligibility criteria, or for the monitoring of the use of proceeds, Investors should refer to Société Générale's website (<https://investors.societegenerale.com/fr/base-documentaire>) or any relevant third party opinion.

Prospective investors should have regard to the information set out in the Final Terms and the Framework regarding such use of proceeds and must determine for themselves the relevance of such information for the purpose of any investment in such Positive Impact Notes together with any other investigation such investor deems necessary.

The definition (legal, regulatory or otherwise) of, and market consensus as to what constitutes or may be classified as, a "green", "social", "sustainable", or equivalently-labelled project or loan that may finance such project or loan, and the requirements of any such label are currently under development. Further development of the EU taxonomy will take place via a new "Platform on Sustainable Finance", which became operational in 2023 and is expected to contribute to the development of the definition of "green", "social", "sustainable" or equivalently labelled projects within the framework of the Taxonomy Regulation (EU) No. 2020/852 dated 18 June 2020 which was adopted by the Council and the European Parliament and its relevant delegated acts. In February 2022, the "Platform on Sustainable Finance" published a "Final Report on Social Taxonomy" which purports to determine whether and how a "social" taxonomy should be developed, albeit not committing the European Commission to the development of a "social" taxonomy. On 20 December 2023, Regulation (EU) 2023/2631 of the European Parliament and of the Council of 22 November 2023 on European Green Bonds and optional disclosures for bonds marketed as environmentally sustainable and for sustainability-linked bonds will enter into force and constitute a new voluntary European green bonds label for issuers of green use of proceeds bonds where the proceeds will be invested in economic activities aligned with the EU Taxonomy. It is not clear at this stage the impact which the European Green Bond standard may have on investor demand for, and pricing of, green use of proceeds bonds that do not meet such standard. It could reduce demand and liquidity for such bonds and their price.

The relevant Eligible Activity or the application of the net proceeds of any Positive Impact Notes in connection therewith (as described in section "Use of Proceeds" of the relevant Final Terms), might not be implemented in or substantially in such manner and/or in accordance with any timing schedule. Nor can it be certain that such Eligible Activity will be completed within any specified period or at all or with the results or outcome (whether or not related to the "sustainable and positive impact" aspect) originally expected or anticipated by the Issuer.

There can be no assurance by the Issuer, the Arranger or the Dealers that the use of proceeds of any Positive Impact Notes identified in the Final Terms will satisfy, whether in whole or in part, any future legislative or regulatory requirements, or any present or future investor expectations or requirements with respect to investment criteria or guidelines with which any investor or its investments are required to comply, whether pursuant to any present or future applicable law or regulation or under its own by-laws or other governing rules or investment portfolio mandates.

No assurance or representation is given as to the content, suitability or reliability for any purpose whatsoever in respect of (i) any second party opinion or certification of any other third party (whether or not solicited by the Issuer) that may be made available in connection with the issue of any Positive Impact Notes and in particular with any activity to fulfil any environmental, social and/or other criteria, (ii) any Framework to be published on the Issuer's website on or before the issue of any Positive Impact Notes or equivalently labelled Notes, or on (iii) any public reporting or (iv) any Positive Impact Notes or equivalently labelled Notes.

Currently, the providers of second party opinions and certifications are not subject to any specific regulatory or other regime or oversight. Any such second party opinion or certification is not, and should not be deemed to be, a recommendation by the Issuer or any other person to buy, sell or hold any such Positive Impact Notes.

The Arranger or the Dealers do not make any representation as to the suitability of the Positive Impact Notes to fulfil "positive impact" criteria required by prospective investors. The Arranger or the Dealers have not undertaken, and are not

responsible for, any assessment of the eligibility criteria, any verification of whether the Positive Impact Notes meet the eligibility criteria, or the monitoring of the use of proceeds. Investors should refer to Société Générale's website or any third-party opinion.

Investors should refer to the relevant Final Terms, the Issuer's website, the Issuer's Framework and the second-party opinion delivered in respect thereof, if any, and any public reporting by or on behalf of the Issuer in respect of the application of the proceeds of any Eligible Activities for further information. Any such Framework and/or second party opinion and/or public reporting will not form part of, nor be incorporated by reference in, this Base Prospectus.

Any opinion or certification of any other third party (whether or not solicited by the Issuer) which may be made available in connection with the issue of any Positive Impact Notes and in particular with any project to fulfil any environmental and/or other criteria may not be suitable or reliable for any purpose whatsoever. Currently, the providers of such opinions and certifications are not subject to any specific regulatory or other regime or oversight. Any such opinion or certification is not, nor should it be treated or considered as, a recommendation by the Issuer or any other person to buy, sell or hold any such Positive Impact Notes.

To the best of the knowledge and belief of each Issuer and the Guarantor (each having taken all reasonable care to ensure that such is the case) the information contained in, or incorporated by reference into, this Base Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information.

REGULATORY INFORMATION

French, Luxembourg and German law and European legislation regarding the resolution of financial institutions may require the write-down or conversion to equity of the Notes or other resolution measures if the Issuers are deemed to meet the conditions for resolution

Directive 2014/59/EU of the European Parliament and of the Council of the European Union dated 15 May 2014 establishing a framework for the recovery and resolution of credit institutions and investment firms (the **BRRD**) entered into force on 2 July 2014. The BRRD, as amended, has been implemented into Luxembourg law by, among others, the Luxembourg act dated 18 December 2015 on the failure of credit institutions and certain investment firms, as amended (the **BRR Act 2015**). Under the BRR Act 2015, the competent authority is the Luxembourg financial sector supervisory authority (*Commission de surveillance du secteur financier*, the **CSSF**) and the resolution authority is the CSSF acting as resolution council (*conseil de résolution*).

In April 2023, the EU Commission released a proposal to amend, in particular, the BRRD according to which senior preferred debt instruments (such as Senior Preferred Notes) would no longer rank *pari passu* with any non covered non preferred deposits of the Issuer; instead, senior preferred debt instruments (such as Senior Preferred Notes) would rank junior in right of payment to the claims of all depositors.

This proposal has been discussed and amended by the European Parliament and the European Council. Council and Parliament reached agreement on 6 December 2023 to make the proposal being final and applicable. If the final agreement was adopted as is, there may be an increased risk of an investor in Senior Preferred Notes losing all or some of their investment in the context of the exercise of the Bail-in Power. The final agreement may also lead to a rating downgrade for senior preferred debt instruments (such as Senior Preferred Notes). See “– Risks related to the market for the Notes and credit ratings – Credit ratings may not reflect all risks and may be lowered, suspended, withdrawn or not maintained” for further information on credit ratings.

Moreover, Regulation (EU) No. 806/2014 of the European Parliament and of the Council of 15 July 2014 establishing uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms in the framework of a Single Resolution Mechanism (**SRM**) and a Single Resolution Framework (the **SRM Regulation**) has established a centralised power of resolution entrusted to a Single Resolution Board (the **SRB**) in cooperation with the national resolution authorities.

Since November 2014, the European Central Bank (**ECB**) has taken over the prudential supervision of significant credit institutions in the member states of the Eurozone under the Single Supervisory Mechanism (**SSM**). In addition, the SRM has been put in place to ensure that the resolution of credit institutions and certain investment firms across the Eurozone is harmonised. As mentioned above, the SRM is managed by the SRB. Under Article 5(1) of the SRM Regulation, the SRM has been granted those responsibilities and powers granted to the EU Member States' resolution authorities under the BRRD for those credit institutions and certain investment firms subject to direct supervision by the ECB. The ability of the SRB to exercise these powers came into force at the beginning of 2016.

Societe Generale has been and continues to be, designated as a significant supervised entity for the purposes of Article 49(1) of Regulation (EU) No 468/2014 of the ECB of 16 April 2014 establishing the framework for cooperation within the SSM between the ECB and national competent authorities and with national designated authorities (the **SSM Regulation**) and is consequently subject to the direct supervision of the ECB in the context of the SSM. This means that Societe Generale, SG Issuer and Societe Generale Effekten GmbH (being covered by the consolidated prudential supervision of Societe Generale) are also subject to the SRM which came into force in 2015. The SRM Regulation mirrors the BRRD and, to a large part, refers to the BRRD so that the SRB is able to apply the same powers that would otherwise be available to the relevant national resolution authority.

The stated aim of the BRRD and the SRM Regulation is to provide for the establishment of an EU-wide framework for the recovery and resolution of credit institutions and certain investment firms. The regime provided for by the BRRD is, among other things, stated to be needed to provide the resolution authority designated by each EU Member State (the Resolution Authority) with a credible set of tools to intervene sufficiently early and quickly in an unsound or failing institution so as to ensure the continuity of the institution's critical financial and economic functions while minimising the impact of an institution's failure on the economy and financial system (including taxpayers' exposure to losses).

In accordance with the provisions of the SRM Regulation, when applicable, the SRB, has replaced the national resolution authorities designated under the BRRD with respect to all aspects relating to the decision-making process and the national resolution authorities designated under the BRRD continue to carry out activities relating to the implementation of resolution schemes adopted by the SRB. The provisions relating to the cooperation between the SRB and the national resolution authorities for the preparation of the institutions' resolution plans have applied since 1 January 2015 and the SRM has been fully operational since 1 January 2016.

The SRB is the Resolution Authority for the Issuers (Societe Generale, SG Issuer and Societe Generale Effekten GmbH). The powers provided to the Resolution Authority in the BRRD and the SRM Regulation include write-down/conversion powers to ensure that capital instruments (including subordinated debt instruments and/or Unsecured Notes (issued by SG Issuer)) and eligible liabilities (including senior debt instruments, such as the Senior Notes, if junior instruments prove insufficient to absorb all losses) absorb losses of the issuing institution that is subject to resolution in accordance with a set order of priority (the **Bail-in Power**). The conditions for resolution under the SRM Regulation are deemed to be met when: (i) the Resolution Authority determines that the institution is failing or is likely to fail, (ii) there is no reasonable prospect that any measure other than a resolution measure would prevent the failure within a reasonable timeframe, and (iii) a resolution measure is necessary for the achievement of the resolution objectives (in particular, ensuring the continuity of critical functions, avoiding a significant adverse effect on the financial system, protecting public funds by minimizing reliance on extraordinary public financial support, and protecting client funds and assets) and winding up of the institution under normal insolvency proceedings would not meet those resolution objectives to the same extent.

The Resolution Authority could also, independently of a resolution measure or in combination with a resolution measure, fully or partially write-down or convert capital instruments (including subordinated debt instruments such as the Unsecured Notes (issued by SG Issuer)) into equity when it determines that the institution or its group will no longer be viable unless such write-down or conversion power is exercised or when the institution requires extraordinary public financial support (except when extraordinary public financial support is provided in Article 10 of the SRM Regulation). The terms and conditions of the Notes contain provisions giving effect to the Bail-in Power in the context of resolution and write-down or conversion of capital instruments at the point of non-viability.

The Bail-in Power could result in the full (i.e., to zero) or partial write-down or conversion of the Notes into ordinary shares or other instruments of ownership, or the variation of the terms of the Notes (for example, the maturity and/or interest payable may be altered and/or a temporary suspension of payments may be ordered). Extraordinary public financial support should only be used as a last resort after having assessed and applied, to the maximum extent practicable, the resolution measures. No support will be available until a minimum amount of contribution to loss absorption and recapitalization of 8% of total liabilities including own funds has been made by shareholders, holders of capital instruments and other eligible liabilities through write-down, conversion or otherwise.

In addition to the Bail-in Power, the BRRD and the SRM Regulation provide the Resolution Authority with broader powers to implement other resolution measures with respect to institutions that meet the conditions for resolution, which may include (without limitation) the sale of the institution's business, the creation of a bridge institution, the separation of assets, the replacement or substitution of the institution as obligor in respect of debt instruments, modifications to the terms of debt instruments (including altering the maturity and/or the amount of interest payable and/or imposing a temporary suspension on payments), removing management, appointing an interim administrator, and discontinuing the listing and admission to trading of financial instruments.

Before taking a resolution measure, including implementing the Bail-in Power, or exercising the power to write down or convert relevant capital instruments, the Resolution Authority must ensure that a fair, prudent and realistic valuation of the assets and liabilities of the institution is carried out by a person independent from any public authority.

The BRRD, the BRR Act 2015 and the SRM Regulation however also state that, under exceptional circumstances, if the bail-in instrument is applied, the SRB, in cooperation with the CSSF, may completely or partially exclude certain liabilities from the application of the impairment or conversion powers under certain conditions.

Since 1 January 2016, EU credit institutions (such as Societe Generale) and certain investment firms have to meet, at all times, a minimum requirement for own funds and eligible liabilities (**MREL**) pursuant to Article 12 of the SRM Regulation. MREL, which is expressed as a percentage of the total liabilities and own funds of the institution, aims at preventing institutions from structuring their liabilities in a manner that impedes the effectiveness of the Bail-in Power in order to facilitate resolution.

The regime has evolved as a result of the changes adopted by the EU legislators. On 7 June 2019, as part of the contemplated amendments to the so-called EU Banking Package, the following legislative texts were published in the Official Journal of the EU 14 May 2019:

- Directive (EU) 2019/879 of the European Parliament and of the Council of 20 May 2019 amending the BRRD as regards the loss-absorbing and recapitalisation capacity of credit institutions and investment firms (**BRRD II**) and
- Regulation (EU) 2019/877 of the European Parliament and of the Council of 20 May 2019 amending the SRM Regulation as regards the loss-absorbing and recapitalisation capacity (**TLAC**) of credit institutions and investment firms (the **SRM II Regulation** and, together with the BRRD II, the **EU Banking Package Reforms**).

The EU Banking Package Reforms introduced, among other things, the TLAC standard as implemented by the Financial Stability Board's TLAC Term Sheet (**FSB TLAC Term Sheet**), by adapting, among other things, the existing regime relating to the specific MREL with aim of reducing risks in the banking sector and further reinforcing institutions' ability to withstand potential shocks will strengthen the banking union and reduce risks in the financial system.

The TLAC has been implemented in accordance with the FSB TLAC Term Sheet, which impose a level of Minimum TLAC that will be determined individually for each global systemically important bank (**G-SIB**), such as Societe Generale, in an amount at least equal to (i) 16%, plus applicable buffers, of risk weight assets since January 1, 2022 and 18%, plus applicable buffers, thereafter and (ii) 6% of the Basel III leverage ratio denominator since January 1, 2022 and 6.75% thereafter (each of which could be extended by additional firm-specific requirements).

Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms (the **CRR**), as amended notably by Regulation (EU) 2019/876 as regards the leverage ratio, the net stable funding ratio, requirements for own funds and eligible liabilities, counterparty credit risk, market risk, exposures to central counterparties, exposures to collective investment undertakings, large exposures, reporting and disclosure requirements (the **CRR II**) and Regulation (EU) 2022/2036 of the European Parliament and of the Council of 19 October 2022 amending Regulation (EU) No 575/2013 and Directive 2014/59/EU as regards the prudential treatment of global systemically important institutions with a multiple-point-of-entry resolution strategy and methods for the indirect subscription of instruments eligible for meeting the minimum requirement for own funds and eligible liabilities, EU G-SIBs, such as Societe Generale, have to comply with TLAC requirements, on top of the MREL requirements, since the entry into force of the CRR II. As such, G-SIBs, such as Societe Generale have to comply with both the TLAC and MREL requirements.

Consequently, the criteria for MREL-eligible liabilities have been closely aligned with the criteria for TLAC-eligible liabilities under CRR II, but subject to the complementary adjustments and requirements introduced in the BRRD II. In particular, certain debt instruments with an embedded derivative component, such as certain structured notes, will be eligible, subject to certain conditions, to meet MREL requirements to the extent that they have a fixed or increasing principal amount repayable at maturity that is known in advance with only an additional return permitted to be linked to that derivative component and dependent on the performance of a reference asset.

The level of capital and eligible liabilities required under MREL is set by the SRB for Societe Generale on an individual and/or consolidated basis based on certain criteria including systemic importance and may also be set for SG Issuer. Eligible liabilities may be senior or subordinated, provided, among other requirements, that they have a remaining term of at least one year and, they recognise contractually the Resolution Authority's power to write down or convert the liabilities governed by non-EU law.

The scope of liabilities used to meet MREL includes, in principle, all liabilities resulting from claims arising from ordinary unsecured creditors (non-subordinated liabilities) unless they do not meet specific eligibility criteria set out in BRRD, as amended notably by BRRD II. To enhance the resolvability of institutions and entities through an effective use of the bail-in tool, the SRB should be able to require that MREL be met with own funds and other subordinated liabilities, in particular where there are clear indications that bailed-in creditors are likely to bear losses in resolution that would exceed the losses that they would incur under normal insolvency proceedings. Moreover, the SRB should assess the need to require institutions and entities to meet the MREL with own funds and other subordinated liabilities where the amount of liabilities excluded from the application of the bail-in tool reaches a certain threshold within a class of liabilities that includes MREL-eligible liabilities. Any subordination of debt instruments requested by the SRB for the MREL shall be without prejudice to the possibility to partly meet the TLAC requirements with non-subordinated debt instruments in accordance with the CRR, as amended by the CRR II, as permitted by the TLAC standard. Specific requirements apply to resolution groups with assets above EUR 100 billion (top-tier banks, including Societe Generale).

The regulation and reform of “benchmarks”

Interest rates and indices which are deemed to be "benchmarks", (including the the euro interbank offered rate (**EURIBOR**)) are the subject of recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, to be subject to revised calculation method or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Notes linked to or referencing such a benchmark.

Regulation (EU) 2016/1011 (the **EU Benchmarks Regulation**) was published in the Official Journal of the EU on 29 June 2016 and has mostly applied, subject to certain transitional provisions, since 1 January 2018. The EU Benchmarks Regulation applies to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark within the EU. Among other things, it (i) requires benchmark administrators to be authorised or registered (or, if non-EU-based, to be subject to an equivalent regime or otherwise recognised or endorsed) and (ii) prevents certain uses by EU supervised entities (such as Societe Generale) of benchmarks of administrators that are not authorised or registered (or, if non-EU based, not deemed equivalent or recognised or endorsed). The applicable Final Terms will specify whether the benchmark is provided by an administrator included in the register referred to in Article 36 of the EU Benchmarks Regulation.

Each benchmark specified in this Base Prospectus is listed in the table below, with the name of the relevant Administrator providing such benchmark.

As at the date of this Base Prospectus, the relevant Administrator appears/ does not appear, as the case may be, on the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority pursuant to Article 36 of the EU Benchmarks Regulation, as specified in the table below.

If “Does not appear and exempted” is specified in the table below, it means that the relevant Administrator does not fall within the scope of the EU Benchmarks Regulation by virtue of Article 2 of that regulation.

If “Does not appear and non-exempted” is specified in the table below, it means that, as far as the Issuer is aware, the transitional provisions in Article 51 of the EU Benchmarks Regulation apply, such that the relevant Administrator is not currently required to obtain authorisation or registration.

Regulation (EU) 2019/2089 of the European Parliament and of the Council of 27 November 2019 has amended the existing provisions of the EU Benchmarks Regulation by extending the transitional provisions applicable to material benchmarks and third-country benchmarks until the end of 2021. The existing provisions of the EU Benchmarks Regulation have been further amended by the Amending Regulation.

The Amending Regulation introduced a harmonised approach to deal with the cessation or wind-down of certain benchmarks by conferring the power to designate a statutory replacement for certain benchmarks on the Commission, such replacement being limited to contracts and financial instruments. In addition, the transitional provisions applicable to third-country benchmarks have been further extended until the end of 2025 by Commission Delegated Regulation (EU) 2023/2222 of 14 July 2023.

Investors should consult their own independent advisers and make their own assessment about the potential risks imposed by EU Benchmarks Regulation or the UK Benchmarks Regulation, as the case may be, or any of the international or national reforms in making any investment decision with respect to any Notes linked to or referencing a benchmark

Financial Transactions Tax (FTT)

A proposal of the European Commission (the **Commission's Proposal**) was published on 14 February 2013 for a common FTT in Belgium, Germany, Greece, Estonia, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the **participating Member States**). However, Estonia has since stated that it will not participate.

The Commission's Proposal has very broad scope and could, if introduced, apply to certain dealings in Notes (including secondary market transactions) in certain circumstances. The issuance and subscription of Notes should however, be exempt.

Under the Commission's Proposal the FTT could apply in certain circumstances to persons both within and outside of the participating Member States and primarily to "financial institutions". However, Estonia has since stated that it will not participate. Generally, it would apply to certain dealings in Notes where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, "established" in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State.

However, the Commission's Proposal remains subject to negotiation between the participating Member States. It may therefore be altered prior to any implementation, the timing of which remains uncertain. Additional EU Member States may also decide to participate and/or participating Member States may decide to withdraw.

At the ECOFIN Council meeting of 14 June 2019, a state of play of the work on the FTT was presented on the basis of a note prepared by Germany on 7 June 2019 indicating a consensus among the participating Member States (excluding Estonia) to continue negotiations on the basis of a joint French-German proposal based on the French financial transactions tax model which in principle would only concern shares of listed companies whose head office is in a member state of the European Union. However, such proposal is still subject to change until a final approval.

Prospective holders of Notes are advised to seek their own professional advice in relation to the FTT.

Foreign Account Tax Compliance Act Withholding

Sections 1471 through 1474 of the U.S. Internal Revenue Code of 1986 (**FATCA**) may impose a 30% withholding tax on certain payments made to certain financial institutions and other entities that do not comply with the requirements under FATCA or to investors that fail to provide their broker or custodian with any information, forms, other documentation, or consents (**FATCA Documentation**) that may be necessary for the payments to be made free of FATCA withholding.

U.S. Withholding Tax under Section 871(m)

Section 871(m) of the U.S. Internal Revenue Code of 1986 and the U.S. Treasury regulations promulgated thereunder (**Section 871(m)**) generally impose a 30% withholding tax on dividend equivalent amounts paid or deemed paid to non-U.S. holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities. Section

871(m) provides certain exceptions to this withholding regime, in particular for instruments linked to certain broad-based indices that meet requirements set forth in the applicable Treasury regulations (such as an index, a **Qualified Index**). Additionally, IRS guidance excludes from the scope of Section 871(m) instruments issued prior to January 1, 2027 that are not "delta-one" instruments with respect to underlying securities that could pay U.S.-source dividends for U.S. federal income tax purposes (each an **Underlying Security**). If the Issuer has determined withholding under Section 871(m) applies, it will generally apply withholding at a 30% rate without regard to any applicable treaty rate(s) or any investor's individual tax situation.

Investors should consult their tax adviser regarding the potential application of Section 871(m) Regulations to their investment in the Notes.

The Dodd-Frank Wall Street Reform and Consumer Protection Act and the European Market Infrastructure Regulation

Passage of the Dodd-Frank Wall Street Reform and Consumer Protection Act (**Dodd-Frank Act**) in 2010 in the United States and of the European Regulation 648/2012, known as the European Market Infrastructure Regulation (**EMIR**) which entered into force on 16 August 2012 and took direct effect in the Member States of the European Union, has led to significant structural reforms affecting the financial services industry. The Dodd-Frank Act also contains prohibitions, commonly called, together with the implementing regulations, the **Volcker Rule**, which regulate the ability of banking entities to engage as principal in proprietary trading activities and sponsoring or investing in hedge, private equity or similar funds. Even though some modifications to the Volcker Rule implementing regulations took effect in 2020, the Volcker Rule continues to operate as a constraint on these activities.

Both Title VII (**Title VII**) of the Dodd-Frank Act and EMIR establish comprehensive regulatory regimes for a broad range of derivatives contracts including swaps, security-based swaps and mixed swaps (collectively referred to in this section as **Covered Swaps**).

In particular, under Title VII of the Dodd-Frank Act and under EMIR, swaps entered into by any Issuer may be required to be cleared through a central counterparty, executed on a trading venue, and subject to additional margin and capital, reporting and recordkeeping requirements that could result in additional regulatory burdens, costs and expenses (including extraordinary, non-recurring expenses of such Issuer).

In addition, the Dodd-Frank Act, amending the CEA, expanded the definition of a "commodity pool" to include any form of enterprise operated for the purpose of trading in commodity interests, including swaps. Each Issuer has imposed certain restrictions on sales in order to fall outside the scope of the CEA. In addition, if any Issuer were deemed to be a "commodity pool", it would be required to register as such with the CFTC and the National Futures Association and would have to comply with a number of reporting requirements that are designed to apply to traded commodity pools. It is presently unclear how such Issuer could comply with certain of these reporting requirements on an ongoing basis.

Investment Company Act

SG Issuer has not registered with the United States Securities and Exchange Commission (the **SEC**) as an investment company pursuant to the Investment Company Act. Investors in the Notes will not have the protections of the Investment Company Act.

If the SEC or a court of competent jurisdiction were to find that the relevant Issuer is required, but in violation of the Investment Company Act, has failed, to register as an investment company, possible consequences include, but are not limited to, the following: (i) the SEC could apply to a district court to enjoin the violation; (ii) investors in the relevant Issuer could sue such Issuer and recover any damages caused by the violation; and (iii) any contract to which the relevant Issuer is party that is made in, or whose performance involves, a violation of the Investment Company Act would be unenforceable by any party to the contract unless a court were to find that under the circumstances enforcement would produce a more equitable result than non-enforcement and would not be inconsistent with the purposes of the Investment Company Act.

Fundamental Review of the Trading Book regulation

For (A) an Index or SGI Index in respect of which the Index Components comprise, without limitation, one or more Equity Instruments that is a Fund Unit or an Underlying Index composed of Funds, ETF Share or an Underlying Index composed of ETF, (B) a Fund or (C) ETP or ETF, if from 1 January 2023, the related Fund, Fund Provider of the underlying Fund, ETF or ETF Service Provider of the underlying ETF, ETP or ETP Issuer of the underlying ETP, as the case may be, does not make publicly available information or does not provide information (either spontaneously or as required pursuant to laws and regulations or contractual arrangements) enabling Societe Generale or its affiliates to calculate its market risks as holder of Fund Units, ETF or ETP, as the case may be, to hedge the obligations of the Issuer under the Notes, as if it were holding directly the assets of the underlying Fund, ETF or ETP, as the case may be (the **FRTB Information**), Societe Generale or its affiliates may be subject to significantly higher capital requirements under the Fundamental Review of the Trading Book as implemented into French law.

IMPORTANT INFORMATION RELATING TO NON-EXEMPT OFFERS OF NOTES

Certain Tranches of Notes may be offered in circumstances where there is no exemption from the obligation under the Prospectus Regulation to publish a prospectus. Any such offer is referred to below as a Non-exempt Offer.

If, in the context of a Non-exempt Offer, you are offered Notes by any entity, you should check that such entity has been given consent to use this Base Prospectus for the purposes of making its offer before agreeing to purchase any Notes. The following entities have consent to use this Base Prospectus in connection with a Non-exempt Offer:

- any entity named as a Dealer in the applicable Final Terms;
- if the clause "*Type of Consent*" is stated as being "*Individual Consent*" in the applicable Final Terms:

(a) any financial intermediary specified in the applicable Final Terms as having been granted specific consent to use the Base Prospectus; or

(b) any financial intermediary named on the relevant website(s) of the Issuer as an Authorised Offeror in respect of the Non-exempt Offer (if that financial intermediary has been appointed after the date of the applicable Final Terms); and

(c) if the clause "*Type of Consent*" is stated as being "*General Consent*" in the applicable Final Terms, any financial intermediary authorised to make such offers under MiFID II who has published the Acceptance Statement (as defined below) on its website.

The consent referred to above only relates to Offer Periods (if any) occurring within 12 months from the date of this Base Prospectus.

The entities listed above have been given consent to use the Base Prospectus only during the Offer Period specified in the applicable Final Terms and only in the Non-exempt Offer Jurisdictions.

For Non-exempt Offers which will close after the validity of this Base Prospectus, investors should refer to the succeeding base prospectus which will be available on the relevant website(s) of the Issuer and the section "Ongoing Non-exempt Offers".

Other than as set out above, the Issuer has not authorised the making of any Non-exempt Offer by any person and the Issuer has not consented to the use of this Base Prospectus by any other person in connection with any Non-exempt Offer of Notes.

1. CONSENT GIVEN IN ACCORDANCE WITH ARTICLE 5(1) OF THE PROSPECTUS REGULATION

In the context of any offer of Notes that is not within an exemption from the requirement to publish a prospectus under the Prospectus Regulation (a **Non-exempt Offer**), each of the Issuer and the Guarantor accepts responsibility, in each Relevant State (as defined below) for which it has given its consent (each a **Non-exempt Offer Jurisdiction**) as specified below, for the content of the Base Prospectus under Article 11 of the Prospectus Regulation in relation to any person (an **Investor**) to whom any offer of Notes is made by any financial intermediary to whom it has given its consent to use the Base Prospectus (an **Authorised Offeror**), where the offer is made during the period for which that consent is given in a Non-exempt Offer Jurisdiction for which that consent was given and is in compliance with all other conditions attached to the giving of the consent. The consent and conditions attached to it are set out under "*Type of Consent*" and "*Conditions to Consent*" below.

None of the Issuers, the Guarantor or any relevant Dealer makes any representation as to the compliance by an Authorised Offeror with any applicable conduct of business rules or other applicable regulatory or securities law requirements in relation to any Non-exempt Offer and none of the Issuers, the Guarantor or any relevant Dealer has any responsibility or liability for the actions of that Authorised Offeror.

However, neither the relevant Issuer, the Guarantor nor the relevant Dealer has any responsibility for any of the actions of any Authorised Offeror, including the non-compliance by an Authorised Offeror with applicable conduct of business rules or other local regulatory requirements or other securities law requirements in relation to such offer.

Neither the relevant Issuer, the Guarantor nor the relevant Dealer authorises the use of the Base Prospectus in the case of a Non-exempt Offer of Notes in a Member State of the EEA (each, a Relevant State) other than a Non-exempt Offer Jurisdiction or in a Non-exempt Offer Jurisdiction but made by a financial intermediary to which the relevant Issuer has not given its consent. Such unauthorised Non-exempt Offers are not made by or on behalf the relevant Issuer the Guarantor or the relevant Dealer and neither the relevant Issuer, the Guarantor nor the relevant Dealer accepts any responsibility for the actions of any person making such offers and the related consequences.

Save as provided above, neither the relevant Issuer, the Guarantor nor the relevant Dealer authorises that any Non-exempt Offers of Notes may be made in circumstances which would require a relevant Issuer to publish a prospectus or a supplement to the Base Prospectus.

If, in the context of a Non-exempt Offer, a prospective Investor is offered Notes by a person which is not an Authorised Offeror, such prospective Investor should check with that person whether anyone is responsible for this Base Prospectus for the purposes of the relevant Non-exempt Offer and, if so, who that person is. If the prospective Investor is in any doubt about whether it can rely on this Base Prospectus and/or who is responsible for its contents it should take legal advice.

2. TYPE OF CONSENT

Subject to the conditions set out below under "*Conditions to Consent*" and if it is specified in the applicable Final Terms relating to any Tranche of Notes, the Issuer consents to the use of the Base Prospectus in relation to a Non-exempt Offer of such Notes during the offer period specified in the applicable Final Terms (the **Offer Period**).

The consent given by the Issuer may be an individual consent (an **Individual Consent**) and/or a general consent (a **General Consent**), each as further described below and as specified in the applicable Final Terms.

2.1 Individual Consent

If the clause "*Type of Consent*" is stated as being "*Individual Consent*" in the applicable Final Terms, it means that the Issuer consents to the use of the Base Prospectus in relation to a Non-exempt Offer of such Notes by the relevant Dealer and by:

- (i) any financial intermediary (other than a Dealer) acting in association with the Issuer named **Initial Authorised Offeror**, whose name and address are specified in the applicable Final Terms; and
- (ii) any financial intermediary acting in association with the Issuer, appointed after the date of the applicable Final Terms, and named **Additional Authorised Offeror**, whose name and address will be published on the relevant website(s) of the Issuer.

2.2 General Consent

If the clause "*Type of Consent*" is stated as being "*General Consent*" in the applicable Final Terms, it means that the Issuer consents to the use of the Base Prospectus in relation to a Non-exempt Offer of Notes to any financial intermediary acting independently from the Issuer named **General Authorised Offeror** which:

- (i) holds all necessary licences, consents, approvals and permissions required by any laws, rules, regulations and guidance (including from any regulatory body), applicable to the Non-exempt Offer of the Notes to be authorised to do such offer under the applicable laws of the Non-exempt Offer Jurisdiction, in particular the applicable law implementing MiFID II; and
- (ii) publishes on its website a statement that it makes such Non-exempt Offer of Notes based on the General Consent given by the Issuer for the use of the Base Prospectus (the **Acceptance Statement**):

"We, [insert legal name of financial intermediary], refer to the offer of [insert title of relevant Notes] (the **Notes**) described in the Final Terms dated [insert date] (the **Final Terms**) published by [Societe Generale/SG Issuer/ Societe Generale Effekten GmbH] (the **Issuer**) [and Societe Generale (the **Guarantor**)]. We hereby accept the offer by the Issuer [and the Guarantor] of its consent to our use of the Base Prospectus (as defined in the Final Terms) in connection with the offer of the [insert title of relevant Notes] in accordance with the terms and subject to the conditions to such consent, each as specified in the Base Prospectus, and confirm that we are using the Base Prospectus accordingly."

Through this publication on its website, the General Authorised Offeror commits itself to respect the following conditions:

- (a) it acts in accordance with all applicable laws, rules, regulations and guidance (including from any regulatory body applicable to the Non-exempt Offer of the Notes in the Non-exempt Offer Jurisdiction, in particular the applicable law implementing MiFID II (hereinafter the **Rules**) and makes sure that (i) any investment advice in the Notes by any person is appropriate, (ii) the information to prospective investors including the information relating to any expenses (and any commissions or benefits of any kind) received or paid by this General Authorised Offeror under the offer of the Notes is fully and clearly disclosed prior to the investment in the Notes;
- (b) it complies with the restrictions set out under the section "*Subscription, Sale and Transfer Restrictions*" in the Base Prospectus related to the Non-exempt Offer Jurisdiction as if it acted as a Dealer in the Non-exempt Offer Jurisdiction and considers the relevant manufacturer's target market assessment and distribution channels identified under the "MiFID II product governance" legend set out in the applicable Final Terms;
- (c) ensure that the existence of any fee (and any other commissions or benefits of any kind) or rebate received or paid by the relevant financial intermediary in relation to the offer or sale of the Notes does not violate the Rules, is fully and clearly disclosed to Noteholders or prospective investors prior to their investment in the Notes and to the extent required by the Rules, provides further information in respect thereof;
- (d) it complies with the Rules relating to anti-money laundering, anti-corruption, anti-bribery and "know your customer" rules (including, without limitation, taking appropriate steps, in compliance with such rules, to establish and document the identity of each prospective investor prior to initial investment in any Notes by the Investor), and will not permit any application for Notes in circumstances where the financial intermediary has any suspicions as to the source of the application monies; it retains investor identification records for at least the minimum period required under applicable Rules, and shall, if so requested, make such records available to the relevant Issuer and/or the relevant Dealer or directly to the competent authorities with

- jurisdiction over the relevant Issuer and/or the relevant Dealer in order to enable the relevant Issuer and/or the relevant Dealer to comply with anti-money laundering, anti-corruption, anti-bribery and "know your customer" rules applying to the relevant Issuer and/or the relevant Dealer, as the case may be;
- (e) co-operate with the Issuer and the relevant Dealer in providing relevant information (including, without limitation, documents and records maintained pursuant to paragraph (d) above) and such further assistance as reasonably requested upon written request from the Issuer or the relevant Dealer in each case, as soon as is reasonably practicable and, in any event, within any time frame set by any such regulator or regulatory process. For this purpose, relevant information that is available to or can be acquired by the relevant financial intermediary:
 - (i) in connection with any request or investigation by any regulator in relation to the Notes, the Issuer or the relevant Dealer; and/or
 - (ii) in connection with any complaints received by the Issuer and/or the relevant Dealer relating to the Issuer and/or the relevant Dealer or another Authorised Offeror including, without limitation, complaints as defined in rules published by any regulator of competent jurisdiction from time to time; and/or
 - (iii) which the Issuer or the relevant Dealer may reasonably require from time to time in relation to the Notes and/or as to allow the Issuer or the relevant Dealer fully to comply with its own legal, tax and regulatory requirements;

 - (g) it meets any other condition specified under the clause "*General Consent/Other conditions to consent*" in the applicable Final Terms;
 - (h) it commits itself to indemnify **the relevant issuer, the Guarantor (if applicable)**, the relevant Dealer, Societe Generale and each of its affiliates for any damage, loss, expense, claim, request or loss and fees (including reasonable fees from law firms) incurred by one of these entities because of, or in relation with, any failure by this General Authorised Offeror (or any of its sub-distributors) to respect any of these obligations above;
 - (i) it has knowledge of, and is committed to complying with the laws and regulations relating to anti-bribery, corruption and Influence Peddling, including any changes thereto, applicable to its activities
 - (j) neither it nor, to the best of its knowledge, any of the persons whom it controls (including its directors, officers or employees, each a "**Controlled Person**"), nor any sub-distributor or intermediary it has mandated for the purposes of its activities, has committed or will commit any Corrupt Act or Influence Peddling directly or indirectly, in each case to or for the use or benefit of, any person or any government official (which shall include any official, employee or representative of, or any other person acting in an official capacity for or on behalf of any government of any jurisdiction, any public international organisation, any political party, or any quasi-governmental body).

FINAL TERMS

In this section the expression “**necessary information**” means, in relation to any Tranche of Notes, the information necessary to enable investors to make an informed assessment of the assets and liabilities, financial position, profits and losses and prospects of the Issuers and the Guarantor and of the rights attaching to the Notes. In relation to the different types of Notes which may be issued under the Programme, the Issuers and the Guarantor have endeavoured to include in this Base Prospectus all of the necessary information except for information relating to the Notes which is not known at the date of this Base Prospectus and which can only be determined at the time of an individual issuance of a Tranche of Notes.

Any information relating to the Notes which is not included in this Base Prospectus and which is required in order to complete the necessary information in relation to a Tranche of Notes will, therefore, be contained in the applicable Final Terms.

For a Tranche of Notes which is the subject of Final Terms, those Final Terms will, for the purposes of such Tranche of Notes only, complete the Terms and Conditions of the Notes and must be read in conjunction with this Base Prospectus. The terms and conditions applicable to any particular Tranche of Notes which is the subject of Final Terms are the Terms and Conditions of the Notes as completed to the extent described in the applicable Final Terms.

SUPPLEMENT TO THE BASE PROSPECTUS

If at any time the Issuers shall be required to prepare a supplement to this Base Prospectus pursuant to Article 23 of the Prospectus Regulation, the Issuers will prepare and make available an appropriate supplement to this Base Prospectus or a further Base Prospectus which, in respect of any subsequent issue of Notes to be listed and admitted to trading on a regulated market shall constitute a supplement to the Base Prospectus (or a new Base Prospectus, as applicable) as required (for supplements) by Article 23 of the Prospectus Regulation and shall supply each Dealer with such number of copies of such supplement hereto or new Base Prospectus as such Dealer may reasonably request.

Each Issuer has given an undertaking to the Dealers that if at any time during the duration of the Programme there is a significant new factor, material mistake, material inaccuracy or omission relating to information contained in this Base Prospectus which is capable of affecting the assessment of any Notes and whose inclusion in or removal from this Base Prospectus is necessary, for the purpose of allowing an investor to make an informed assessment of the assets and liabilities, financial position, profits and losses and prospects of the Issuer, the Group and the rights attaching to the Notes, the Issuer shall prepare a supplement to this Base Prospectus or publish a replacement Base Prospectus for use in connection with any subsequent offering of the Notes, and shall supply each Dealer with such number of copies of such supplement hereto as such Dealer may reasonably request.

Following the publication of this Base Prospectus, the Issuers and the Guarantor will, in the event of any significant new factor, material mistake or material inaccuracy relating to information included in this Base Prospectus which is capable of affecting the assessment of any Notes, prepare a supplement to this Base Prospectus (a **Supplement**) in accordance with Article 23 of the Prospectus Regulation or publish a new prospectus for use in connection with any subsequent issue of Notes. Such Supplement as prepared will have to be approved by the CSSF. Statements contained in any such Supplement (or contained in any document incorporated by reference therein) shall, to the extent applicable (whether expressly, by implication or otherwise), be deemed to modify or supersede statements contained in this Base Prospectus or in a document which is incorporated by reference in this Base Prospectus. Any statement so modified or superseded shall not, except as so modified or superseded, constitute a part of this Base Prospectus.

In the case of Notes subject to a Non-exempt Offer to the public, in accordance with Article 23(2) bis of the Prospectus Regulation, investors who have already agreed to purchase or subscribe for Notes before any Supplement is published have the right, exercisable within two working days after the publication of this Supplement, to withdraw their acceptances.

If Definitive Bearer SIS Notes are delivered, the relevant Permanent Global SIS Note will immediately be cancelled by the Principal Swiss Paying Agent (in case of Bearer SIS Notes not listed on SIX Swiss Exchange) or the relevant lead manager (in case of Bearer SIS Notes that are listed on SIX Swiss Exchange), as the case may be, and the Definitive Bearer SIS notes shall be delivered to the relevant holders against cancellation of the relevant Bearer SIS Notes in such holders' securities accounts.

Bearer SIS Notes and any non-contractual obligations arising out of or in connection with the Notes will be governed by German law.

4. CERTIFICATION AS TO NON-U.S. BENEFICIAL OWNERSHIP

4.1 German Law Bearer Notes

Whilst any Bearer Note (except any Bearer SIS Notes, which are represented by Permanent Global SIS Notes as described above) is represented by a Temporary Global Note, payments of principal, interest (if any) and any other amounts payable in respect of the Notes, due prior to the Exchange Date (as defined below) will be made (against presentation of the Temporary Global Note if the Temporary Global Note is not intended to be issued in NGN form) only to the extent that certification (in a form to be provided) to the effect that the beneficial owners of interests in such Note are not U.S. Persons or persons who have purchased for resale to any U.S. Person (hereinafter **Certification**), as required by U.S. Treasury regulations, (i) has been received by Euroclear and/or Clearstream, Luxembourg and Euroclear and/or Clearstream, Luxembourg, as applicable, has given a like certification (based on the Certifications it has received) to the Principal Paying Agent or, (ii) in the case of a Temporary Global Note or Temporary Global Certificate held otherwise than on behalf of Euroclear and/or Clearstream, Luxembourg from the holder thereof.

On and after the Exchange Date (as defined below), interests in the Temporary Global Note will be exchangeable (free of charge) upon a request as described therein either for, as applicable, (i) interests in a Permanent Global Note or (ii) Definitive Bearer Notes of the same Series with, where applicable, Receipts, Coupons and/or Talons attached (as indicated in the applicable Final Terms and subject, in the case of Definitive Bearer Notes, to such notice period as is specified in the Permanent Global Note), in accordance with the terms of the Temporary Global Note against Certification as to non-US beneficial ownership as described above and as required by U.S. Treasury regulations unless such Certification has already been given pursuant to the provisions set forth above; provided, however, that if the relevant Global Note is issued in respect of a Tranche of Bearer Notes described as Partly Paid Notes in the applicable Final Terms, such Global Note may be exchanged for Definitive Bearer Notes and (if applicable) Coupons, Receipts and/or Talons as described above only if the final part payment on all such Partly Paid Notes then outstanding has been paid. Exchange of a Temporary Global Note for interests in a Permanent Global Note will only be made if Definitive Bearer Notes have not already been issued. If Definitive Bearer Notes have already been issued, the Temporary Global Note may only thereafter be exchanged for Definitive Bearer Notes pursuant to the terms thereof. The holder of a Temporary Global Note will not be entitled to collect any payment of interest, principal or other amount due on or after the Exchange Date unless, upon due Certification, exchange of the Temporary Global Note for an interest in a Permanent Global Note or, in the case of Bearer Notes, for Definitive Bearer Notes is improperly withheld or refused.

Payments of principal, interest (if any) or any other amounts on a Permanent Global Note (including Permanent Global SIS Notes) will be made through Euroclear and/or Clearstream, Luxembourg, and/or SIS as applicable, to or to the order of the holder thereof (against presentation or surrender (as the case may be) of the Permanent Global Note if the Permanent Global Note is not intended to be issued in NGN form) without any requirement for Certification.

Notwithstanding the foregoing, the Bearer Notes of each Tranche must not be offered or sold in the United States or to, or for the benefit or account of, a person that is not a Permitted Transferee. Any future transfer, resale,

pledge or delivery of such Bearer Notes or any interest therein may only be made to a Permitted Transferee in compliance with the resale provisions set forth in Regulation S of the Securities Act.

For the purposes of this section "*Certification as to non-U.S. beneficial ownership*", the **Exchange Date** shall be the day immediately following the later of (i) 40 days after the Temporary Global Note or, as the case may be, Temporary Global Certificate is issued and (ii) 40 days after the completion of the distribution of the relevant Tranche, as certified by the relevant Dealer (in the case of a non-syndicated issue) or the relevant lead manager (in the case of a syndicated issue).

4.2 CHF SIS Notes

CHF SIS Notes are Bearer SIS Notes benefiting from a limited exception to the non-US beneficial ownership certification requirement of the TEFRA D Rules. Other SIS Notes may be subject to additional selling restrictions and additional U.S. tax disclosure as set out in the applicable Final Terms.

Special procedures must be followed for CHF SIS Notes in order for such Notes to be exempt from Certification (as defined below). Each of the relevant Dealers must have represented and agreed in the Programme Agreement that (a) it will comply with U.S. selling restrictions in so far as they apply to CHF SIS Notes and (b) the offering and sale of the CHF SIS Notes has been and will be conducted in accordance with Swiss laws and regulations. The following criteria must be fulfilled in order for the limited exception to the non-US beneficial ownership certification requirement of the TEFRA D Rules to apply:

- the interest on, and the principal of, the CHF SIS Notes are denominated only in Swiss Francs;
- the interest on, and the principal of, the CHF SIS Notes are payable only in Switzerland;
- the CHF SIS Notes are offered and sold in accordance with Swiss customary practice and documentation;
- the relevant Dealers agree to use reasonable efforts to sell the CHF SIS Notes within Switzerland;
- the CHF SIS Notes are not listed, or subject to an application for listing, on an exchange located outside Switzerland;
- the issuance of the CHF SIS Notes complies with any guidelines or restrictions imposed by Swiss governmental, banking or securities authorities from time to time; and
- more than 80 per cent. by value of the CHF SIS Notes included in the offering of which they are part are offered and sold to non-Dealers by Dealers maintaining an office located in Switzerland.

5. EXCHANGE UPON THE OCCURRENCE OF AN EXCHANGE EVENT

In respect of Bearer SIS Notes, the Permanent Global SIS Note will not be exchangeable at the option of the holders of such Bearer SIS Notes, but may be exchanged for Definitive Bearer SIS Notes, in whole, but not in part, if the Principal Swiss Paying Agent deems:

- (i) the printing of definitive Notes, receipts or coupons to be necessary or useful, or
- (ii) the presentation of definitive Notes, receipts or coupons to be required by Swiss or foreign laws in connection with the enforcement of rights (including in cases of bankruptcy, consolidation or reorganisation of the Issuer).

In respect of Bearer SIS Notes, each such circumstance constitutes a **Bearer SIS Notes Exchange Event**.

If Definitive Bearer SIS Notes are delivered, the relevant permanent Global Note will immediately be cancelled by the Principal Swiss Paying Agent or the relevant lead manager, as the case may be, and the Definitive Bearer SIS Notes shall be delivered to the relevant holders against cancellation of the relevant Bearer SIS Notes in such holders' securities accounts.

6. OFFER AND SALE IN THE U.S. AND U.S. LEGENDS

Prospective investors should also refer to "*Subscription, Sale and Transfer*" for additional information in connection with the offer and sale of German Law Notes in the U.S.

Bearer Notes of each Tranche offered and sold only in an offshore transaction (as defined in Regulation S) may not be offered or sold in the United States or to, or for the benefit or account of, a person that is not a Permitted Transferee, and such Bearer Notes will bear a legend regarding such restrictions on transfer. Any future transfer, resale, pledge or delivery of such Bearer Notes or any interest therein may only be made in an offshore transaction (as defined under Regulation S) to a Permitted Transferee in compliance with the resale provisions set forth in Regulation S of the Securities Act.

The following legend will appear on all permanent Bearer Notes which have an original maturity of more than one year and on all receipts, interest coupons and talons relating to such Notes:

"ANY UNITED STATES PERSON (AS DEFINED IN THE INTERNAL REVENUE CODE OF THE UNITED STATES) WHO HOLDS THIS OBLIGATION WILL BE SUBJECT TO LIMITATIONS UNDER THE UNITED STATES INCOME TAX LAWS, INCLUDING THE LIMITATIONS PROVIDED IN SECTIONS 165(j) AND 1287(a) OF THE INTERNAL REVENUE CODE."

The sections referred to above provide that United States persons (as defined in the Code), with certain exceptions, will not be entitled to deduct any loss on Bearer Notes and will not be entitled to capital gains treatment of any gain on any sale, disposition, redemption or payment of principal in respect of such Notes, receipts, interest coupons or talons.

7. CLEARING SYSTEMS

Any reference herein to "Euroclear" and/or "Clearstream, Luxembourg" and/or "Clearstream, Germany" shall, whenever the context so permits, be deemed to include a reference to any additional or alternative clearing system specified in the applicable Final Terms (including, without limitation, Euroclear France and the *intermédiaires*

financiers habilités authorised to maintain accounts therein, in relation to SIS Notes or any other Notes listed on SIX Swiss Exchange, SIS or any other clearing institution in Switzerland recognised for such purposes by SIX Swiss Exchange, approved by the relevant Issuer, the Guarantor, the Principal Paying Agent, and, in the case of Notes listed on the Luxembourg Stock Exchange, the Luxembourg Stock Exchange).

Diese Bedingung 4 ist anwendbar, falls in den anwendbaren Endgültigen Bedingungen die „ <i>Bestimmungen für Festverzinsliche Schuldverschreibungen</i> “, „ <i>Bestimmungen für Variabel Verzinsliche Schuldverschreibungen</i> “, „ <i>Bestimmungen für Schuldverschreibungen mit Strukturierter Verzinsung</i> “ und/oder „ <i>Bestimmungen für Nullkupon-Schuldverschreibungen</i> “ als „Anwendbar“ bezeichnet sind.
	For the purpose of this Condition 4, any reference to "Interest Amount" shall be deemed to be a reference to the Fixed Coupon Amount, the Floating Coupon Amount or the Structured Interest Amount (each as defined below) when the context requires.	Für die Zwecke dieser Bedingung 4 gelten Bezugnahmen auf einen „Zinsbetrag“, falls der Zusammenhang dies erfordert, als Bezugnahmen auf den Festzinsbetrag, den Variablen Kuponbetrag oder den Strukturierten Zinsbetrag (jeweils wie nachstehend definiert).
4.1	Fixed Rate Note Provisions	Bestimmungen für Festverzinsliche Schuldverschreibungen

	Fixed Rate Notes may provide for a method of calculating interest which does not require any Day Count Fraction as interest payable on each specified Interest Payment Date is determined by applying the Rate(s) of Interest to the Specified Denomination as it shall be set out in the applicable Final Terms.	Festverzinsliche Schuldverschreibungen können eine Zinsberechnungsmethode vorsehen, die keinen Zinstagequotienten erfordert, da die an jedem Festgelegten Zinszahlungstag zu zahlenden Zinsen durch Anwendung des/der in den anwendbaren Endgültigen Bedingungen angegebenen Zinssatzes/Zinssätze auf die Festgelegte Stückelung bestimmt werden.
	In the case of Notes which are Non-exempt Offer to the public and where the Rate(s) of Interest is/are to be determined by reference to a percentage to be published by the Issuer on http://prospectus.socgen.com , the applicable Final Terms will specify an indicative value, a minimum value and will indicate the date of publication thereof. 	For the purpose of this Condition 4.1:	Für die Zwecke dieser Bedingung 4.1 gilt Folgendes:
	Fixed Rate Note means a Note which bears one or more fixed rate(s) of interest applicable to the relevant Interest Period which may be either an Adjusted Fixed Rate Note or an Unadjusted Fixed Rate Note.	Festverzinsliche Schuldverschreibung bezeichnet eine Schuldverschreibung, auf die ein oder mehrere für die jeweilige Zinsperiode geltende feste Zinssätze gezahlt werden. Dabei kann es sich um eine Festverzinsliche Schuldverschreibung mit Anpassung oder eine Festverzinsliche Schuldverschreibung ohne Anpassung handeln.
	Adjusted Fixed Rate Note means a Fixed Rate Note in respect of which the Interest Amount and the Interest Payment Date are subject to modification in accordance with the provisions of Condition 4.1.2.	Festverzinsliche Schuldverschreibung mit Anpassung bezeichnet eine Festverzinsliche Schuldverschreibung, deren Zinsbetrag und Zinszahlungstag gemäß den Bestimmungen von Bedingung 4.1.2 angepasst werden.
	Unadjusted Fixed Rate Note means a Fixed Rate Note in respect of which the Interest Amount and the Interest Payment Date remain, for the purposes of this Condition 4, unchanged and are calculated in accordance with the provisions of Condition 4.1.1.	Festverzinsliche Schuldverschreibung ohne Anpassung bezeichnet eine Festverzinsliche Schuldverschreibung, deren Zinsbetrag und Zinszahlungstag für die Zwecke dieser Bedingung 4 unverändert bleiben und gemäß den Bestimmungen von Bedingung 4.1.1 berechnet werden.
4.1.1	Unadjusted Fixed Rate Notes	Festverzinsliche Schuldverschreibungen ohne Anpassung
	Each Unadjusted Fixed Rate Note bears interest from (and including) the Interest Commencement Date at the rate(s) per annum equal to the Rate(s) of Interest. Interest will be payable in arrear on the Interest Payment Date(s) in each year up to (and including) the Maturity Date, as specified in the applicable Final Terms.	Jede Festverzinsliche Schuldverschreibung ohne Anpassung wird ab dem Zinsanfangstag (einschließlich) zu einem Jahreszinssatz (zu Jahreszinssätzen) in Höhe des Zinssatzes (der Zinssätze) verzinst. Die Zinsen sind an dem (den) in den anwendbaren Endgültigen Bedingungen angegebenen Zinszahlungstag(en) jedes Jahres bis zum Fälligkeitstag (einschließlich) rückwirkend zu zahlen.

	<p>If the Notes are Definitive Bearer Notes, the amount of interest payable on each Interest Payment Date in respect of the Interest Period ending on such date will amount to the Fixed Coupon Amount. Payments of interest on any Interest Payment Date will, if so specified in the applicable Final Terms, amount to the Broken Amount so specified (the Broken Amount). Except in the case of Notes which are Definitive Bearer Notes where an applicable Fixed Coupon Amount or Broken Amount is specified in the applicable Final Terms, interest shall be calculated in respect of any period by applying the Rate of Interest specified in the applicable Final Terms to the aggregate outstanding nominal amount of the Notes of the relevant Series (or, if they are Partly Paid Notes, the aggregate amount paid up); or in the case of Fixed Rate Notes which are Definitive Bearer Notes, the Calculation Amount, and, in each case, multiplying such amount by the applicable Day Count Fraction (if any), and rounding the resultant figure to the nearest sub-unit (as defined in Condition 4.7 below) of the relevant Specified Currency, half of any such sub-unit being rounded upwards. Fixed Rate Notes may provide for a method of calculating interest which does not require any Day Count Fraction as interest payable on each specified Interest Payment Date is determined by applying the Rate of Interest to the Specified Denomination as it shall be set out in the applicable Final Terms.</p>	<p>Falls es sich bei den Schuldverschreibungen um Effektive Inhaberschuldverschreibungen handelt, entspricht der Zinsbetrag, der an jedem Zinszahlungstag in Bezug auf die an diesem Tag endende Zinsperiode zu zahlen ist, dem Festzinsbetrag. Außer im Fall von Schuldverschreibungen, bei denen es sich um Effektive Inhaberschuldverschreibungen handelt, für die in den anwendbaren Endgültigen Bedingungen ein anwendbarer Festzinsbetrag oder Stückzinsen festgelegt ist/sind, werden die Zinsen für eine Periode auf Grundlage des in den anwendbaren Endgültigen Bedingungen angegebenen Zinssatzes berechnet, der auf den ausstehenden Gesamtnennbetrag der Schuldverschreibungen der jeweiligen Serie (bzw. bei Teilweise Eingezahlten Schuldverschreibungen auf den eingezahlten Gesamtbetrag oder bei Festverzinslichen Schuldverschreibungen, bei denen es sich um Effektive Inhaberschuldverschreibungen handelt, auf den Berechnungsbetrag) angewendet wird. Dieser Betrag wird jeweils mit einem etwaigen anwendbaren Zinstagequotienten multipliziert, und das Ergebnis wird auf die nächste (in nachstehender Bedingung 4.7 definierte) Untereinheit der jeweiligen festgelegten Währung gerundet (wobei ein Wert von 0,5 dieser Untereinheit aufgerundet wird). Festverzinsliche Schuldverschreibungen können eine Zinsberechnungsmethode vorsehen, die keinen Zinstagequotienten erfordert, da die an jedem festgelegten Zinszahlungstag zu zahlenden Zinsen durch Anwendung des in den anwendbaren Endgültigen Bedingungen angegebenen Zinssatzes auf die festgelegte Stückelung bestimmt werden.</p>

	Any such adjustment may take account of, without limitation, any anticipated transfer of economic value as a result of any difference in the term structure or tenor of the Replacement Rate by comparison to the Original Reference Rate or Original Underlying Benchmark. Bei einer derartigen Anpassung kann u. a. eine erwartete Übertragung des wirtschaftlichen Werts infolge einer Differenz in der Laufzeitstruktur oder der Laufzeit des Ersatz-Referenzsatz im Vergleich zum Ursprünglichen Referenzsatz oder dem Ursprünglichen Basiswert-Benchmark berücksichtigt werden. Der Anpassungs-Spread kann positiv, negativ oder null sein oder gemäß einer Formel oder Methodik bestimmt werden.

	The Calculation Agent will as soon as practicable after each time at which the Rate(s) of Interest is to be determined, determine the Rate(s) of Interest for the relevant Interest Period.	Die Berechnungsstelle stellt jeweils an dem für die Feststellung des Zinssatzes/der Zinssätze vorgesehenen Zeitpunkt oder so bald wie möglich danach den Zinssatz/die Zinssätze für die maßgebliche Zinsperiode fest.
	The Calculation Agent will calculate the Interest Amount payable on the Floating Rate Notes in respect of each Specified Denomination for the relevant Interest Period. Die Berechnungsstelle berechnet den Zinsbetrag, der in Bezug auf die einzelnen Festgelegten Stückelungen für die maßgebliche Zinsperiode auf die Variabel Verzinslichen Schuldverschreibungen zu zahlen ist. Jeder Zinsbetrag wird durch Anwendung des Zinssatzes/der Zinssätze auf die einzelne Festgelegte Stückelung und Multiplikation dieses Betrags mit dem anwendbaren Zinstagequotienten und Rundung des Ergebnisses auf die nächste (nachstehend definierte) Untereinheit der jeweiligen Festgelegten Währung (wobei ein Wert von 0,5 dieser Untereinheit aufgerundet wird oder anderweitig gemäß der anwendbaren Marktkonvention verfahren wird) berechnet.

2.	SCHEDULE – GENERAL DEFINITIONS AND SPECIFIC DEFINITION(S) - VARIABLE DATA - REFERENCE FORMULA(E)	ANHANG – ALLGEMEINE BEGRIFFSBESTIMMUNGEN UND SPEZIFISCHE BEGRIFFSBESTIMMUNG(EN) – VARIABLEN – REFERENZFORMEL(N)
2.1	Schedule	Zeitplan
	A Schedule designates either (A) a list of Valuation Date(s) or Relevant Valuation Date(s) or any other date(s), or (B) all Valuation Date(s) or Relevant Valuation Date(s) or any other date(s) comprised within a defined period.	Ein Zeitplan bezeichnet entweder (A) eine Liste von Bewertungstagen oder Maßgeblichen Bewertungstagen oder sonstigen Tagen oder (ii) alle Bewertungstage oder Maßgeblichen Bewertungstage oder sonstigen Tage, die in einen in den anwendbaren Endgültigen Bedingungen festgelegten Zeitraum fallen.
	For the avoidance of doubt, several Schedules may be used for the determination and calculation of a Product Amount. For ease of reading, Schedules may be renamed (e.g. Period, Corridor Period, European Knock-In Period, American Knock-In Period,...).	Zur Klarstellung wird festgehalten, dass für die Bestimmung und Berechnung eines Produktbetrags mehrere Zeitpläne verwendet werden können. Zur besseren Verständlichkeit können Zeitpläne umbenannt werden (z. B. Periode, Korridor-Periode, Europäische Knock-in-Periode, Amerikanische Knock-in-Periode etc.).
	Furthermore, in respect of a Product Formula and a particular Schedule, also for ease of reading, "Valuation Date" or "Relevant Valuation Date" may be renamed (for instance, for a Schedule made of daily Valuation Dates, "Valuation Date" may be renamed "Daily Valuation Date", for a Schedule with annual Valuation Dates, "Valuation Date" may be renamed "Annual Valuation Date", for another Schedule relating to a specific Underlying_A, "Valuation Date" may be renamed "Underlying_A Valuation Date",...).	Ferner kann, ebenfalls zur besseren Verständlichkeit, in Bezug auf eine Produktformel und einen bestimmten Zeitplan ein Bewertungstag oder Maßgeblicher Bewertungstag umbenannt werden (z. B. kann für einen aus täglichen Bewertungstagen bestehenden Zeitplan „Bewertungstag“ in „Täglicher Bewertungstag“ umbenannt werden, für einen Zeitplan mit jährlichen Bewertungstagen „Bewertungstag“ in „Jährlicher Bewertungstag“, für einen anderen Zeitplan in Bezug auf einen spezifischen Basiswert_A „Bewertungstag“ in „Bewertungstag Basiswert_A“ etc.).
2.2	General Definitions and Specific Definition(s)	Allgemeine Begriffsbestimmungen und Spezifische Begriffsbestimmung(en)
2.2.1	General Definitions: Definitions listed in Condition 5 below are applicable to all the Families of Products and to each Product within a Family of Product.	Allgemeine Begriffsbestimmungen: In Bedingung 5 unten aufgeführte Begriffsbestimmungen sind auf alle Produktfamilien und jedes Produkt innerhalb einer Produktfamilie anwendbar.
2.2.2	Specific Definition(s): Definitions used, as the case may be, to determine and calculate a Product Amount and/or the related Reference Formula. One or more specific definitions may be necessary (hereafter the Specific Definition(s)). The Specific Definitions are set out in the paragraph of Condition 5 below corresponding to the relevant Reference of the Product and called "Specific Definitions" and replicated in the applicable Final Terms. When no Specific Definition is necessary to determine and calculate a Product Amount, the paragraph "Specific Definition(s)" shall mention: "No Specific Definition is necessary to determine and calculate a Product Amount".	Spezifische Begriffsbestimmung(en): Begriffsbestimmungen, die gegebenenfalls zur Bestimmung und Berechnung eines Produktbetrags und/oder der dazugehörigen Referenzformel verwendet werden. Es können eine oder mehrere spezifische Begriffsbestimmungen (nachfolgend die Spezifische(n) Begriffsbestimmung(en)) erforderlich sein. Die Spezifischen Begriffsbestimmungen sind in dem Absatz „Spezifische Begriffsbestimmungen“ von Bedingung 5 unten aufgeführt, der der maßgeblichen Produktreferenz entspricht, und werden in den anwendbaren Endgültigen Bedingungen wiedergegeben. Ist keine Spezifische Begriffsbestimmung für die Bestimmung und Berechnung eines Produktbetrags erforderlich, wird in dem Absatz „Spezifische Begriffsbestimmung(en)“ Folgendes angegeben: „Es ist keine Spezifische Begriffsbestimmung für die Bestimmung und Berechnung eines Produktbetrags erforderlich“.
2.3	Variable Data	Variablen
	One or more variable data are necessary to determine and calculate a Product Amount of a Product (referred to as the Variable Data). The definition of the Variable Date that may be used for the Product Amount of a Product of any Family of Products are listed in Condition 5.4 below.	Für die Bestimmung und Berechnung eines Produktbetrags eines Produkts sind eine oder mehrere Variablen erforderlich (die Variablen). Die Begriffsbestimmungen der Variablen, die für den Produktbetrag eines Produkts einer beliebigen Produktfamilie verwendet werden können, sind in der nachstehenden Bedingung 5.4 aufgelistet.
	The Variable Data listed in Condition 5.4 and that may be used in respect of one or more Products of a	Die in Bedingung 5.4 aufgelisteten Variablen, die für eines oder mehrere Produkte einer Produktfamilie

	Family of Products are set out in the sub-paragraph titled "Variable Data" of the relevant Family of Product (e.g. 3.3.0).	verwendet werden können, sind im Unterabsatz „Variablen“ der maßgeblichen Produktfamilie (z. B. 3.3.0) aufgeführt.
	The Variable Data listed in Condition 5.4 necessary to a specific Product are set out in the paragraph "Variable Data" of such Product.	Die in Bedingung 5.4 aufgelisteten Variablen, die für ein spezifisches Produkt erforderlich sind, sind im Absatz „Variablen“ des betreffenden Produkts aufgeführt.
	In the applicable Final Terms, depending on their respective definition set out in Condition 5.4 below, each Variable Data can be an amount, a level, a percentage or the observed value of a Reference Formula applied to the Underlying(s) of the Product.	In den anwendbaren Endgültigen Bedingungen kann es sich bei jeder Variablen – in Abhängigkeit von ihrer jeweiligen in nachstehender Bedingung 5.4 aufgeführten Begriffsbestimmung – um einen Betrag, einen Stand, einen Prozentsatz oder den beobachteten Wert einer auf den (die) Basiswert(e) des Produkts angewandten ReferenzFormel handeln.
A..	Variable Data may depend on a specific Schedule or dates as defined above in Condition 2.1.	Eine Variable kann von einem bestimmten Zeitplan oder von Zeitpunkten abhängen, wie vorstehend in Bedingung 2.1 definiert.
	o. Illustration in respect of Notes:	o. Beispiel in Bezug auf Schuldverschreibungen
	for the Reference of the Product 3.1.1 "Certificate", the paragraph "Automatic Early Redemption Amount" refers to the Variable Data "ConstantRedemptionLevel_AERA(i)" which is the value of the ConstantRedemptionLevel_AERA on a specific Valuation Date (i), date in respect of which an Automatic Early Redemption Event is deemed to have occurred, as determined by the Calculation Agent:	Bei der Produktreferenz 3.1.1 „Certificate“ verweist der Absatz „Automatischer Vorzeitiger Rückzahlungsbetrag“ auf die Variable „KonstantesRückzahlungsniveau_AVRB(i)“, die der Wert von KonstantesRückzahlungsniveau_AVRB an einem spezifischen Bewertungstag (i) ist, in Bezug auf den nach Feststellung der Berechnungsstelle ein Automatisches Vorzeitiges Rückzahlungsereignis als eingetreten gilt.
	Automatic Early Redemption Amount(i) = Specified Denomination × Product Formula(i)	Automatischer Vorzeitiger Rückzahlungsbetrag(i) = Festgelegte Stückelung x Produktformel(i)
	Product Formula(i) = ConstantRedemptionLevel_AERA(i)	Produktformel(i) = KonstantesRückzahlungsniveau_AVRB(i)
	If in respect of a Product Formula of a Product Amount of a specific Product, a Variable Data has a value of either 0 (zero) or 1 (one), or is not used or not useful or if a Variable Data is not applicable for the calculation of certain Product Amounts, then Product Formula(e) as specified in the applicable Final Terms may be simplified in the applicable Final Terms for the purpose of improving the reading and intelligibility of formula(e).	Falls eine Variable in einer Produktformel für einen Produktbetrag eines bestimmten Produkts einen Wert von 0 (null) oder 1 (eins) annimmt oder nicht verwendet wird oder nicht zweckdienlich ist oder falls eine Variable bei der Berechnung bestimmter Produktbeträge nicht anwendbar ist, können Produktformeln wie in den anwendbaren Endgültigen Bedingungen angegeben zur Verbesserung der Lesbarkeit und Verständlichkeit in den anwendbaren Endgültigen Bedingungen von Formeln vereinfacht werden.
	o. Illustration in respect of Notes for instance, if the Product Formula of a Product Amount of a particular Product is:	o. Ist beispielsweise die Produktformel für einen Produktbetrag eines bestimmten Produkts:
	ConstantRedemptionlevel + Min(Cap ; Participation x ReferenceFormula_Coupon)	KonstantesRückzahlungsniveau + Min(Cap ; Partizipation x ReferenzFormel_Kupon)

	then the Product Formula of such Product Amount may be simplified in the applicable Final Terms as follows:	kann die Produktformel für den betreffenden Produktbetrag in den anwendbaren Endgültigen Bedingungen wie folgt vereinfacht werden:
	ReferenceFormula_Coupon	ReferenzFormel Kupon
2.4	Reference Formula(e)	Referenzformel(n)
	Reference Formula(e) are pre-defined basic formulae specified under Condition 4 below (referred to as individually the Reference Formula and collectively Reference Formulae) which are used, as the case may be, as inputs in respect of an Option, a Product Formula and/or one or several Specific Definitions or Add-ons necessary to determine and calculate a Product Amount.	Referenzformel(n) sind in Bedingung 4 unten aufgeführte vordefinierte Grundformeln (jeweils eine Referenzformel und zusammen die Referenzformeln), die als Eingangsgrößen für eine Option, eine Produktformel und/oder eine oder mehrere Spezifische Begriffsbestimmungen oder Add-ons, die für die Bestimmung und Berechnung eines Produktbetrags erforderlich sind, dienen.

	For each Product described in Condition 3 below appears a paragraph called "Reference Formula(e)".	Für jedes in Bedingung 3 unten beschriebene Produkt ist ein Absatz „Referenzformel(n)“ vorhanden.
	This paragraph indicates:	Dieser Absatz enthält die folgenden Angaben:

	For example, for the product 3.5.1.1 "Resettable Accumulator", the paragraph "Reference Formula(e)" indicates "Reference Formula_Final" which means that a Reference Formula is used to determine the Final Redemption Amount and the paragraph "Final Redemption" indicates:	Beispielsweise ist für das Produkt 3.5.1.1 „Resettable Accumulator“ in dem Absatz „Referenzformel(n)“ „ReferenzFormel_Endgültig“ angegeben, was bedeutet, dass eine Referenzformel zur Bestimmung des Endgültigen Rückzahlungsbetrags verwendet wird, und ist im Absatz „Rückzahlung bei Endfälligkeit“ angegeben:
	Final Redemption Amount = Specified Denomination x Product Formula(T)	Endgültiger Rückzahlungsbetrag(i) = Festgelegte Stückelung x Produktformel(T)
	Product Formula(T) = ConstantRedemption + Max(Floor; Min(Cap; Participation x Max(0; Reference Formula_Final(T)) – Strike)))	Produktformel(T) = KonstanteRückzahlung + Max(Floor; Min(Cap; Partizipation x Max(0, ReferenzFormel_Endgültig(T)) – Basispreis)))
	- "ReferenceFormula_AERA" means that the Reference Formula of the Product is used to determine the Automatic Early Redemption Amount of the Product, if any.	- „ReferenzFormel_AVRB“ bedeutet, dass die Referenzformel des Produkts zur Bestimmung eines etwaigen Automatischen Vorzeitigen Rückzahlungsbetrags des Produkts verwendet wird.
	For example, for the product 3.1.2 "European Forward", the paragraph "Reference Formula(e)" indicates "Reference-Formula_AERA" means that a Reference Formula is used to determine the Automatic Early Redemption Amount and the paragraph "Automatic Early Redemption" indicates:	Beispielsweise ist für das Produkt 3.1.2 „European Forward“ im Absatz „Referenzformel(n)“ „ReferenzFormel_AVRB“ angegeben, was bedeutet, dass eine Referenzformel zur Bestimmung des Automatischen Vorzeitigen Rückzahlungsbetrags verwendet wird, und ist im Absatz „Automatische Vorzeitige Rückzahlung“ angegeben:
	Automatic Early Redemption Amount = Specified Denomination x Product Formula(i)	Automatischer Vorzeitiger Rückzahlungsbetrag) = Festgelegte Stückelung x Produktformel(i)
	Product Formula(i) = ConstantRedemptionLevel_AERA(i) + (Coupon_AERA(i) + Participation_AERA(i) x ReferenceFormula_AERA(i))	Produktformel(i) = KonstantesRückzahlungsNiveau_AVRB(i) + (Kupon_AVRB(i) + Partizipation_AVRB(i) x ReferenzFormel_AVRB(i))
	"ReferenceFormula_Coupon" means that the Reference Formula of the Product is used to determine the Final Redemption Amount of the Product and the Product Formula, the Option and/or one or several Specific Definitions necessary to the determination of the Final Redemption Amount contain the instruction "ReferenceFormula_Coupon";	„ReferenzFormel_Kupon“ bedeutet, dass die Referenzformel des Produkts zur Bestimmung des Endgültigen Rückzahlungsbetrags des Produkts verwendet wird und die Produktformel, die Option und/oder eine oder mehrere Spezifische Begriffsbestimmungen, die für die Bestimmung des Endgültigen Rückzahlungsbetrags erforderlich sind, die Anweisung „ReferenzFormel Kupon“ enthalten;

	For example, for the product 3.5.1 "Accumulator", the paragraph "Reference Formula(e)" indicates "ReferenceFormula_Coupon" means that a Reference Formula is used to determine the Structured Interest Amount and the paragraph "Structured Interest" indicates:	Beispielsweise ist für das Produkt 3.5.1. „Accumulator“ in dem Absatz „Referenzformel(n)“ „ReferenzFormel_Kupon“ angegeben, was bedeutet, dass eine Referenzformel zur Bestimmung des Strukturierten Zinsbetrags verwendet wird, und ist im Absatz „Strukturierte Verzinsung“ angegeben:
	$\text{Structured Interest Amount}(i) = \text{Specified Denomination} \times \text{Product Formula}(i)$	$\text{Strukturierter Zinsbetrag}(i) = \text{Festgelegte Stückelung} \times \text{Produktformel}(i)$

The paragraph "Reference Formula(e)" will also indicate the Families of Products to which the applicable or the most likely to be applicable Reference Formula(e) belong to. For example, if the paragraph "Reference Formula(e)" indicates "AverageTimeLevel (as defined under Condition 4.9 below of the Family of "TimeLevel")", it means that the Reference Formula "AverageTimeLevel", belonging to the "TimeLevel" Family as defined in Condition 4.9 below, is applicable or is the most likely to be applicable to the Product.	2.4.2 auf der anderen Seite die Bezeichnung der anwendbaren Referenzformeln und/oder derjenigen, deren Anwendung auf die Referenzformeln, die das Produkt aufweisen kann, am wahrscheinlichsten ist. In jedem Fall sind in dem Absatz „Referenzformel(n)“ ebenfalls die Produktfamilien angegeben, zu denen die anwendbare(n) oder höchstwahrscheinlich anwendbare(n) Referenzformel(n) gehört/gehören. Wenn z. B. der Absatz „Referenzformel(n)“ „DurchschnittZeitStand“ (wie in Bedingung 4.9 unten der Familie „ZeitStand“ definiert) angibt, so bedeutet dies, dass die Referenzformel „DurchschnittZeitStand“, die zur Familie „ZeitStand“ gemäß der Begriffsbestimmung in Bedingung 4.9 unten gehört, auf das Produkt anwendbar ist bzw. am wahrscheinlichsten auf das Produkt anzuwenden ist.
	A Reference Formula will be used to determine either Reference Price(s), Reference Performance(s), Reference Level(s) or Reference Fixing(s).	Eine Referenzformel wird zur Bestimmung entweder des/der Referenzpreise(s), Referenzwertentwicklung(en), Referenzstands (Referenzstände) oder Referenz-Fixing(s) verwendet.
	For the avoidance of doubt, when Reference Formula(e) is/are not relevant for a Product, it shall not appear in the applicable Final Terms of this Product.	Zur Klarstellung wird festgehalten, dass für den Fall, dass eine Referenzformel für ein Produkt nicht maßgeblich ist, diese nicht in den anwendbaren Endgültigen Bedingungen des betreffenden Produkts enthalten ist.
	Any Reference Formula indicated in Condition 4 below may also, in respect of a Product Formula, be defined as a "Sum of ReferenceFormula", a "Difference of ReferenceFormula" or a "ReferenceFormula – 100%" or "100% – ReferenceFormula" or be expressed as a negative component and be preceded by the sign "-".	Jede in Bedingung 4 unten aufgeführte Referenzformel kann in Bezug auf eine Produktformel auch als „Summe der ReferenzFormel“, „Differenz der ReferenzFormel“ oder „ReferenzFormel – 100 %“ oder „100 % – ReferenzFormel“ oder als negative Komponente mit vorangestelltem Minuszeichen definiert werden.
	Where:	Dabei gilt:
	○ A: "Sum of ReferenceFormula" means that two or more Reference Formulae have been added together in order to determine a new Reference Formula for the purpose of determining a Product Amount.	○ A: „Summe von ReferenzFormel“ bedeutet, dass zwei oder mehr Referenzformeln addiert wurden, um eine neue Referenzformel für die Bestimmung eines Produktbetrags festzulegen.
	○ B: "Difference ReferenceFormula" means that a Reference Formula have been subtracted from another Reference Formula in order to determine a new Reference Formula for the purpose of determining a Product Amount.	○ B: „Differenz ReferenzFormel“ bedeutet, dass eine Referenzformel von einer anderen Referenzformel abgezogen wurde, um eine neue Referenzformel für die Bestimmung eines Produktbetrags festzulegen.
	○ C: "ReferenceFormula – 100%" means that 100% has been subtracted from a Reference Formula in order to determine a	○ C: „ReferenzFormel – 100 %“ bedeutet, dass 100 % von einer Referenzformel abgezogen wurden, um eine neue Referenzformel für die

	O D: "100% - ReferenceFormula" means that a ReferenceFormula has been subtracted from 100% in order to determine the Reference Formula(e) for the purpose of determining a Product Amount.	O D: „100 % – ReferenzFormel“ bedeutet, dass eine ReferenzFormel von 100 % abgezogen wurde, um die Referenzformel(n) für die Bestimmung eines Produktbetrags festzulegen.																								
	Provided that options A to D above may be combined: for example a new Reference Formula may be created as a Sum of ReferenceFormula as per option A, and then subtracted from 100% as per option D.	Dabei können die vorstehenden Optionen A bis D kombiniert werden. So kann z. B. eine neue Referenzformel als Summe von ReferenzFormel gemäß Option A gebildet und dann gemäß Option D von 100 % abgezogen werden.																								
	Any Reference Formula defined in a currency other than the Specified Currency may be converted into the Specified Currency based on the applicable Foreign Exchange Rate between the currency of the Product Formula and the Specified Currency.	Jede Referenzformel, die in einer anderen Währung als die Festgelegte Währung lautet, kann in die Festgelegte Währung umgerechnet werden, basierend auf dem gültigen Wechselkurs zwischen der Währung der Produktformel und der Festgelegten Währung.																								
	Reference Formula(e), Variable Data, applicable options and any other term which are defined in brackets “[...]” are optional.	Referenzformeln, Variablen, anwendbare Optionen und sonstige Begriffe, die in eckigen Klammern „[...]“ definiert sind, sind optional.

	Description of how the value of the relevant Notes can be affected by the value of the Underlying(s)			Beschreibung, wie der Wert der maßgeblichen Schuldverschreibungen durch den Wert des/der Basiswert(e) beeinflusst wird	
	The Family of Products "Barrier" comprises Products which provide exposure to the positive or negative performance of an Underlying or a Basket of one or several Underlying(s) within a Basket, where the Product Amount(s) are determined based on one or several conditions (categorized in several scenarios). Typically, a condition is satisfied [or not] if the performance or level of an Underlying or Basket of one or several Underlying(s) within a Basket is higher than or equal to [or lower] a pre-defined barrier performance or level. Performance or level of the Underlying or Basket or one or several Underlying(s) within a Basket can be weighted, leveraged, averaged, locked, floored and/or capped.			Die Familie „Barrier“ umfasst Produkte, die ein Engagement in der positiven oder negativen Wertentwicklung eines Basiswerts oder eines Korbs oder eines oder mehrerer der in einem Korb enthaltenen Basiswerte ermöglichen und bei denen der Produktbetrag (die Produktbeträge) auf Grundlage einer oder mehrerer (in verschiedenen Szenarien kategorisierter) Bedingungen bestimmt wird/werden. Typischerweise ist eine Bedingung erfüllt [oder nicht erfüllt], wenn die Wertentwicklung oder der Stand des Basiswerts oder Korbs oder eines oder mehrerer der in einem Korb enthaltenen Basiswerte höher [oder niedriger] als eine vordefinierte Barrieren-Wertentwicklung oder ein vordefinierter Barrieren-Stand ist [oder dieser bzw. diesem entspricht]. Die Wertentwicklung oder der Stand des Basiswerts oder Korbs oder eines oder mehrerer der in einem Korb enthaltenen Basiswerte kann gewichtet, gehebelt, als Durchschnitt ermittelt, eingefroren, mit einer Untergrenze (<i>Floor</i>) versehen und/oder mit einer Obergrenze (<i>Cap</i>) versehen werden.

	o The Final Redemption Amount equals a predetermined value increased as the case may be by the value of the ReferenceFormula considered, which may be subject to a floor and / or cap and / or with a leverage factor.	o Der Endgültige Rückzahlungsbetrag entspricht einem vorher festgelegten Wert, der gegebenenfalls um den Wert der berücksichtigten ReferenzFormel erhöht wird; dieser kann einer Untergrenze (Floor) und/oder einer Obergrenze (Cap) und/oder einem Hebelfaktor unterliegen.

	Description of how the value of the relevant Notes can be affected by the value of the Underlying(s)	Beschreibung, wie der Wert der maßgeblichen Schuldverschreibungen durch den Wert des/der Basiswert(e) beeinflusst wird																				
	The Family "Accumulator and Cliquet" comprises Products which provide exposure to the performance of an Underlying or a Basket or one or several Underlying(s) within a Basket, where the Product Amount(s) are determined based on an accumulation (either additive or multiplicative) of performances of the Underlying or Basket or one or several Underlying(s) within a Basket over several consecutive periods (performances being usually restricted at the beginning of each period). Performances of the Underlying or Basket or one or several Underlying(s) within a Basket can be weighted, leveraged, averaged, locked, floored and/or capped.	Die Familie „Accumulator and Cliquet“ umfasst Produkte, die ein Engagement in der Wertentwicklung eines Basiswerts oder eines Korbs oder eines oder mehrerer der in einem Korb enthaltenen Basiswerte ermöglichen und bei denen der Produktbetrag (die Produktbeträge) auf Grundlage einer (additiven oder multiplikativen) Akkumulation von Wertentwicklungen des Basiswerts oder Korbs oder eines oder mehrerer der in einem Korb enthaltenen Basiswerte über mehrere aufeinanderfolgende Perioden hinweg (wobei die Wertentwicklungen in der Regel am Beginn jeder Periode zurückgesetzt werden) bestimmt wird/werden. Die Wertentwicklungen des Basiswerts oder Korbs oder eines oder mehrerer der in einem Korb enthaltenen Basiswerte können gewichtet, gehebelt, als Durchschnitt ermittelt, eingefroren, mit einer Untergrenze (<i>Floor</i>) versehen und/oder mit einer Obergrenze (<i>Cap</i>) versehen werden.
